

NSF CMMI ENGINEERING RESEARCH AND INNOVATION CONFERENCE 2012

BOSTON

Engineering Transformation Through Partnerships

July 9–12, 2012 | Boston, MA

National Science Foundation
WHERE DISCOVERIES BEGIN

Northeastern

WELCOME MESSAGE

Welcome to the National Science Foundation (NSF) Division of Civil, Mechanical and Manufacturing Innovation (CMMI) 2012 Engineering Research and Innovation Conference. Hosted this year by Northeastern University, the conference has the primary function of satisfying CMMI's grant oversight responsibilities. The conference provides a convenient and intensive venue for CMMI Program Directors to meet with the majority of their grantees to review their research progress, plans, and priorities. At the same time, it affords a unique opportunity for Principal Investigators (PIs) to meet and interact with each other to exchange information and form collaborations for future work, and for NSF to convey important information regarding program plans and priorities.

The conference is centered on a series of poster sessions during which PIs report out to their Program Directors and discuss their work with other researchers. It is my hope that you will take advantage of these sessions to learn about research related to your own work as one means of reducing duplication of effort and improving your own research results. In addition, I hope you can attend the plenary and special sessions during which we will provide information to help you better attain your own research goals. Not only will these sessions bring you up to date on NSF activities, but you will also have the opportunity to participate in learning events, including a workshop to help improve your proposal-writing skills. Associated events, including tours of local industrial and civil facilities, are intended to provide new insights into opportunities for academic research that is relevant to the nation's needs.

Concurrent with the Engineering Research and Innovation Conference, we are hosting the Quake Summit 2012 annual meeting of the George E. Brown, Jr. Network for Earthquake Engineering Simulation (NEES) researchers. Co-location and timing of these meetings enables cost-effective oversight of these activities as well, and provides the opportunity for all CMMI grantees to observe the activities of this important aspect of CMMI's overall portfolio. I hope you will find this a useful addition to the conference activities.

Finally, I would like to thank our Northeastern University hosts for providing an excellent venue for this conference, and I hope you find your time here productive and helpful.

Sincerely,

Steven H. McKnight
CMMI Division Director

SCHEDULE

Sunday, July 8, 2012

Begin Time	End Time	Event	Location
8:00 a.m.	4:30 p.m.	INVITATION ONLY Pre-Conference Workshop: ADVANCE Future Faculty— A Workshop to Promote Diversity and Gender Balance for Prospective Faculty in CMMI-related Disciplines Northeastern ADVANCE Future Faculty Workshops are designed for senior graduate students and post docs who are interested in faculty careers. In addition to attending the conference, invited participants will attend a one-day workshop that provides information to stimulate their professional growth. Workshop topics include: <ul style="list-style-type: none"> • Making new contacts • Interviewing • Communicating and sharing ideas • Negotiating a package • Writing proposals • Creating education plans • Discovering and synthesizing teaching resources • Mentoring • Network building • Creating a collaborative interdisciplinary environment In addition to excellence in scholarship, acceptance to these workshops is based on the ability of the participant to enhance the diversity of the professoriate in engineering and science, so there is a focus on women and underrepresented minorities. Learn more at www.neu.edu/advance .	Northeastern University
9:00 a.m.	4:30 p.m.	INVITATION ONLY: Graduate Student Program Boot Camp	Northeastern University
9:00 a.m.	1:00 p.m.	INVITATION ONLY Pre-Conference Workshop: Infrastructure Systems— Construction Engineering <i>Konstantinos Triantis, NSF</i> <i>Alexandra Medina-Borja, NSF</i> This workshop is intended to test an evaluation model for science investments in construction engineering that identifies societal needs, enabling technologies and knowledge creation for civil infrastructure systems. This workshop is by invitation only. CMMI Program Directors are welcome to attend and observe the deliberations.	Room 308

SCHEDULE

Sunday, July 8, 2012

Begin Time	End Time	Event	Location
9:00 a.m.	5:00 p.m.	Pre-Conference Workshop: Junior Geotechnical Engineering Faculty Enclave <i>Richard J. Frigaszy, NSF</i> This workshop is directed toward early career faculty. The goals are to facilitate connections among early career faculty; provide a forum for both oral and poster presentations for those not presenting at the main CMMI conference; explore ways in which early career faculty can best be served; and provide information about NSF that is specifically designed for early career faculty. A variety of activities tied to the research areas of the conference will be available for children and families. Please refer to page 46 for more information.	Room 310
9:30 a.m.	12:30 p.m.	STEM Sunday A variety of activities tied to the research areas of the conference will be available for children and families. Please refer to page 46 for more information.	Northeastern University
1:30 p.m.	5:00 p.m.	INVITATION ONLY Pre-Conference Workshop: Infrastructure Systems—Transportation <i>Konstantinos Triantis, NSF</i> <i>Alexandra Medina-Borja, NSF</i> This workshop is intended to test an evaluation model for science investments in transportation that identifies societal needs, enabling technologies and knowledge creation for civil infrastructure systems. This workshop is by invitation only. CMMI Program Directors are welcome to attend and observe the deliberations.	Room 308
5:15 p.m.	8:00 p.m.	Scheduled Technical Tour (see pages 31–38 for descriptions)	

SCHEDULE

Monday, July 9, 2012

Begin Time	End Time	Event	Location
8:00 a.m.	6:00 p.m.	Registration and Information Desk Open	Pre-function Hall A
8:00 a.m.	12:00 p.m.	INVITATION ONLY: Graduate Student Program Panel Sessions	Room 302
8:00 a.m.	12:00 p.m.	Pre-Conference Workshop: Breaking Barriers to Innovation <i>Katja Hölttä-Otto, University of Massachusetts, Dartmouth</i> <i>Carolyn Seepersad, University of Texas, Austin</i> This workshop will explore the latest techniques to enhance creativity and increase chances for innovative design. Participants will leave this workshop with practical tools to take with them and change how they approach problem solving and engineering design. The workshop presents results of a four-year NSF-sponsored project on innovation.	Room 306
8:30 a.m.	12:00 p.m.	Pre-Conference Workshop: <i>TheDesignExchange—Characterizing, Mapping, and Interacting with Industry on Human-Centered Design Methods</i> <i>Alice Agogino, University of California, Berkeley</i> <i>Sara Beckman, University of California, Berkeley</i> <i>Sean Hewens, IDEO.org</i> <i>Erin MacDonald, Iowa State University</i> <i>Celeste Roschuni, University of California, Berkeley</i> <i>Robert Stone, Oregon State University</i> <i>Maria Yang, Massachusetts Institute of Technology</i> As human-centered design does not fall into any one disciplinary body of knowledge, there is a need to consolidate and organize the many design methods used, develop a community of practitioners to evaluate and categorize those methods, and educate the next generation of design innovators in appropriate methods. Although design research has increased the number of verified design methods, there is still no centralized venue where human-centered design methods can be shared, discussed, and disseminated or where the research community can provide explanations as to how the various methods within the design process relate to each other.	Room 311

SCHEDULE

Monday, July 9, 2012

Begin Time	End Time	Event	Location
8:30 a.m.	12:00 p.m.	<p>This workshop will engage participants in an exploration of the needs of the academic branch of the design community in the development of <i>TheDesignExchange.org</i>, a site envisioned as an interactive community hub to facilitate the capture, analysis, and widespread use of human-centered design methods. <i>TheDesignExchange</i> is an early-stage prototype that attempts to meet those needs and has received early support from Silicon Valley and San Francisco Bay Area design firms who contributed expert feedback, case studies, and methods to develop a prototype system. The workshop will present and discuss preliminary ontologies for design problems and design methods, and identify features and functionality to include in the development of <i>TheDesignExchange</i> as a useful platform for communication and collaboration between industry and academics. It also will explore collaboration with focused industry sites, such as IDEO.org's HCD Connect (http://www.hcdconnect.org/). The outcomes of this workshop will form the basis of the research agenda for <i>TheDesignExchange</i> platform, which we hope will evolve into a multi-institute initiative.</p>	
8:30 a.m.	12:00 p.m.	<p>INVITATION ONLY Pre-Conference Workshop: Infrastructure Systems—Infrastructure Management</p> <p><i>Konstantinos Triantis, NSF</i> <i>Alexandra Medina-Borja, NSF</i></p> <p>This workshop is intended to test an evaluation model for science investments in infrastructure management that identifies societal needs, enabling technologies and knowledge creation for civil infrastructure systems. This workshop is by invitation only. CMMI Program Directors are welcome to attend and observe the deliberations.</p>	Room 308

SCHEDULE

Monday, July 9, 2012

Begin Time	End Time	Event	Location
8:30 a.m.	12:00 p.m.	INVITATION ONLY Pre-Conference Session: Task Force for Operations Research (OR) as a Catalyst for National Academy of Engineering (NAE) Grand Challenges <i>Michael Fu, NSF</i> <i>Suvrajeet Sen, University of Southern California</i> <p>Over the past several years, a group of leading thinkers from around the world have come together under the auspices of the NAE to identify some grand challenges for engineering. These challenges, broadly classified under the themes of sustainability, security, human health, and the joy of living, identify a few key areas with the potential to reinvent our way of life. The role of the proposed Task Force is to identify new OR directions that will enable the NAE Grand Challenge domains to leverage new OR ideas into their research. In this sense, the proposed effort will identify OR challenges with an eye towards serving as a catalyst for NAE Grand Challenges. (This is the first of three planned meetings of the Task Force).</p>	Room 305
8:30 a.m.	12:00 p.m.	Pre-Conference Workshop: Data <i>Clark Cooper, NSF</i> <i>Eduardo Misawa, NSF</i> <p>NSF has several recent activities that focus on support of both the research and the infrastructure that are needed to advance science and engineering based on exploration of data beyond the status-quo in our research communities. These initiatives involve modeling, simulation, analysis, visualization, and management of data that may be large scale and/or diverse and heterogeneous. Some activities that have already been announced are Computational and Data-enabled Science and Engineering (CDS&E), BIGDATA, Data Infrastructure Building Blocks (DIBBS), IGERT-CIF21 and DataWay charrette.</p> <p>This workshop will be a forum for discussion among CMMI's research community members about the relevance to their research of these data initiatives. The workshop also will include a discussion about support for future activities, such as the necessary data infrastructure.</p> <p>The workshop is open to all attendees of the CMMI Engineering Research and Innovation Conference. Workshop participants are encouraged to familiarize themselves with relevant materials such as</p>	Room 310

SCHEDULE

Monday, July 9, 2012

Begin Time	End Time	Event	Location
8:30 a.m.	12:00 p.m.	NSF's data sharing and data management requirements and many complementary data-related publications, including: <i>The Fourth Paradigm: Data Intensive Scientific Discovery</i> (Tony Hey, et al.); <i>Long-Lived Digital Data Collections: Enabling Research and Education in the 21st Century</i> , the National Science Board report on data collections, (http://www.nsf.gov/pubs/2005/nsb0540/nsb0540.pdf); and magazines with special issues on data such as <i>Nature</i> (September 4, 2008 issue) and <i>Science</i> (February 2011 issue).	
8:30 a.m.	12:00 p.m.	Poster Session 1	Exhibit Hall AB
8:30 a.m.	12:00 p.m.	NSF Program Directors' Office Hours (Office Hours are by appointment only)	
12:00 p.m.	12:45 p.m.	Opening Plenary Session—Welcome <i>Steven H. McKnight, Division Director, CMMI, NSF</i>	Ballroom
		Keynote Speech—The Global and Research Landscape: Implications for Higher Education <i>Joseph E. Aoun, President, Northeastern University and Chair, American Council of Education (ACE)</i>	
1:00 p.m.	1:30 p.m.	CMMI Division Cluster Overviews The CMMI Division is organized into four program clusters, each containing four to six research programs. Each of the clusters will present an overview of research, initiatives, and activities associated with the cluster to provide a context for the individual program presentations that follow.	
		Advanced Manufacturing	Room 304
		<ul style="list-style-type: none"> Manufacturing Machines and Equipment <i>George Hazelrigg, NSF</i> Manufacturing Enterprise Systems <i>Russell Barton, NSF</i> 	

SCHEDULE

Monday, July 9, 2012

Begin Time	End Time	Event	Location
1:00 p.m.	1:30 p.m.	<ul style="list-style-type: none"> Materials Processing and Manufacturing <i>Mary Toney, NSF</i> NanoManufacturing <i>Bruce Kramer, NSF</i> <p>The Advanced Manufacturing cluster supports fundamental research leading to transformative advances in manufacturing and building technologies across size scales from nanometers to kilometers, with emphases on efficiency, economy, and minimal environmental footprint. Research is supported to develop predictive and real-time models; novel experimental methods for manufacturing and assembly of macro, micro, and nanoscale devices and systems; and advanced sensing and control techniques for manufacturing processes.</p>	
		<p>Mechanics and Engineering Materials</p> <ul style="list-style-type: none"> Geomechanics and Geomaterials <i>Richard Fragaszy, NSF</i> Structural Materials and Mechanics <i>Yick Grace Hsuan, NSF</i> Materials and Surface Engineering <i>Clark Cooper, NSF</i> Mechanics of Materials <i>Martin Dunn, NSF</i> Biomechanics and Mechanobiology <i>Dennis Carter, NSF</i> <p>The Mechanics and Engineering Materials cluster supports fundamental research aimed at advances in the transformation and use of engineering materials efficiently, economically, and sustainably. The cluster's programs support research topics relating to materials that span multiple time and length scales.</p>	Room 312
		<p>Resilient and Sustainable Infrastructures</p> <ul style="list-style-type: none"> Civil Infrastructure Systems <i>Konstantinos Triantis, NSF</i> Geotechnical Engineering <i>Richard Fragaszy, NSF</i> Hazard Mitigation and Structural Engineering <i>Kishor Mehta, NSF</i> 	Room 311

SCHEDULE

Monday, July 9, 2012

Begin Time	End Time	Event	Location
1:00 p.m.	1:30 p.m.	<ul style="list-style-type: none"> Infrastructure Management and Extreme Events <i>Dennis Wenger, NSF</i> Network for Earthquake Engineering Simulation Research and Operations <i>Joy Pauschke, NSF</i> <p>The Resilient and Sustainable Infrastructures cluster supports research to advance fundamental knowledge and innovation for resilient and sustainable civil infrastructure and distributed infrastructure networks. The cluster funds research on geotechnical, structural, and earthquake engineering; distributed infrastructure systems management; and response to hazardous events. Research on social, behavioral, and economic issues related to natural and technological hazards is also invited. The cluster plays a major role in the National Earthquake Hazards Reduction Program (NEHRP), created by Congress in the Earthquake Hazards Reduction Act of 1977.</p>	
		<p>Systems Engineering and Design</p> <ul style="list-style-type: none"> Control Systems <i>George Chiu, NSF</i> Dynamical Systems <i>Eduardo Misawa, NSF</i> Engineering and Systems Design <i>Christina Bloebaum, NSF</i> Operations Research <i>Michael Fu, NSF</i> Service Enterprise Systems <i>Russell Barton, NSF</i> Sensors and Sensing Systems <i>George Hazelrigg, NSF</i> <p>The Systems Engineering and Design cluster supports fundamental research on the decision-making aspects of engineering, including design, control, and optimization as applied at levels ranging from component to enterprise systems. Supported research examples include sensors, sensing, and the use of sensor data in decision-making and control, and extends to service enterprise systems that address healthcare delivery. Support is provided to enable advances in engineering decision-making, optimization and control, and their application to engineered systems.</p>	Room 302

Begin Time	End Time	Event	Location
6:30 p.m.	8:30 p.m.	Networking Reception Please join your colleagues for a “New England Summer” reception on Northeastern’s campus, just a short distance from the John B. Hynes Veterans Memorial Convention Center. Enjoy light refreshments as you network with other conference attendees. Family members are welcome. Selected Program Directors will be meeting Principal Investigators for informal Office Hours during the reception. These informal Office Hours will still require appointments and will be subject to the same time limits as in formal sessions.	Northeastern University

SCHEDULE

Tuesday, July 10, 2012

Begin Time	End Time	Event	Location
7:30 a.m.	6:00 p.m.	Registration and Information Desk Open	Pre-function Hall A
7:30 a.m.	9:30 a.m.	Poster Session 3	Exhibit Hall AB
9:00 a.m.	9:30 a.m.	Light Morning Refreshments Available	Ballroom Pre-function
9:30 a.m.	3:30 p.m.	Workshop: Internet-Enabled Manufacturing <i>Bruce Kramer, NSF</i> <i>George Adams, Purdue University</i> <i>Karthik Ramani, Purdue University</i> <i>Joseph Beaman, University of Texas at Austin</i> <i>Jian Cao, Northwestern University</i> <i>Kornel Ehmann, Northwestern University</i> <i>Aleksandar Kuzmanovic, Northwestern University</i> <i>Fritz Prinz, Stanford University</i> <i>Sanjay Sarma, Massachusetts Institute of Technology</i> <i>Dawn Tilbury, University of Michigan</i> <i>Paul Wright, University of California, Berkeley</i> <i>Bjoern Hartmann, University of California, Berkeley</i> <p>While the Internet has transformed the world of services and commerce, its impact on manufacturing activity is limited and largely restricted to message and file exchanges. Technologies for which richer tools are available, most notably rapid prototyping and NC machining, suggest that both access to and efficient delivery of manufacturing services can be greatly increased if appropriate tools and protocols can be implemented. Furthermore, there are ongoing opportunities for testing such protocols on the next-generation Internet, if the appropriate architectures can be defined. This workshop will report on preliminary investigations of the current technical limitations of today's Internet and the current culture of manufacturing that may be impeding such progress.</p>	Room 308

SCHEDULE

Tuesday, July 10, 2012

Begin Time	End Time	Event	Location
9:30 a.m.	11:15 a.m.	NSF Program Directors' Office Hours <i>(Office Hours are by appointment only)</i>	
9:30 a.m.	10:30 a.m.	Plenary Session—Town Hall 1: Partnering Across Academia <i>Robin Coger, North Carolina Agricultural and Technical State University</i> <i>Wayne Davis, University of Tennessee, Knoxville</i> <i>Gerald Holder, University of Pittsburgh</i> <i>David Rosowsky, Rensselaer Polytechnic Institute</i> <i>Moderator: Steven H. McKnight, NSF</i> The linkages researchers have forged with colleagues at other institutions have taken many formats. Town Hall moderator and CMMI Director Steven McKnight and engineering deans from universities with NSF Engineering Research Centers will share some of their best practices, provide visions for what partnering across academia should be, and discuss what academics should do to foster and implement a culture of cross-institutional partnership in their own backyards.	Ballroom
10:30 a.m.	11:15 a.m.	Plenary Session—Town Hall 2: Partnering with Industry <i>Charles Buuck, Turner Construction Company</i> <i>Lueny Morell, HP Laboratories</i> <i>Robert Smith, Raytheon Integrated Defense Systems</i> <i>Frank Tempesta, Textron Systems Corporation (retired)</i> <i>Moderator: Simon Pitts, Northeastern University</i> Academia and industry are symbiotically intertwined as universities provide workforce development and basic research while industry provides jobs, opportunities for partnership, and research agendas. This Town Hall plenary will feature industry leaders discussing what they look for in academic partners and ingredients for effective, sustainable partnerships.	Ballroom
11:15 a.m.	11:30 a.m.	Networking Break	Ballroom Pre-function

SCHEDULE

Tuesday, July 10, 2012

Begin Time	End Time	Event	Location
11:30 a.m.	12:15 p.m.	Plenary Session—Keynote 2: Wyss Institute: New Model for Innovation, Collaboration and Technology Translation <i>Donald E. Ingber, Founding Director, Wyss Institute for Biologically Inspired Engineering at Harvard University</i>	Ballroom
12:15 p.m.	1:45 p.m.	Lunch on your Own NSF Program Directors' Office Hours <i>(Office Hours are by appointment only)</i>	
1:00 p.m.	2:30 p.m.	Special Session: Opportunities for Research Collaboration between the OR and Computer Science/Artificial Intelligence (CS/AI) Communities <i>Michael Fu, NSF</i> <i>John Hooker, Carnegie Mellon University</i> <i>Warren Powell, Princeton University</i> This session will discuss means for enabling research collaboration between the OR and CS/AI communities, both of which use many of the same methodologies, but often speak different technical languages and have completely separate conferences. At least two specific settings will be discussed. John Hooker will speak about the highly successful integration of the two communities in research on constraint optimization. Warren Powell will report out on a recent NSF workshop at Rutgers University (May 31–June 1), titled “A Conversation between Computer Science and Operations Research on Stochastic Optimization,” which focused on connections between stochastic programming, simulation, approximate dynamic programming, and reinforcement learning. The session will provide ample time for feedback from participants for the purpose of converting ideas into concrete steps going forward, (e.g., follow-up workshops, summer schools, and joint sessions at conferences).	Room 305
1:45 p.m.	3:15 p.m.	NSF Program Directors' Office Hours <i>(Office Hours are by appointment only)</i>	

SCHEDULE

Tuesday, July 10, 2012

Begin Time	End Time	Event	Location
1:45 p.m.	2:30 p.m.	Parallel Sessions	
		Office of Inspector General (OIG) Ethics/ Research Integrity	Room 311
		<i>James Kroll, NSF</i>	
		Within NSF, OIG investigates allegations of wrongdoing involving organizations or individuals that receive awards from NSF. It is important for grantees to understand what actions violate ethical norms or established rules governing federally-funded research, and be aware of the potential consequences of committing such violations. Issues critical to NSF include, but are not limited to, research misconduct, fraud, conflicts of interest, human subject protections and animal welfare concerns, peer review violations, duplicative research, retaliation, and student/mentor relationships. James Kroll, Head of Administrative Investigations in OIG, will highlight the ethical expectations NSF places on its grantees and present numerous case studies regarding violations that OIG has investigated.	
		Systems Challenges and Opportunities in Civil Infrastructures	Room 301
		<i>Konstantinos Triantis, NSF</i>	
		The Civil Infrastructure Systems (CIS) program supports research leading to the engineering of infrastructure systems for resilience and sustainability without excluding other key performance issues. Research areas include intra- and inter-physical, information and behavioral dependencies of infrastructure systems, infrastructure management, construction engineering, and transportation systems. This session will focus on challenges and opportunities that exist in approaching infrastructure, construction engineering, and transportation, with a systems perspective.	
		New Initiatives in the Control Systems (CS) Program	Room 306
		<i>George Chiu, NSF</i>	
		The CS program supports innovative research on control theory and control technology driven by real-life applications. The program emphasis is on paradigm-shifting ideas for control strategies that may be inspired by nature, unconventional applications, and the combined

Begin Time	End Time	Event	Location
1:45 p.m.	2:30 p.m.	<p>engineering broadly to the public is one key component of the NSF review criteria pertaining to Broader Impacts. This session will explore ways in which partnerships with television and movies can be most effectively leveraged.</p> <p>When Good Design Goes Bad</p> <p><i>Christina Bloebaum, NSF</i> <i>George Hazelrigg, NSF</i></p> <p>Many design methods and tools that are used heavily in industry and taught in our classrooms evolved over time in an ad hoc manner to accomplish very specific tasks. Research in the engineering design community and elsewhere (such as economics) has demonstrated the fallacies associated with many of these well-known and highly-used methods and tools. This session will explore several such methods and tools, pointing out the theoretical reasons why they are fundamentally flawed, and will provide an opportunity to discuss the responsibilities of researchers and practitioners in their use. Examples of problematic methods/tools include the House of Quality (which can yield substantially different results depending on the users), pair-wise comparisons (which can lead to suboptimal solutions), requirements-based design (which leads to suboptimal designs), and voting strategies (which can lead to choice of the least desirable solution).</p>	Room 310
2:00 p.m.	5:30 p.m.	Scheduled Technical Tours (see pages 31–38 for descriptions)	
2:30 p.m.	3:15 p.m.	<p>Plenary Session—Town Hall 3: Partnering for Society</p> <p><i>Gregory Bialecki, Commonwealth of Massachusetts</i> <i>Vincent Chun, Allied Minds</i> <i>Patrick Larkin, Massachusetts Technology Collaborative</i> <i>Christopher Rojahn, Applied Technology Council</i> <i>Moderator: Melvin Bernstein, Northeastern University</i></p> <p>Partnerships that link state-of-the-art research to societal needs have the potential for the greatest transformative impact. This Town Hall plenary will feature best practices in partnerships that impact society in transformative ways. Panelists will describe examples in entrepreneurship, engineering practice, and government.</p>	Ballroom

SCHEDULE

Tuesday, July 10, 2012

Begin Time	End Time	Event	Location
3:15 p.m.	3:45 p.m.	Networking Break	Exhibit Hall AB
3:15 p.m.	5:45 p.m.	Poster Session 4	Exhibit Hall AB
6:30 p.m.	9:00 p.m.	Networking Reception	Boston Museum of Science

Please join your colleagues at one of Boston's favorite venues, the Museum of Science, for an evening of networking and light refreshments. Check out the exhibits, including special presentations in the Theater of Electricity. Welcoming remarks will be provided by Helen Greiner, Museum of Science Trustee and co-Founder, iRobot.

SCHEDULE

Wednesday, July 11, 2012

Begin Time	End Time	Event	Location
7:30 a.m.	4:30 p.m.	Registration and Information Desk Open	Pre-function Hall A
7:30 a.m.	8:00 a.m.	Light Morning Refreshments Available	Boylston Hallway (Third Level)
8:00 a.m.	10:00 a.m.	NSF Program Directors' Office Hours <i>(Office Hours are by appointment only)</i>	
8:00 a.m.	10:30 a.m.	Workshop: Research Program Development <i>George Hazelrigg, NSF</i> This workshop will cover many topics that are crucial to the planning, proposal writing, and development of a sound academic research program. The subject matter will be appropriate for graduate students and young faculty about to begin a career involving academic research, and for more senior faculty who would benefit from an update on how one interfaces with NSF. The workshop will be presented by George Hazelrigg, who has overseen the review of more than 5,000 proposals and who has conducted several hundred panel reviews during his 29-year tenure at NSF. He will present many key lessons learned from his experience.	Room 304
8:00 a.m.	9:00 a.m.	Parallel Sessions	
		Design's Role in the U.S. Economy <i>Katie Whitefoot, National Academy of Engineering</i> <i>W. Ross Morrow, Iowa State University</i> The importance of manufacturing in renewing the strength of the U.S. economy in this century is now widely acknowledged. If the U.S. is to remain a world leader, however, our historical strength in the innovative design of new products, services, and systems cannot be put aside. With a new program in Manufacturing, Design, and Innovation, NAE has recognized the importance of the coupling of design and manufacturing. This session will focus on future design leadership in the U.S., with a discussion of what we currently know, don't know, and need to know about the role design plays in the U.S. economy.	Room 302

SCHEDULE

Wednesday, July 11, 2012

Begin Time	End Time	Event	Location
8:00 a.m.	9:00 a.m.	Industry/University Research—Grant Opportunity for Academic Liaison with Industry (GOALI) and Small Business Innovation Research (SBIR) Programs <i>Donald Senich, NSF</i> <i>Allison Flatau, University of Maryland (GOALI Award Academic PI)</i> <i>Dan J. Clingman (Tentative), Boeing (GOALI Award Industry PI)</i> <i>David B. Spencer, wTe Corp (SBIR Award Phase I and II PI)</i> <p>Over the past decade or so, the nature of research in large industrial labs has been going through a transition. Market pressures have forced American corporations to downsize or export a share of their research. During the same period of time, the partnership opportunities for small high-tech, high-risk research companies has grown, in no small measure, due to the Federal SBIR program. Therefore, without healthy interaction with large and small industries, research in the academic sector may become somewhat esoteric. This session will provide a glimpse of successful industry/university research and small business models for future research efforts.</p>	Room 306
		Effectively Integrating Research and Education <i>Jo Culbertson, NSF</i> <p>A deeper public understanding of engineering may augment public support for fundamental research and contribute to the development of the future engineering workforce. CMMI awardees engage in a variety of outreach and dissemination activities that advance public understanding and effectively integrate research and education. This panel discussion will highlight some of these experiences and the challenges and opportunities that researchers face.</p>	Room 311
		New Initiatives in Materials <i>Clark Cooper, NSF</i> <i>Martin Dunn, NSF</i> <i>Yick Grace Hsuan, NSF</i> <i>Mary Toney, NSF</i> <p>In 2011, as part of the Advanced Manufacturing partnership, President Obama announced the Materials Genome Initiative (MGI: more information at http://go.usa.gov/d8j), an ambitious plan to double</p>	Room 312

SCHEDULE

Wednesday, July 11, 2012

Begin Time	End Time	Event	Location
8:00 a.m.	9:00 a.m.	the speed with which we discover, develop, and manufacture new materials. NSF—and CMMI specifically—play an important role in the MGI, and in materials-related research more generally. In FY2012, NSF's initial foray into MGI was through a DCL titled, "Designing Materials to Revolutionize and Engineer our Future" (DMREF: see http://www.nsf.gov/pubs/2011/nsf11089/nsf11089.jsp), which focused on the basic research aspects of MGI. This session will describe ongoing and upcoming activities in materials-related research, highlighting collaborations with NSF's Division of Materials Research as well as activities within CMMI.	
9:00 a.m.	10:00 a.m.	<p>Parallel Sessions</p> <p>CyberInfrastructure Framework for the 21st Century Initiative (CIF21)</p> <p><i>Eduardo Misawa, NSF</i> <i>Clark Cooper, NSF</i></p> <p>CIF21 is a portfolio of activities to provide integrated cyber resources that will enable new multidisciplinary research opportunities in all science and engineering fields by leveraging ongoing investments and using common approaches and components.</p> <p>Researchers in all fields of science and engineering are being challenged in two key directions. The first challenge is to push beyond the current boundaries of knowledge to provide ever-deeper insights through fundamental disciplinary research by addressing increasingly complex questions, which often requires extremely sophisticated integration of theoretical, experimental, observational, and simulation and modeling results. These efforts, which have relied heavily on observing platforms and other data collection efforts, computing facilities, software, advanced networking, analytics, visualization, and models, have led to important breakthroughs in all areas of science and engineering and represent a very strong bottom-up approach to the necessary research infrastructure.</p> <p>The second, and more extensive, challenge is to synthesize these fundamental ground breaking efforts across multiple fields to transform scientific research into an endeavor that integrates the deep knowledge and research capabilities developed within the universities, industry, and government labs. Individuals, teams, and communities need to be able work together; likewise, instruments, facilities</p>	Room 312

SCHEDULE

Wednesday, July 11, 2012

Begin Time	End Time	Event	Location
9:00 a.m.	10:00 a.m.	<p>(including MREFCs), datasets, and cyber-services must be integrated from the group to campus to national scale. One can imagine secure, geographically distributed infrastructure components including advanced computing facilities, scientific instruments, software environments, advanced networks, data storage capabilities, and the critically important human capital and expertise. Greater understanding is also needed of how scientific and research communities will evolve in the presence of new cyberinfrastructure. This session will describe the funding opportunities available under CIF21 and their relevance to the CMMI research community.</p> <p>NSF Partnerships with a Focus on Transfer of Basic Research Discoveries</p> <p><i>Donald Senich, NSF</i> <i>M. Selim Unlu, Boston University (AIR)</i> <i>Emel Bulat, Northeastern University (I-Corps)</i> <i>Thomas J. Dudley, Boston University (IUCRC)</i></p> <p>America's prosperity has originated in part from the ability to economically capitalize on ground-breaking discoveries from science and engineering research. Simultaneously, a knowledgeable, creative workforce has maintained the country's leadership in crucial areas of technology. Strong partnerships between academia, government, and the private sector enable the results of research to lead to novel products and services that provide new value. This session will focus on three successful programs in the innovation process: I-Corps, Accelerating Innovation Research (AIR), and Industry/University Cooperative Research Centers (IUCRC). Without a healthy interaction between all partners, research in the academic sector could become somewhat esoteric. This session will provide a glimpse of successful industry and university models for consideration in future research efforts.</p>	Room 306

SCHEDULE

Wednesday, July 11, 2012

Begin Time	End Time	Event	Location
9:00 a.m.	10:00 a.m.	Vertical Integration of Smart Materials and Structural Systems <i>Martin Dunn, NSF</i> <i>Richard Fragaszy, NSF</i> <i>Yick Grace Hsuan, NSF</i> <i>Kishor Mehta, NSF</i> <i>Joy Pauschke, NSF</i> <p>Research on civil infrastructure materials and structural systems has traditionally been conducted independently without integrative research between these two areas. New research paradigms are needed to accelerate engineering innovations for sustainable life-cycle infrastructure performance through the vertical integration of smart materials and structural systems. The aim of this session is to provide a platform for discussion and exchange of ideas between researchers from two communities: those who are working on advancing smart, sustainable materials for civil infrastructure and those who are working on advancing new and rehabilitated sustainable structural systems for multi-hazard mitigation.</p>	Room 311
		Executing and Implementing Design Research to Strengthen the U.S. Economy <i>Katie Whitefoot, National Academy of Engineering</i> <i>W. Ross Morrow, Iowa State University</i> <p>Institutions of higher learning and Federal funding programs, including CMMI's EDI program, are increasingly focusing on education and research in design science. This session, inspired by a new NAE program in Manufacturing, Design, and Innovation and the recent Design Frontiers Symposium at the University of Michigan, will discuss this growing theme in both research and education and how it can impact the U.S. economy. Key elements of the session will focus on what role Federal agencies play in funding design science research, what the structure of design science research should be, and how research results can be disseminated to industrial practice.</p>	Room 302
10:00 a.m.	10:30 a.m.	Networking Break	Boylston Hallway (Third Level)

SPEAKERS

Keynote Session—Monday, July 9, 2012

Joseph E. Aoun, Ph.D.

President, Northeastern University
Chair, American Council on Education

Joseph E. Aoun, a leader in higher education policy and an internationally renowned scholar in linguistics, is the seventh President of Northeastern University. President Aoun came to Northeastern from the University of Southern California's College of Letters, Arts and Sciences where he was the inaugural holder of the Anna H. Bing Dean's Chair. He received his Ph.D. in linguistics and philosophy from the Massachusetts Institute of Technology (MIT) and advanced degrees from the University of Paris (France) VIII and Saint Joseph University (Beirut, Lebanon).

He is a member of the American Academy of Arts and Sciences, the Chair of the American Council on Education, and was recently named to the Academic Advisory Council for the U.S. Department of Homeland Security. His honors include the Chevalier dans l'Ordre des Palmes Academiques from the French government, and the 2011 Robert A. Muh Award from MIT's School of Humanities, Arts, and Social Sciences.

SPEAKERS

Keynote Session—Tuesday, July 10, 2012

Donald E. Ingber, M.D., Ph.D.

Founding Director, Wyss Institute for Biologically Inspired Engineering at Harvard University

Don Ingber is Founding Director of the Wyss Institute and a leader in the emerging field of biologically inspired engineering. He oversees a multifaceted effort to identify the mechanisms that living organisms use to self-assemble and to apply these design principles to develop advanced materials and devices. Dr. Ingber has made major contributions to cell and tissue engineering, angiogenesis and cancer research, systems biology, and nanobiotechnology. He was the first researcher to recognize that tensegrity architecture (in which a system stabilizes itself mechanically by balancing local compression with continuous tension) is a fundamental principle in the way living organisms are structured at the nanometer scale.

Dr. Ingber has authored more than 300 publications and 40 patents and has received numerous distinctions including the Pritzker Award from the Biomedical Engineering Society, Lifetime Achievement Award from the Society of In Vitro Biology, the Rous-Whipple Award from the American Society for Investigative Pathology, and the Department of Defense Breast Cancer Innovator Award.

TECHNICAL TOURS

The Boston Harbor Cleanup—An Environmental Transformation

This is a unique tour that blends history, politics, and engineering.

Once said to be the dirtiest harbor in America, the Boston Harbor is now part of a state-of-the-art treatment plan for the disposal of wastewater from Boston and its surrounding communities. Boston Harbor consists of an inner and outer harbor encompassing 50 square miles, a shoreline of 180 miles, and 34 harbor islands. The Boston Harbor cleanup is recognized as one of the nation's greatest environmental achievements, with an investment of more than \$4.5 billion in the treatment facilities.

The Boston Harbor tour consists of a 90-minute chartered cruise showing attendees some of the many improvements, including the South Boston Combined Sewer Overflow and Stormwater Tunnel Project, which has made the beaches of North Dorchester Bay the cleanest urban beaches in America. Attendees will also see elements of the Big Dig—including Spectacle Island, which has been capped with dredge spoil from the Central Artery/Ted Williams Tunnel and transformed from a dumpsite into a popular destination in the Boston Harbor Islands National Park. Refreshments will be available for purchase.

The narrated portion of the tour will be led by Bruce Berman, Director of Communications Strategy and Programs for Save the Harbor/Save the Bay, a nonprofit public interest harbor advocacy organization made up of thousands of citizens, as well as scientists and civic, corporate, cultural, and community leaders. Learn more at www.savetheharbor.org.

SCHEDULE

Sunday, July 8, 2012

5:15 p.m.	Depart Marriott Copley Place
5:45 p.m.	Arrive at Waterfront
6:00–7:30 p.m.	Tour through Boston Harbor
7:30–8:00 p.m.	Depart Waterfront and Return to Marriott Copley Place

TECHNICAL TOURS

MIT Media Lab

The MIT Media Lab was founded by Massachusetts Institute of Technology (MIT) Professor Nicholas Negroponte and the late Jerome Wiesner (former Science Advisor to President John F. Kennedy and former President of MIT), who foresaw the coming convergence of computing, publishing, and broadcast, fueled by changes in the communications industry. As this convergence accelerated, it spurred interconnected developments in the unusual range of disciplines that the Lab brought together, including cognition, electronic music, graphic design, video, and holography, as well as work in computation and human-machine interfaces. True to the vision of its founders, today's Media Lab continues to focus on the study, invention, and creative use of digital technologies to enhance the ways that people think, express, and communicate ideas, and explore new scientific frontiers.

The MIT Media Lab applies an unorthodox research approach to envision the impact of emerging technologies on everyday life—technologies that promise to fundamentally transform our most basic notions of human capabilities. Unconstrained by traditional disciplines, Lab designers, engineers, artists, and scientists work atelier-style, conducting more than 350 projects that range from neuroengineering, to how children learn, to developing the city car of the future. Lab researchers foster a unique culture of learning by doing, developing technologies that empower people of all ages, from all walks of life, in all societies, to design and invent new possibilities for themselves and their communities.

Conference attendees participating in this technical tour will have the opportunity to view the interdisciplinary research ongoing in the following groups:

- Biomechatronics
- Mediated Matter
- Molecular Machines
- Personal Robots
- Responsive Environments
- Affective Computing
- Cognitive Machines

SCHEDULE

Monday, July 9, 2012

- 2:45 p.m. Depart from Hynes Convention Center
- 3:00 p.m. Arrive at MIT Media Lab and Tour Facility
- 5:00 p.m. Depart MIT Media Lab and Return to Hynes Convention Center

TECHNICAL TOURS

Green Infrastructure in Action

Restrictions: All participants will be required to provide a government-issued picture identification that includes the participant's birth date and an expiration date (e.g., a valid passport) upon arrival at the Wind Technology Testing Center location.

The Green Infrastructure tour will provide attendees with the opportunity to see two cutting-edge facilities that are addressing sustainability in different fashions.

Genzyme: With core values in innovation, collaboration, transparency, and entrepreneurial spirit, Genzyme Corporation, a Sanofi company and one of the world leaders in biotechnology, is committed to helping patients by developing breakthrough treatments for rare genetic diseases, multiple sclerosis, cardiovascular disease, and endocrine disorders. The Genzyme Center, headquarters for the company, reflects these values through its unique design that brings light and greenery into the building in an environmentally friendly way. In this guided walking tour of the 12-story Genzyme Center of 350,000 square feet, participants will go in depth to see not only the green design of the building (a LEED platinum structure), but how all of the support systems contribute to its success. From the WAREMA blinds, controlled by the location of the sun and the milieu of light, to the cutting-edge control room (where literally any door in the building can be opened and closed), this is a unique opportunity to see modern design and engineering at its finest.

Wind Technology Testing Center: To maintain high levels of reliability and meet international certification standards it is critical to test wind turbine blades. The Large Blade Testing Facility, operated by the Massachusetts Clean Energy Center and the largest of its kind in the world, offers a full range of certification tests for blades up to 90 meters in length. The Wind Technology Testing Center offers a full suite of static and fatigue tests per the IEC61400-23 standard. This tour includes a guided visit to the Center's premises at the deep-water port in Charlestown, MA.

SCHEDULE

Monday, July 9, 2012

2:45 p.m.	Depart Hynes Convention Center
3:00 p.m.	Arrive at Genzyme
3:00–4:00 p.m.	Tour of Genzyme
4:00 p.m.	Depart Genzyme
4:15 p.m.	Arrive at Wind Technology Testing Center
4:15–5:15 p.m.	Tour of Wind Technology Testing Center
5:15 p.m.	Depart Wind Technology Testing Center and Return to Hynes Convention Center

TECHNICAL TOURS

Working with Small Business—Success Stories

The Working with Small Business tour will showcase some of the exciting developments at two Massachusetts small businesses: Agiltron and NeuroLogica. These firms have leveraged academic relationships that are highlights of both companies' success stories.

Agiltron, Inc.: Participants in this tour will gain insight into a small technology business product manufacturing and R&D facility. Agiltron, a manufacturer of photonic systems and components for the mass market, is leader in the markets for optical switches, high-power optical components, variable optical attenuators, time controls and optical polarization, molded infrared lenses, infrared detectors, and Raman spectrometers. With a world-class team of serial entrepreneurs and veteran engineers, the company developed a unique ability to produce unmatched solutions in combination with cost-effective manufacturing and currently holds over 40 issued or pending U.S. patents for its products. The visit to Agiltron will include a tour of their company headquarters in Woburn, MA, including the touring of facilities dedicated to electro-optic device assembly, optical spectrometer manufacturing, infrared detector processing and testing, and nano-materials processing. The tour will be rounded off by a presentation on Agiltron's venture and its successes.

NeuroLogica Corporation: Located in Danvers, MA, NeuroLogica is a producer of innovative medical imaging equipment for private practices and healthcare facilities worldwide. Established in 2004, their expertise ranges from conceiving, designing, engineering, manufacturing, and marketing of imaging systems including ultrasound, PET, CT, MRI, and radiation therapy. Launched in 2005, one of their renowned products is the CereTom system, which is in use in emergency rooms, stroke centers, clinics, intensive care units, and neurosurgical operating rooms. One of the company's most recent developments in portable computed tomography imaging is the BodyTom, a full-body, portable, 32-slice CT that claims an impressive 85 cm gantry and 60 cm field of view. The tour of NeuroLogica's facilities will showcase state-of-the-art product manufacturing from the small business perspective, incorporating disciplines such as materials science, product design, manufacturing engineering, and beyond. Product demos in to-scale hospital operating rooms and patient suites will demonstrate the issues that must be considered during the product development process, while production facilities will show the inner workings of complex medical devices. Collaboration with academia, one of NeuroLogica's strengths, will also be discussed.

Raytheon Integrated Air Defense Center—An Advanced Design and Production Facility

Restrictions: U.S. citizens only; please bring your passport to the tour

Raytheon Integrated Defense Systems invites attendees to tour the Raytheon Integrated Air Defense Center (IADC) in Andover, MA. The Raytheon IADC is an award-winning integrated design and production center encompassing 1.7 million square feet. Attendees will tour capabilities ranging from circuit card assembly through hardware integration.

Raytheon is a technology and innovation leader specializing in defense, homeland security, and other government markets throughout the world. Raytheon provides products and services to customers in 80 nations with 71,000 employees worldwide and \$25 billion in 2011 sales.

SCHEDULE

Tuesday, July 10, 2012

2:00 p.m.	Depart from Hynes Convention Center
2:25 p.m.	Arrive at Raytheon
2:30–5:00 p.m.	Tour of Raytheon Facilities
5:00–5:30 p.m.	Depart from Raytheon and Return to Hynes Convention Center

Wednesday, July 11, 2012

1:00 p.m.	Depart from Hynes Convention Center
1:25 p.m.	Arrive at Raytheon
1:30–4:00 p.m.	Tour of Raytheon Facilities
4:00–4:30 p.m.	Depart from Raytheon and Return to Hynes Convention Center

TECHNICAL TOURS

The Future of Manufacturing: Academic-Industrial Alignment

Restrictions: No photography will be permitted during the tour

The Future of Manufacturing tour will examine where academia is applying its strengths in support of industrial innovation. Attendees will tour two highly innovative facilities, the Fraunhofer Center for Manufacturing Innovation and the Center for High-rate Nanomanufacturing.

The Fraunhofer Center for Manufacturing Innovation, in collaboration with Boston University (BU), performs government- and industry-funded research and development, and provides advanced technological and engineering solutions to both local and international companies. By bringing together faculty, students, and a full-time engineering staff, the Center goes beyond traditional academic research to develop and deploy complete technology solutions. The Center has extensive experience in the development of instruments, devices, and manufacturing automation systems for a variety of industries, including biotech/biomedical, photonics, semiconductor, and renewable energy. In addition, the Center has in-house biochemistry expertise and often takes on projects that are at the intersection of engineering and life sciences. Whether developing a new bio-assay for a molecular diagnostics chip, a first-of-a-kind medical device, or a next-generation turnkey automation system, the Center takes each project all the way to deployment. Part of the Fraunhofer Gesellschaft, Europe's largest nonprofit R&D organization with 70 institutes and over 18,000 employees worldwide, Fraunhofer performs its own preliminary research as well as being a valuable partner to industry and other research institutes and universities. Fraunhofer's clients include Fortune 500 companies all the way to small start-ups, as well as a number of U.S. and European government agencies. In this tour you will get to see some of the numerous labs on the Fraunhofer-BU premises and learn more about its current research initiatives in advanced manufacturing engineering research, development, and process design.

The visit to the NSF-funded Nanoscale Science and Engineering Center for High-rate Nanomanufacturing (CHN) at Northeastern University (NU) includes a guided tour of the NSF Center for Nano and Micro-Contamination Control and the George J. Kostas Nanoscale Technology and Manufacturing Research Center. Dr. Ahmed Busnaina, CHN Director, and Dr. Siva Somu, CHN Research Scientist & Technology Development Manager, will be talking about the research falling into four categories: large-scale directed assembly and transfer research, applications and products, environmental health and safety research, and regulatory and ethical research. Participants in this tour will also learn about the main goals of the Center's research, including the closing of the gap between nanoscale science research and the creation of commercial products; the developing of processes and tools that will enable high-rate/high-volume, bottom-up, nanoscale directed assembly of nanoelements and polymer nanostructures; and the delivery of much-needed education in nanomanufacturing, including its environmental, economic, and societal implications, to the current and emerging workforce through partnerships among industry, universities, and K-12 teachers and students.

JOHN B. HYNES VETERANS MEMORIAL CONVENTION CENTER (HYNES CENTER) INFORMATION

Greater Boston Convention and Visitors Bureau Information Desk

For your convenience, during conference hours, the Greater Boston Convention and Visitors Bureau will have an information desk located on level one adjacent to the hallway where the conference registration and information desk will be. A concierge will be stationed at the desk and available to assist conference attendees and guests with information about the Hynes Center, ground transportation, local dining, shopping, and attractions. The desk will be open during the following hours:

Monday, July 9:	8:30 a.m.–6:00 p.m.
Tuesday, July 10:	7:30 a.m.–6:00 p.m.
Wednesday, July 11:	7:30 a.m.–4:00 p.m.

Local Restaurant Information

The Shops at Prudential Center is connected to the Hynes Center and offers a variety of restaurant options, as well as The Terrace Food Court. Please refer to page 44 for a list of local restaurants and page 45 for a map of The Shops at Prudential Center.

First Aid Station

Medical emergencies and injuries should be reported immediately to the First Aid Station which is located on level one of the Hynes Center, in the main lobby between the Prudential Plaza entrance and the Boylston Street entrance. If an emergency arises and you are unable to report to the First Aid Station, please dial the First Aid Office at extension “2240” from any in-house courtesy phone. The First Aid Office can also be reached from an outside phone at 617-954-2240. A First Aid Station nurse will be on duty during the specified hours listed below:

Monday, July 9:	11:00 a.m.–6:00 p.m.
Tuesday, July 10:	8:00 a.m.–6:00 p.m.
Wednesday, July 11:	7:00 a.m.–2:00 p.m.

Nonsmoking Facility

The Hynes Center is committed to providing a smoke-free environment for visitors. Smoking is not allowed in the building at any time. Designated smoking areas are located outside the building. Please inquire at the information desk for the location of areas where smoking is permitted.

ATM

Guests will find ATMs on level zero of the Hynes Center inside both the Boylston Street and Prudential Street entrances.

JOHN B. HYNES VETERANS MEMORIAL CONVENTION CENTER (HYNES CENTER) INFORMATION

FedEx Office

The FedEx Office is located on level one of the Hynes Center, in the main lobby between the Prudential Plaza entrance and the Boylston Street entrance. The hours of operation are 9:00 a.m.–5:00 p.m., Monday through Friday. Services include copying and digital printing, document production, supplies, computer services, pack and ship options, and fax services. The FedEx Office can be reached by calling 617-954-2725.

American with Disabilities Act (ADA)

The Hynes Center strives to meet the needs of all its patrons. All areas are ADA accessible. Elevators are located on each level, and a limited number of wheelchairs are available at the First Aid Station at no charge. Special hearing devices are also available upon request at the conference registration and information desk.

Wireless Internet

Complimentary wireless Internet is available throughout the Hynes Center.

Transportation

- **Technical Tour Transportation**

All technical tours will depart and return from the Hynes Center. The loading/waiting area for the technical tours is located on level zero outside the Boylston Street entrance. The tour buses will leave promptly; please arrive *at least* 15 minutes before your tour is scheduled to begin to check in and board the bus.

- **Reception Transportation**

Transportation will be provided to both the reception at Northeastern University on Monday, July 9, and the reception at the Boston Museum of Science on Tuesday, July 10. Shuttle buses will depart and return from the Boston Marriott Copley Place. The loading/waiting area for the shuttles is located outside the hotel lobby on Huntington Avenue. Shuttles will run continuously for the duration of both events.

THE SHOPS AT PRUDENTIAL CENTER RESTAURANT LIST

Eatery

Dunkin' Donuts	Hynes Court
Godiva	Boylston Arcade
Pinkberry	Fashion Court
Teavana	Back Bay Arcade
Truffles	Boylston Arcade

Getting Around - The Shops at Prudential Center

K-12 OUTREACH PROGRAM

The vision for the K-12 Outreach Program is to provide appropriate means for engagement of a variety of constituencies along the K-12 spectrum.

STEM Sunday

Audience: Elementary and middle school children and families; open to conference participants, participants in science, technology, engineering, and mathematics (STEM) programs at Northeastern University, and the local community

Where: Northeastern University's main campus

When: Sunday, July 8, 2012, 9:30 a.m.–12:30 p.m.

Children and families will engage in variety of activities tied to the research areas of the conference. University graduate students and undergraduate students, in addition to partner teachers and organizations, will staff the various activities. Children will have a “passport” of all activities represented that will be “stamped” upon completion of each activity station. In addition, all attendees will have the opportunity to engage in at least two 15- to 20-minute “performances/presentations.” All participants will receive additional information regarding STEM family activities available across the city in addition to a selection of handouts regarding academic pathways/careers in engineering.

Day at the Conference for Local High School and Community College Students and Teachers

Audience: High school and community college students and teachers, chosen from current participants in and alumni of Research Experiences for Undergraduates (REU), Research Experiences for Teachers (RET), and Young Scholars Programs

Where: John B. Hynes Veterans Memorial Convention Center

When: Monday, July 9, 2012

Participants will engage in an introductory session and have specific conference sessions identified for participation. They will meet at lunch for roundtable discussion and again at the end of the session day. Continued feedback will be solicited from both cohorts after the conference.

GRADUATE STUDENT PROGRAM

The vision for the graduate student program is to give students both tools and opportunities to build their future career network. Graduate students chosen for this year's conference fellowships were selected from an extremely accomplished pool of over 700 applicants and represent an excellent cross-section of science, technology, engineering, and mathematics (STEM) innovators. The graduate students will participate in the overall conference as well as their own program, which is divided into three key pieces: a Sunday Boot Camp focused on technical communication, a Monday morning panel series looking at careers in academia and industry, and a student-oriented poster cluster on Tuesday afternoon in which students present a poster on the research topic of their choice.

Sunday Boot Camp: What We Talk about When We Talk about Work: A Boot Camp for Tomorrow's Professional

Do I even have any intellectual property? If so, what should I present to my colleagues and when? When I present it to them, what's the best way to tell the story so my audience isn't bored? And what do I say to the friend of a friend who asks me what I do? What about the campus newspaper reporter?

This full-day "Boot Camp" offers attendees an opportunity to delve into several areas of scientific communication that aren't part of the core STEM graduate program, yet are critical for success in any field. Each topic will be taught by experts in the field, in a 2-hour brief that allows participants to get a solid understanding of best practices to incorporate professionally. At the end of the workshop, attendees will be better prepared to present their work to others (both within and outside their discipline) in a more disciplined, informative, and ultimately more effective manner.

- **Intellectual Property**
Michael Bunis, Partner, Choate Hall and Stewart LLP
- **Technical Presentation Skills**
Michael Alley, Associate Professor of Engineering Communication, Penn State University
- **Talking to the Media and the Public**
Carol Morton, Freelance Health/Science Journalist
Karen Weintraub, Freelance Science/Health Journalist

Monday Panel Sessions: Academic Career Paths and Entrepreneurial Career Paths

These sessions, offered before the formal start of the conference, will allow graduate students to engage with representatives from academia and entrepreneurship. Students will hear about the reality of both of these paths and have the opportunity to ask questions in an informal setting. Academics will be principally assistant professors from local universities, who can speak to some of the opportunities and challenges they have experienced. Entrepreneurs will be alumni of MassChallenge, a program which provides seed funding and support for novice start-ups.

STUDENT POSTER SESSION SCHEDULE

Tuesday Graduate Student Poster Cluster

All conference attendees are encouraged to visit the graduate student poster cluster during Poster Session 4 on Tuesday afternoon from 3:15 p.m. to 5:45 p.m. This will give greater exposure to the students and provide them with enhanced opportunities to discuss their research interests and career goals with established engineering professionals. The student poster presenters are listed below in alphabetical order along with the corresponding poster location. Please refer to the accompanying map for the poster session layout.

A

Ayman AbdelRahman, University of South Carolina **A1**

Lamb Waves Energy & Power Transfer between Structure and Bonded Piezoelectric Wafer Active Sensors for Structural Health Monitoring

Phillip Ahn, Northwestern University **A2**

High Contrast Evanescent Field Detection Using an Ultrasonic Heterodyne Near-Field Scanning Optical Microscopy

Syedhamidreza Alaie, University of New Mexico **A3**

Phonon Manipulation with Nanoscale Metamaterials

Ala' Al-Azizi, The Pennsylvania State University **A4**

Understanding and Improving Tribological Properties of Diamond-Like Carbon

Aboelkasim Ali, Michigan Technological University **A5**

Micromechanical Modeling of Asphalt Pavement Fatigue Cracking Using eXtended Finite Element Method (XFEM)

Bryan Allison, University of Florida **A6**

Mechanistic Modeling of Fatigue Life Prediction in High Precision Ball Bearings

William Aquite, University of Wisconsin, Madison **A7**

Micropelletization Using Rayleigh Disturbances

Luis G. Arboleda, Northwestern University **A8**

Condition Monitoring of Urban Infrastructure: Time Dependent Effects on Top-down Excavations

Andrea Arena, Clarkson University **A9**

Efficient Reduced-Order Models for Nonlinear Aeroelastic Prediction in Long-Span Suspension Bridges

David Argudo, University of Pennsylvania **A10**

The Effect of Solution Electrostatics on Plectonemic DNA

STUDENT POSTER SESSION SCHEDULE

Ingrid Arocho, North Carolina State University **A11**
The Impact of Construction Projects and Activities on Emissions

Tugba Arsava, University of Massachusetts, Lowell **A12**
Impact of Providing Real-Time Traffic Information on Emergency Evacuation Efficiency – An Empirical Study Based on Microscopic Traffic Simulation

Mohammad-Amin Asareh, Missouri University of Science and Technology **A13**
Coupled Aero-Elastic Seismic Simulations for Wind Turbines

Reza Avazmohammadi, University of Pennsylvania **A14**
Tangent Second-order Estimates for the Large-strain, Macroscopic Response of Particle-reinforced Elastomers

Esam Aziz, Michigan State University **A15**
Evaluating Fire Resistance of Steel Girders in Bridges

B

Pouria Bahmani, University of Alabama **A16**
Performance-Based Seismic Retrofit Procedure for Soft-Story Woodframe Buildings

Emmanuel Baisie, North Carolina Agricultural & Technical State University **A17**
Framework for Conditioner Design Optimization

Jean Batista Abreu, Johns Hopkins University **A18**
Structural Response of Oil Storage Tanks Subjected to Elevated Temperatures

Abhimanyu Bhat, University of Texas at Austin **A19**
Electrolytic Infiltration of SLS Manufactured Parts

Sanket Bhat, University of Wisconsin, Madison **A20**
Base-stock Policy for a Manufacturing System with Periodic Demands

Chandrakanth Bolisetti, University at Buffalo, The State University of New York **A21**
Frequency and Time Domain Methods in Numerical Site Response Simulations

Rajdeep Bondade, The University of Texas at Dallas **A22**
Carbon Nanotube Supercapacitor Based On-Chip Auto-Reconfigurable Power Network for Autonomous Wireless Sensor Nodes

Holly Bonstrom, University of Colorado **A23**
Hazard Loss Estimation Using System Reliability

STUDENT POSTER SESSION SCHEDULE

C

Precious Cantu, University of Utah **A24**

Diffraction-unlimited Nano-patterning via Optical Saturable Transitions

Germán Capuano, Georgia Institute of Technology **A25**

Dynamic Shape Functions for Multi-scale Wave Propagation

Brent Chancellor, Lehigh University **A26**

Effect of Ground Motion Selection on the Seismic Response of Self-Centering Concentrically-Braced Frames

Santanu Chandra, University of Notre Dame **A27**

Characterization of Native Valvular Hemodynamics and Side Specific Leaflet Stress in a Normal Aortic Valve – A Fluid Structure Interaction Analysis Approach

Christopher Chaney, Washington State University **A28**

High Performance Marine Craft with Aerodynamic Support

Roland Chen, University of Michigan **A29**

Tissue Cutting Mechanics for Better Needle Biopsy

Tao Cheng, Georgia Institute of Technology **A30**

Algorithms for Automated Operator Visibility and Proximity Hazard Evaluation

Xu Cheng, Northwestern University **A31**

Polymer Nanocomposites: Investigating the Modulus of the Interphase Region

Gabriel Chow, University of Washington **A32**

Mechanical Characterization of Porous Thin Films by Laser-induced Surface Acoustic Waves

Sagar Chowdhury, University of Maryland **A33**

Automated Indirect Manipulation of Cells Using Optical Tweezers

David Christopher, Clemson University **A34**

The Effect of Granular Activated Carbon Pretreatment on Membrane Filtration of Greywater

Ding-Wen Chung, Purdue University **A35**

Virtual Electrochemical Strain Microscopy of Polycrystalline LiCoO₂ Films

Seydou Cisse, North Dakota State University **A36**

Entrapped Cell Permeable Reactive Barrier to Enhance Acid Mine Drainage Remediation

STUDENT POSTER SESSION SCHEDULE

Camila Coria, University of Nevada, Reno

A37

Response of a Full-Scale Seismic Isolated Building During a Shaking Table Test at E-Defense

Mabel Cristina Cuellar Azcarate, University of South Carolina

A38

Collaborative Research: Resilient and Sustainable Engineered Fiber-Reinforced Earthen Masonry for High Wind Regions

D

Yildiz Dak Hazirbaba, Southern Illinois University, Carbondale

A39

Maximum Direction to Geometric Mean Spectral Response Ratios Using Relevance Vector Machines

Charlotte de Vries, The Pennsylvania State University

A40

Preventing Disproportionate Disaccommodation when Designing for Human Variability

Carolyn Desrochers, Villanova University

A41

Repurposing Coal Combustion Fly Ash (CCFA) Waste Materials into Sustainable Construction Products

Anna Domask, The Pennsylvania State University

A42

Novel Contact Materials and Innovative Switch Testing Device for RF Ohmic Contact Switches

Baiping Dong, Lehigh University

A43

Real-time Hybrid Simulation and Performance Evaluation of a Structure with Large-scale Nonlinear Viscous Dampers

Li Dong, University of Alabama at Birmingham

A44

Composite Structural Insulated Panels (CSIPs) for Hazards Resistant Structures

Ke Du, Stevens Institute of Technology

A45

Nanopatterning of Disconnected Metal Nanostructures on PDMS Substrates by Using Free Standing Film as Stencil Lithography Mask

Li Du, The University of Akron

A46

Parallel Sensing of Metallic Wear Debris in Lubricants using Undersampling Data Processing

Ping Du, Boston University

A47

Viscoelastic Characterization and Modeling of PDMS Micropillars for Cellular Force Measurement Applications

E

Hamid Ebrahimi, Northeastern University

A48

Performance and Failure of Honeycomb Sandwich Panels Subjected to Complex Dynamic Loading

STUDENT POSTER SESSION SCHEDULE

Alain El Howayek, Purdue University

A49

Characterization, Rheology and Microstructure of Laponite Suspensions

Serkan Erbis, Northeastern University

A50

Modeling Approaches for Sustainable Capacity Expansion Planning

Sebastian Espinoza, Northeastern University

A51

Recycling Infrastructure for Nano Enabled Lithium Ion Batteries

Allen Eyler, Washington State University

A52

Novel Wetting Behavior and Adhesion Properties of Graphitic Nanofiber-Modified Epoxy Resins with Fabric Reinforcements

F

Samira Faegh, Northeastern University

A53

A Self-Sensing MicroCantilever Biosensor for Detection of Ultrasmall Adsorbed Biological Species

Habib Fathi, Georgia Institute of Technology

A54

A Videogrammetric Framework for Construction Site Surveying: Estimation, Documentation, and Archiving

Pengzhan Fei, The University of Akron

A55

Shape Memory Behavior of Side-Chain Crystalline Polymers

Xiaofan Fei, Georgia Institute of Technology

A56

Simulating the Detailed Design Process: Coordination and Communication Between Design Teams

Erica Fischer, Purdue University

A57

Experimental and Numerical Evaluation of Composite Floor Slabs under Fire

Robert Fleming, University of Arkansas

A58

Functional Surface Engineering for Surface Wetting Modifications

G

Sai Ganapuram, University of Akron

A59

Cracking in Concrete Bridge Decks: Governing Factors and Quantification

Arnab Ganguly, Purdue University

A60

Accelerating Pharmaceutical Manufacturing through Physics-based Modeling

STUDENT POSTER SESSION SCHEDULE

Andre Garcia, Northwestern University Nature's Defensive Nanostructures: Deformation and Failure of Bioinspired Diatom Glass Spines	A61
Jose Garcia Capella, University of Puerto Rico at Mayaguez Structure and Properties of Clathrate Materials	A62
Yunlong Geng, University of Nebraska, Lincoln Non-conventional Ways to Obtain L10-Structure Hard Magnetic FeNi	A63
Amy Getchell, University of New Hampshire NHDOT Geotechnical Test Embankment on Soft Marine Clay	A64
Amir Ghavibazoo, North Dakota State University Fundamental Characterization of Mechanism of Interaction between Crumb Rubber and Asphalt	A65
Masoud Gheisari, Georgia Institute of Technology An Ambient Intelligent Environment for Accessing Building Information through a Mobile Augmented Reality Approach	A66
Arthur Graziano, University of Florida Surface Functionalization by Magnetic Field Assisted Finishing	A67
Cameron Gross, Northwestern University Enhanced Fire Resistance of Steels by Secondary Carbide Strengthening	A68
Peiqiu Guan, University at Buffalo, The State University of New York Hazard Prevention by Public and Private Partnership	A69
Feng Guo, The Pennsylvania State University Droplet Microfluidic Platform for High-throughput Bioassay	A70
Akshay Gupta, Georgia Institute of Technology Mixed Integer Bilinear Programming and Pooling Problem	A71
H	
Babak Haghpanah Jahromi, Northeastern University Intricate Mechanics of Hierarchical Honeycombs	A72
Raha Hakimdavar, Columbia University Predicting Hydrologic Behavior of an Extensive Green Roof Using a 1-D Infiltration Model	A73

STUDENT POSTER SESSION SCHEDULE

Ali Hakimian, Northeastern University Life Cycle Assessment of CNT Lithium-ion Batteries and PSL Biosensors	A74
Tamer Hamouda, North Carolina State University Sensing Characteristic of Embedded POF into Composite structure for Structural Health Monitoring Systems	A75
Yu Han, The University of Akron A Novel Biosensor chip for High Throughput Detection of Macromolecular Biomarkers	A76
Jared Hann, University of Florida Magnetic Field-assisted Nanomachining of Ultraprecision Surfaces	A77
Anahita Hassanzadeh, Lehigh University Two Stage Stochastic Optimization with Mixed Integer Recourse	A78
Celine Hayot, University of Nebraska, Lincoln Effect of Insect Dimorphism on the Mechanical Properties of Rubber-like Cuticle Determined by Nanoindentation	A79
Alexander Haywood, Auburn University Adapting MEMS Processing for Cellulose Nanocrystal Films	A80
Fang He, University of Florida Integrated Management of Road and Power Networks Coupled by Electric and Plug-in Hybrid Electric Vehicles	A81
Zahra Heidary, University of Illinois at Chicago Multiphysics Modeling for Quantitative Acoustic Emission Testing of Civil Structures	A82
Pete Hondred, Iowa State University Thermal-Mechanical Properties of Tung-Oil Based Thermosetting Bio-Polymers	A83
Yifeng Hong, Georgia Institute of Technology Fabrication of Interconnected Porous Elastomers by A Microsphere-Templating Approach	A84
Amy Hopkins, California State University, Sacramento Seismically Enhanced Non-Structural Partition Walls for Unibody Residential Construction	A85
Rachel Howser, University of Houston Development of Carbon Nanofiber Aggregate for Damage Detection in Concrete Structures	A86
Jia Hu, University of Florida Decision-making Framework for Selection of Daylighting Systems	A87

STUDENT POSTER SESSION SCHEDULE

Arthur Huang, University of Minnesota
A88

Accessibility, Network Structure, and Shopping Destination Choice: A Microscopic Analysis of GPS Travel Data in the Twin Cities

Ching Hung, Columbia University
A89

Implementation of an Enhanced Elastoplastic Bounding Surface Model in PLAXIS and its Verification

J

Rishee Jain, Columbia University
A90

An Algorithmic Approach to Detect the Role of Social Influence on Energy Savings of Building Occupants Exposed to Eco-feedback

Angelina Jay, Northeastern University
A91

Structural Performance of Tapered Spirally Welded Wind Turbine Towers

Elaina Jennings, University of Alabama
A92

Shape Memory Alloy Dampers for Response Modification of Light-frame Wood Buildings

Namin Jeong, Georgia Institute of Technology
A93

A Method for Reverse Engineering of Material microstructure for Heterogeneous CAD

Dan Jia, University of North Carolina at Charlotte
A94

Structural Analysis on Magnetic Gear of Ocean Energy Power Take-Off System

Hady Joumaa, University of Illinois at Urbana-Champaign
A95

Elastodynamics and Wave Propagation in Fractal Media

K

Harjyoti Kalita, North Dakota State University
A96

Nanoarchitectonic Designs for Polymer Application to Enhance Nanoparticle Dispersion in Aqueous Media

Rahul Kapadia, University of California, San Diego
A97

A Comparison of the Thermal Conductivity Values of Carbon Nanotube-polymer Composites Probed by the (1) Steady State, and the (2) 3 w Method

Monica Kapoor, Northwestern University
A98

Design and Development of BCC Cu Precipitation Strengthened Steels - BCC Cu Strengthens the Steel and Enhances Ductility

Nishant Karasala Kotaiah, University of South Carolina
A99

Parameter Identification of Polythene Glycol Diacrylate

STUDENT POSTER SESSION SCHEDULE

Payman Karvanirabari, Rensselaer Polytechnic Institute

A100

Thermal-Mechanical Modeling and Simulation of III-Nitride Semiconductors

Elnaz Kermani, The Pennsylvania State University

A101

Energy Dissipation during Collapse of Granular Columns

Kristi Kern, Northwestern University

A102

Determining the Initiation of Cracking Using Real Time Automated Monitoring of an Urban Excavation

Shahrzad Khansari, University of Illinois at Chicago

A103

Green Materials: Strength of Soy Protein Nanofiber Mats

Maryam Khorshidi, Arizona State University

A104

Holistic Ideation Testbed for Creative Design

Jeongmin Kim, University of California, Berkeley

A105

Development of Maskless Plasmonic Nanolithography Tool

Jihoon Kim, Wayne State University

A106

Development of a Framework for Supporting Technology Planning in Product Lifecycle: The Perspective of Actor Network Theory

Steven Klankowski, Kansas State University

A107

High Performance Lithium Ion Battery Anode Based On Core-Shell Heterostructure of Silicon Coated Vertically Aligned Carbon Nano Fibers

Philip Kwong, University of Southern California

A108

Patterning Porous Materials with Functional Polymer Coatings

L

Samrakshak Lamichhane, Howard University

A109

Mitigation Provisions of Bridges Under Tsunami Effects

Seung-Woo Lee, University of Nebraska, Lincoln

A110

Multianalyte Electrochemical Biosensor on a Single Monolith Electrode

Ming Li, University of Connecticut, Storrs

A111

Kinetics of Lipid Nanodiscs – Potential Targeting Carriers for Therapeutics: Disk Growth and Lipid Exchange

Sha Li, University of Michigan, Ann Arbor

A112

Assembly System Design Considering Product Variety with Application to Automotive Battery Packs

STUDENT POSTER SESSION SCHEDULE

Engui Liu, Polytechnic Institute of New York University Sensing High pH and ASR (Alkali-Silica- Reaction) Detection in Cementitious Materials	A113
Kaibo Liu, Georgia Institute of Technology Health Index Development Based on Sensory Data Fusion for Degradation Modeling and Prognostic Analysis	A114
Xuelian Liu, Rensselaer Polytechnic Institute A Beyond-CMOS Approach for Addressing Single Thread Performance for Amdahl's Law Effects	A115
Ying Liu, University of Connecticut Self-Assembled Lipid-Based Nanodiscs for Hydrophobic Drug Delivery	A116
Gilson Lomboy, Iowa State University Particle Interaction and Rheological Behavior of Cement-Based Materials	A117
Luisa Lopez, University of Wisconsin, Madison Fiber Motion during Injection Molding	A118
Cheng Lu, University of California, Berkeley Normalized Cut: Approximation to Cheeger Constant and its Practical Performance in Image Segmentation	A119
Michelle Lueck, Colorado State University Barriers to Hurricane Evacuation: Development of a Scale	A120
Bismarck Luna, University at Buffalo, The State University of New York Seismic Response of Low Aspect Ratio Reinforced Concrete Shear Walls	A121
Albert Luu, University of California, Irvine Seismic Soil Pressures Measured during a Large Scale Soil-Structure Interaction Experiment on Underground Structures at E-Defense	A122
Joseph Lydon, California Institute of Technology Nonlinear Dynamics of 1-D Granular Crystals	A123

M

Teng Ma, Arizona State University Topographic Evolution of Silicon Anode on Soft Substrate for Lithium Ion Battery	A124
Prakash Manandhar, University of Massachusetts, Dartmouth Hydrogel Sensor Array for Multiple Degree of Freedom Proprioception in Soft Structured Robots	A125

STUDENT POSTER SESSION SCHEDULE

James Manimala, Purdue University Dynamic Load Reduction using Locally Resonant Periodic Structures	A126
Hamed Maraghechi, The Pennsylvania State University Assessment of the Pozzolan Behavior of Alkali Activated Soda-lime Glass Powder	A127
Armin Masroor, University at Buffalo, The State University of New York Impact Model Considering Surface Compliance For Simulation of Base Isolated Buildings Impacting Moat Wall	A128
Toni-Gaye McCulloch, University of Central Florida Unlikely Partners? The Fusion of Biology, Engineering, and Architecture to Develop Revolutionary Materials for Sustainable Construction	A129
Hector Medina, Virginia Commonwealth University Fracture of Random Rough Surfaces of Poly Methyl Methacrylate: An Experimental and FEM Study	A130
Farid Moghim, Northeastern University Computer-generated Random Trajectories of Wind-borne Debris in Turbulent Wind for Estimating Debris Impact against Tall Buildings	A131
Irshad Mohammad, University of Texas at Arlington Passive Wireless Sensors for Crack Detection and Shear/compression Sensing	A132
Chike Monwuba, Purdue University Geoenvironmental Influences on Raman Spectroscopic Monitoring of Chlorinated Solvents	A133
David Morrison, University of Illinois at Urbana-Champaign A Wide Branching Algorithm for Optimization Problems	A134
Ali Mostafavi, Purdue University Simulation and Visualization of Financing Policies in Infrastructure Systems	A135
Paul Mountford, University of Colorado at Boulder Microbubbles: a platform for studying the mechanics of biological monolayers	A136
Adam Mueller, Western Michigan University Geographically Distributed Hybrid Testing in Earthquake Engineering	A137
Madhuri Murali, Texas A&M University Development of experimental methods for modeling of offshore wind turbines	A138

STUDENT POSTER SESSION SCHEDULE

N

Roshanak Nateghi, Johns Hopkins University **A139**

Modeling Atlantic Hurricane Activity and Reliability of Power Distribution Systems Impacted by Hurricanes in the U.S.

Man Kwan (Trista) Ng, Northwestern University **A140**

Micro-rolling for Surface Texturing at High Rate

Chilan Ngo, University of California, Los Angeles **A141**

Effect of Growth Parameters on the Self-Catalyzed Growth of InP1-xSbx "nanocream cones"

Esmeralda Nino, University Of Puerto Rico at Mayaguez **A142**

Process Discovery through sensitivity analysis in multiple criteria optimization: preliminary results

O

Daniel Odoh, Howard University **A143**

Full Field Measurements of the Dynamic Response of AA 6061 T6 Aluminum Alloy Under High Strain Rate Loads

Andrew O'Donnell, University of Notre Dame **A144**

Calibration of a Reusable Nonlinear Frame Structure for an Experimental Ground Motion Scaling Study

Jong G. Ok, University of Michigan **A145**

Continuous and Scalable Micronano-manufacturing/patterning for Optoelectronic and Energy Conversion Applications

David Olawale, Florida State University **A146**

Triboluminescent Multifunctional Cementitious Composites with In-situ and Real-time Damage Sensing Capability

Thomas Omwando, University of Wisconsin, Milwaukee **A147**

A Reinforcement Learning Based Decision Support System for Optimizing Maintenance of Wind Energy Conversion Systems

Alexander Orsi, Northeastern University **A148**

Anterior Cruciate Ligament Tear Initiation Locus: A 3D Finite Element Analysis

James Otoo, Missouri University of Science and Technology **A149**

Differences between Traces, Natural Facets, and Induced Facets

STUDENT POSTER SESSION SCHEDULE

P

Nicholas Paine, University of Texas at Austin **A150**
UT-SEA: High Power Electric Actuation in a Compact Form Factor

Smruti Panigrahi, Michigan State University **A151**
Bifurcations of Equilibria in Snap-Through Oscillators

David Pelot, University of Illinois at Chicago **A152**
Creating Self Healing Materials through Core-shell Electrospinning

Jonathan Pham, University of Massachusetts, Amherst **A153**
Macroscopic Nanoparticle Ribbons, Helices and Fabrics

David Pisani, University of California, Los Angeles **A154**
Design, Development and Manufacturing of Piezoelectric Sensor/Actuator Rosettes

Elisabetta Pistone, University of Pittsburgh **A155**
Hazard Mitigation of Water Mains by means of Immersed Active Inspection Systems

Matthew Plumlee, Georgia Institute of Technology **A156**
Cohesive Control for Variation Reduction in Scale Up of Advanced Material Manufacturing Processes

Nimish Pujara, Cornell University **A157**
Measurements of Run-up and Bed Shear Stress of Long Waves

R

Stefania Radopoulou, Georgia Institute of Technology **A158**
Visual Pattern Recognition Models of Infrastructure Elements

Devarajan Ramanujan, Purdue University **A159**
Modeling Environmental Sustainability for Product Lifecycle Management

Pradeep Ramiah Rajasekaran, Southern Illinois University, Carbondale **A160**
Nano-Editor: A Dynamic Nano Plotting and Erasing system

Prahalada Rao, Oklahoma State University **A161**
Real-time Monitoring of Nano-scale Surface Morphology in Ultra-Precision Manufacturing Processes

Amin Rasekh, Texas A&M University **A162**
Integrated Contamination Emergency Management System for Drinking Water Networks Security

STUDENT POSTER SESSION SCHEDULE

Xiang Ren, Drexel University **A163**

Solid Freeform Fabrication of a Conceptual Artificial Photosynthesis Device

Sara Rimer, University of Michigan **A164**

An Agent-Based Evacuation Model with Hazardous Contaminant

Daniel Robertson, Brigham Young University **A165**

A Small Punch Test to Characterize Anisotropic Soft Tissue Properties

Ruth Roman, West Virginia University **A166**

Fatigue Strength of Composite Materials Considering Hygrothermal Degradation

Celeste Roschuni, University of California, Berkeley **A167**

The DesignExchange

Yeontack Ryu, Texas A&M University **A168**

Correlations between High Electrical Conductivity and Debundling of Carbon Nanotubes and P-doping Effects from a Chlorosulfonic Acid

S

Sourabh Saha, Massachusetts Institute of Technology **A169**

Processes, Techniques, and Tools for Scalable and Affordable Nanomanufacturing: Perspectives from Dip Pen Nanolithography, Wrinkling, and DNA Imprinting

Samir Sahyoun, University of Tennessee **A170**

Optimal Model Reduction for Aerodynamics Boundary Feedback Control

Sonia Samir, University of Texas at Arlington **A171**

Evaluation of Methane Generation Potential of Municipal Solid Waste (MSW) in a Closed Landfill

Nicholas Schneider, University of Pennsylvania **A172**

Dynamic in situ Electron Microscopy of Liquid Systems

Doug Schweizer, North Carolina State University **A173**

Large-scale Experiments to Validate an Innovative Seismic Performance Enhancement Technique for Steel Building Beam-column Connections

Dong-Woo Seo, Northeastern University **A174**

Estimating Life-cycle Monetary Losses of Slender Bridges due to Wind Hazards

S.M. Sadegh Shams, University of Wisconsin, Milwaukee **A175**

Progressive Failure and Repair of Scratch Damage of Laminated Carbon Fiber/Epoxy Composites

STUDENT POSTER SESSION SCHEDULE

Bai Shao, University of Nebraska, Lincoln

A176

Study of Titanium Alloy micro-Machining Using micro-EDM

Pankaj Sharma, Pankaj Kumar Sharma

A177

Nanoscale Studies of Ferroelectric PVDF-TrFE Copolymer using Piezoresponse Force Microscopy

Tripp Shealy, Clemson University

A178

Resilience Education through Building Codes: Current Status and Best Practices

Bradley Sherman, Northwestern University

A179

Laser Generation of Finite Amplitude Surface Acoustic Waves Using the Phase Velocity Scanning Method

Ping-Chang Shih, Georgia Institute of Technology

A180

Computer Vision for Ocean Sciences: 4-D Variational Stereo Reconstruction of Ocean Waves

Jessica Snyder, Drexel University

A181

Physiologically Relevant In Vitro Microfluidic Liver by Heterogenous Cell Printing

Hongyun So, University of California, Berkeley

A182

Nanowire-Assisted Micro Loop Heat Pipe with Porous Silicon Wicks

Ruiqiang Song, Michigan Technological University

A183

Assessment of Steel Structures Subjected to Earthquake Mainshock-aftershock Sequences

John Steuben, Colorado School of Mines

A184

NURBs-Based Metamodels: Applications in Robotics and Automation

Stephanie Stockar, The Ohio State University

A185

A System Dynamics Modeling Methodology to Predict Transient Phenomena in Compressible Fluid Flow Systems

Scott Swensen, Stanford University

A186

Seismically Isolated Unibody Light-Frame Residential Structures

T

Jacopo Tani, Rensselaer Polytechnic Institute

A187

High-rate Estimation and Identification of Adaptive Optics Systems using Slow-rate Image Sensors

Aaron Thornton, Missouri University of Science and Technology

A188

Freeze-form Extrusion Fabrication of Functionally Gradient Material Parts

STUDENT POSTER SESSION SCHEDULE

Ye Tian, University of Massachusetts, Lowell **A189**

Finite Element Analysis of Fiber-optic Photoacoustic Generator using Nanocomposite as Absorption Material

Anton Tokranov, Brown University **A190**

Study of SEI Formation Using In Situ Stress Measurements

Alison Trachet, University of Florida **A191**

Processing-Structure-Property Relationships in Ultrahigh Strength Silicon Carbides

Patrick Trasborg, Lehigh University **A192**

Development of a Blast and Ballistic Resistant Precast Concrete Armored Wall System

Luis Traverso, Purdue University **A193**

Scalable Nanomanufacturing Machine Based on Parallel Optical Antenna Array

Yu-Cheng Tsai, Princeton University **A194**

Near-field Multiphoton Absorption Polymerization Using Optically Trapped Microspheres

Zeynep Tuna, University of California, Los Angeles **A195**

2010 E-Defense Four-Story Reinforced Concrete Building - Comparative Study of Experimental and Analytical Results

V

Vahid Valamanesh, Northeastern University **A196**

Aerodynamic Damping and Seismic Response of Wind Turbine Structures

W

Anthony Waldenmaier, North Dakota State University **A197**

Sustainable Engineering and Material Testing Methods for Reclaimed Asphalt Pavement

Bu Wang, Lehigh University **A198**

The Role of Surface Roughness on Immunoaffinity Cell Capture in Microfluidic Devices

Ranran Wang, Yale University **A199**

Understand, Simulate, and Optimize the Water-Energy Nexus from a System Dynamics Perspective: Challenges and Opportunities

Siwei Wang, University of South Carolina **A200**

Novel Chemically Stable Proton Conducting Ceramics with Improved Proton Conductivity

STUDENT POSTER SESSION SCHEDULE

Wei Wang, Michigan State University

A201

Reinforcement of Open-cell Aluminum Foam for Enhanced Energy Absorption Capacity

Ying Wang, University of Connecticut

A202

Signal-Amplifying Fluorescent Nanofibers for Naked Eyes-Based Ultrasensitive Detection of Explosives

Zhichao Wang, University of Maryland, College Park

A203

Strategic Product Design for Uncertain, Converging and Service Oriented Markets

Xiaolei Wen, Purdue University

A204

Interferometric-Spatial-Phase-Imaging (ISPI) for Parallel Optical Nanolithography

Scott Wilcox, University of Washington

A205

Velocity Control of a Piezo-Actuated Nanostepper

Ai-Lun Wu, University of California, Irvine

A206

A Damage Detection Technique for A Reinforced Concrete Frame

Chenglin Wu, Missouri University of Science and Technology

A207

Engineering Application of Polymer Cross-Linked Aerogel

Teng Wu, University of Notre Dame

A208

Modeling Unsteady Nonlinear Bridge Aerodynamics and Aeroelasticity

X

Jianyong Xie, Georgia Institute of Technology

A209

Multi-Physics Numerical Modeling and Characterization of 3D Integrated Electronic Systems

Changxue Xu, Clemson University

A210

Scaffold-free Fabrication of Three-dimensional Cellular Tubes

Siyang Xu, Carnegie Mellon University

A211

Magnetic Nanoparticle-based Solder Composites for Electronic Packaging Applications

Y

Hooman Yadollahi Farsani, Clarkson University

A212

Aerodynamics of Bluff Bodies with Application to Fluid-Structure Interaction of Civil Structures

Shifei Yang, University of Wisconsin, Madison

A213

A Lifting Algorithm for Output-only Continuous Scan Laser Doppler Vibrometry

STUDENT POSTER SESSION SCHEDULE

Yu Yang, Texas A&M University

Laser Induced Nano Droplet Ejection With Optical Devices

A214

Hui Yao, Michigan Technological University and Central South University

Performance of Asphalt Binder Blended with Non-Modified and Polymer-Modified Nanoclay

A215

Jun Yin, Binghamton University, State University of New York

Nanoparticle Assemblies on Flexible Devices for Cleaner Energy and Cleaner Environment

A216

Kai Yu, University of Colorado at Boulder

Mechanisms of multi-shape memory effects and associated energy release in shape memory polymers

A217

Xiaokong Yu, Worcester Polytechnic Institute

Microscopic morphology and mechanical properties of bitumen

A218

Z

Nan Zhang, University of Minnesota

A Modeling Analysis of Global Flows in the solvent of a Convective Assembly system

A219

Qing Zhang, University of Delaware

Energy Retention and Self-discharge Mechanisms of Carbon-based Electrochemical Capacitors

A220

Jiahua Zhu, Lamar University

Soft Conductive Nanocomposites with Negative Permittivity

A221

Xiaotian Zou, University of Massachusetts, Lowell

Cutting Temperature in Rotary Ultrasonic Machining of Titanium: Experimental Study using Novel Fabry-Perot Fiber Optic Sensors

A222

GRANTEE POSTER SESSION SCHEDULE

For the 2012 CMMI conference, NSF expects each grantee to display one poster related to each grant award. Posters should describe the objectives of the grant and summarize results to date. Each poster has been assigned to a session where the PI is expected to be at the poster to explain the grantee's work and answer questions. Each poster has also been assigned a location. All poster sessions will take place in Exhibit Hall AB.

Poster Session	Day and Time
Poster Session 1	Monday, July 9, 8:30 a.m.–12:00 p.m.
Poster Session 2	Monday, July 9, 3:00 p.m.–5:45 p.m.
Poster Session 3	Tuesday, July 10, 7:30 a.m.–9:30 a.m.
Poster Session 4	Tuesday, July 10, 3:15 p.m.–5:45 p.m.
Poster Session 5	Wednesday, July 11, 1:00 p.m.–4:00 p.m.

Program Area Clusters

Section A: Students	
Section B: Advanced Manufacturing	
Materials Processing and Manufacturing	Nanoscale Science & Engineering Center
Manufacturing and Construction Machines & Equipment	Manufacturing Enterprise Systems
NanoManufacturing	Interdisciplinary Research
Nanoscale Interdisciplinary Research Team	
Section C: Mechanics and Engineering Materials	
Mechanics of Materials	Structural Materials and Mechanics
Materials and Surface Engineering	Biomechanics and Mechanobiology
Geomechanics and Geomaterials	
Section D: Resilient and Sustainable Infrastructures	
Civil Infrastructure Systems	Infrastructure Management and Extreme Events
GeoTechnical Engineering	George E. Brown, Jr. Network for Earthquake Engineering Simulation Research
Hazard Mitigation and Structural Engineering	George E. Brown, Jr. Network for Earthquake Engineering Simulation Operations
Section E: Systems Engineering and Design	
Engineering and Systems Design	Service Enterprise Systems
Control Systems	Operations Research
Sensors and Sensing Systems	Dynamical Systems

GRANTEE POSTER SESSION SCHEDULE

The poster presenters are listed below in alphabetical order by PI along with the corresponding poster location. Please refer to the accompanying map for the poster session layout.

A

Magdy Abdelrahman, North Dakota State University, Fargo **C160**

Program Area: Structural Materials and Mechanics

CAREER: A Program of Research Focused on Understanding of Interaction of Recycled Materials with Asphalt, Outreach, Academic and Engineering Development

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Daniel Abrams, University of Illinois at Urbana-Champaign **D154**

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research

NEESR-CR: Hybrid Masonry Seismic Structural Systems

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Warren Adams, Clemson University **E194**

Program Area: Operations Research

Collaborative Research: Reformulation-Linearization Technique for Discrete and Continuous Nonconvex Optimization with Applications

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Mohammadreza Aghajani, Brown University **E213**

Program Area: Operations Research

Analysis of Large-Scale Stochastic Systems

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Sajjad Ahmad, University of Nevada, Las Vegas **D111**

Program Area: Infrastructure Management and Extreme Events

CAREER: Vulnerability of Water Infrastructure to Climate Variability and Change: Implications for Sustainable Water Management

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Shabbir Ahmed, Georgia Institute of Technology **E231**

Program Area: Operations Research

Exploiting Submodularity in Integer Programming

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Elif Akcali, University of Florida **B224**

Program Area: Manufacturing Enterprise Systems

Analytical Approaches for Assessing the Revenue Aspects and Environmental Impacts of Demanufacturing

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Marwan Al-Haik, Virginia Polytechnic Institute and State University

C174

Program Area: Structural Materials and Mechanics

CAREER: Next Generation Multifunctional Composites for Radiations and Impact Hazards Mitigation

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Farid Alizadeh, Rutgers University, Newark

E195

Program Area: Operations Research

Optimization Over Positive or Sum-of-Square Functions with Applications to Constrained Approximation and Shape Constrained Learning

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Matthew Allen, University of Wisconsin, Madison

E249

Program Area: Dynamical Systems

Methods for Experimental Identification of Nonlinear Dynamic Systems of Unknown Form and Order With Application to Human Gait

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Mahmoud Almasri, University of Missouri, Columbia

E125

Program Area: Sensors and Sensing Systems

MEMS Capacitive Plates with Large Tunable Dynamic Range for Voltage Conversion and Power Harvesting

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Khalid Alshibli, University of Tennessee, Knoxville

C136

Program Area: Geomechanics and Geomaterials

Experimental Measurements of Stresses and Strains of Granular Materials Using 3D Non-Destructive Technologies

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Annalingam Anandarajah, Johns Hopkins University

C116

Program Area: Geomechanics and Geomaterials

Mechanisms Controlling Swelling of Clays

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Annalingam Anandarajah, Johns Hopkins University

C117

Program Area: Geomechanics and Geomaterials

A Fundamental Study on Suction and Hysteresis of Soil-Water Characteristic Relation of Cohesive Soil

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Kurt Anderson, Rensselaer Polytechnic Institute

E266

Program Area: Dynamical Systems

Framework for the Adaptive Multiscale Modeling of Biopolymers

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Sean Andersson, Trustees of Boston University **E65**

Program Area: Control Systems

CAREER: Nonlinear Control for Single Molecule Tracking

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Sean Andersson, Trustees of Boston University **E66**

Program Area: Control Systems

DynSyst_Special_Topics: A formal approach to the control of stochastic dynamic systems

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Bassem Andrawes, University of Illinois at Urbana-Champaign **D66**

Program Area: Hazard Mitigation and Structural Engineering

CAREER: Innovative Confinement Technology for Strong Main Shock-AfterShock Damage Mitigation

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Nagaraj Arakere, University of Florida **C48**

Program Area: Materials and Surface Engineering

GOALI: Monotonic and Cyclic Response of Plastically Graded Surfaces Subject to Rolling Contact Fatigue

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Helim Aranda-Espinoza, University of Maryland, College Park **C199**

Program Area: Biomechanics and Mechanobiology

CAREER: Mechanotaxis of Axons and Neurons

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Alan Argento, University of Michigan, Dearborn **C175**

Program Area: Structural Materials and Mechanics

GOALI: Dynamic Response of Rigid, Foamed Biocomposites

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Craig Arnold, Princeton University **B51**

Program Area: Materials Processing and Manufacturing

EAGER: Multiphoton Polymerization with Optical Trap Assisted Nanopatterning

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Craig Arnold, Princeton University **B146**

Program Area: NanoManufacturing

Self-positioning Microspheres for Direct-write Nanolithography using Bessel Beam Optical Traps

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

GRANTEE POSTER SESSION SCHEDULE

Raymundo Arroyave, Texas A&M University

C72

Program Area: Materials and Surface Engineering

Advanced High Strength Multiphase Steels through a Combined Alloy-Microstructural Design

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Harry Asada, Massachusetts Institute of Technology

E267

Program Area: Dynamical Systems

A Multi-Cellular PZT Actuator/Generator with Tunable Stiffness and Resonant Frequencies

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Jeramy Ashlock, Iowa State University

D155

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research

NEESR Payload: Characterization of Dynamic Soil-Pile Interaction by Random Vibration Methods

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Domniki Asimaki, Georgia Institute of Technology

D41

Program Area: Geotechnical Engineering

Topographic Amplification of Seismic Motion: Observations and Simulations in 3D

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Alper Atamturk, University of California, Berkeley

E214

Program Area: Operations Research

A Unifying Study of the Capacitated Fixed-Charge Network Flow Polyhedron

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Adda Athanasopoulos-Zekkos, University of Michigan, Ann Arbor

D50

Program Area: Geotechnical Engineering

Feasibility Study of High-Performance Cut-off Walls for Levees in Seismic Regions: Dynamic Wall Analyses and Ductile Slurry Development

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Shorya Awtar, University of Michigan, Ann Arbor

B116

Program Area: Manufacturing Machines and Equipment

Multi-axis Parallel-Kinematic Motion Systems with a Large Dynamic Range

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Ashraf Ayoub, University of Houston

C181

Program Area: Structural Materials and Mechanics

Establishing the Shear Constitutive Laws of Fiber-Reinforced Polymer (FRP)-Strengthened Concrete Elements

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Shapour Azarm, University of Maryland, College Park

E1

Program Area: Engineering and Systems Design

EAGER: Design for Bundling Decisions with Marketing and Public Policy Considerations

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

B

Charles Bakis, Pennsylvania State University, University Park

C148

Program Area: Structural Materials and Mechanics

High Temperature and Sustained Load Effects on Structural Bonded Repairs in Civil Infrastructure

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Balakumar Balachandran, University of Maryland, College Park

E268

Program Area: Dynamical Systems

Stochastic Resonance in Coupled, Nonlinear Oscillators

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Hari Jagannatha Balasubramanian, University of Massachusetts, Amherst

E159

Program Area: Service Enterprise Systems

Balancing Timely Access and Patient-Physician Continuity in Primary Care

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Anna Balazs, University of Pittsburgh

C49

Program Area: Materials and Surface Engineering

Harnessing Light to Control the Autonomous Functionality of Soft Active Materials

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Thomas Balk, University of Kentucky

C91

Program Area: Materials and Surface Engineering

GOALI: Understanding the Microstructural Evolution and High-Temperature Behavior of Osmium-Ruthenium Coatings for Dispenser Cathodes

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Oluwaseyi Balogun, Northwestern University

E148

Program Area: Sensors and Sensing Systems

Surface Plasmon Photoacoustic Imaging of Subsurface Objects

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Oluwaseyi Balogun, Northwestern University

E149

Program Area: Sensors and Sensing Systems

A Novel Non-Contact Technique for Dynamic Loading of Thin Film Materials Using Finite Amplitude Mechanical Stress Waves

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Xuegang Ban, Rensselaer Polytechnic Institute

D1

Program Area: Civil Infrastructure Systems

Collaborative Research: Mobile Sensors as Traffic Probes– Addressing Transportation Modeling and Privacy Protection in an Integrated Framework

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Xuegang Ban, Rensselaer Polytechnic Institute

D2

Program Area: Civil Infrastructure Systems

CAREER: Using Mobile Sensors for Traffic Knowledge Extraction and Dynamic Network Management

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Amit Bandyopadhyay, Washington State University

B82

Program Area: Manufacturing Machines and Equipment

Porous Nitinol for Load Bearing Implants Using Rapid Prototyping

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Zeb Barber, Montana State University

B95

Program Area: Manufacturing Machines and Equipment

GOALI: Accurate, High Resolution Ladar for 3D Metrology at Large Standoff Distances

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Kash Barker, University of Oklahoma, Norman Campus

D130

Program Area: Infrastructure Management and Extreme Events

Collaborative Research: Modeling the Efficacy of Inventory for Extreme Event Preparedness Decision Making in Interdependent Systems

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Justin Barone, Virginia Polytechnic Institute and State University

C50

Program Area: Materials and Surface Engineering

Mechanics of Self-assembled Peptide Structures

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

John Bassani, University of Pennsylvania

C1

Program Area: Mechanics of Materials

Mechano-Chemical Coupling in the Adhesion of Thin Shell Structures: Transitions Between Weakly- and Well-Bonded States

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Romesh Batra, Virginia Polytechnic Institute and State University

C27

Program Area: Mechanics of Materials

Fracture of Adhesive Bonds under Mixed Mode Loading: Experiments in a Dual Actuator Load Frame and Numerical Simulations

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Haim Bau, University of Pennsylvania

B159

Program Area: NanoManufacturing

GOAL: Real Time, Nanoscale Imaging of Electrochemistry and Electroplating in Liquid Media

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Christopher Baxter, University of Rhode Island

C126

Program Area: Geomechanics and Geomaterials

Unique Relationship Between Small Strain Shear Modulus and Effective Stresses at Failure for Dilative Soils

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Sarah Baxter, University of South Carolina at Columbia

B20

Program Area: Materials Processing and Manufacturing

Synergistic Modeling: Manufacture and Design of 'Nano' Microstructures

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Saif Benjaafar, University of Minnesota, Twin Cities

B225

Program Area: Manufacturing Enterprise Systems

Collaborative Proposal: Optimizing the Supply Chain for Cost and Carbon Footprint

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Lawrence Bennett, George Washington University

C92

Program Area: Materials and Surface Engineering

Magnetic Tunable Nanostructures: Property Characterization and Modeling

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Joseph Bentsman, University of Illinois at Urbana-Champaign

E75

Program Area: Control Systems

GOAL: Hybrid Control of Continuous Casting for Whisker and Crack Prevention

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

GRANTEE POSTER SESSION SCHEDULE

Ahmed-Amine Benzerga, Texas A&M University

C12

Program Area: Mechanics of Materials

CAREER: Bridging Experiments and Multiscale Modeling of Size- and Temperature-dependent Phenomena in Polycrystalline Plasticity

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Jay Berger, Earthquake Engineering Research Institute

D176

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research

RAPID Awardee Workshop to Identify Research Needs Emerging from the 2010 and 2011 New Zealand Earthquakes and the 2011 Japan Earthquake and Tsunami

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Jeffrey Berman, University of Washington

D67

Program Area: Hazard Mitigation and Structural Engineering

Collaborative Research: Structural Integrity of Steel Gravity Framing Systems

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Jeffrey Berman, Portland State University

D156

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research

NEESR-II: Toward Rapid Return to Occupancy in Unbraced Steel Frames

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Jeffrey Berman, University of Washington

D157

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research

NEESR-SG: Smart and Resilient Steel Walls for Reducing Earthquake Impacts

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Dionisio Bernal, Northeastern University

D198

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research

NEESR: Next Generation Dissipation Guidelines for New and Existing Structures using the NEES Database

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Michael Berry, Montana State University

C161

Program Area: Structural Materials and Mechanics

Building Green: Development and Evaluation of an Environmentally Friendly Concrete

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Vikas Berry, Kansas State University

C93

Program Area: Materials and Surface Engineering

Detailed Surface Engineering and Electrical Characterization of pi-Functionalized Graphene Sheets and Ribbons with Preserved Lattice and Electronic Characteristics

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Jack Beuth, Carnegie Mellon University

B117

Program Area: Manufacturing Machines and Equipment

GOALI/Collaborative Research: Integrated Microstructure and Melt Pool Dimension Control for Electron Beam Additive Manufacturing

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Jack Beuth, Carnegie Mellon University

C218

Program Area: Biomechanics and Mechanobiology

Nanomechanical Material Size Effects Using an In-Situ, On-Chip Test Platform

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Bharat Bhushan, Ohio State University

B52

Program Area: Materials Processing and Manufacturing

Mechanically Reliable Surfaces for Superhydrophobicity

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Jacobo Bielak, Carnegie Mellon University

D199

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research

NEESR-SG: High-fidelity site characterization by experimentation, field observation, and inversion-based modeling

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Joseph Biernacki, Tennessee Technological University

C182

Program Area: Structural Materials and Mechanics

RUI: Controlling the Properties and Performance of Concrete Using Computer Aided Molecular Design

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Giovanna Biscontin, Texas A&M University

D158

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research

NEESR-CR: Capacity and Performance of Foundations for Offshore Wind Towers

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Douglas Bish, Virginia Polytechnic Institute and State University

E160

Program Area: Service Enterprise Systems

Evacuation Planning with Demand Management

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Ebru Bish, Virginia Polytechnic Institute and State University

E161

Program Area: Service Enterprise Systems

Optimal Blood Screening Strategies for Infectious Agents: Mathematical Models and Decision Support Tools

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

GRANTEE POSTER SESSION SCHEDULE

Subir Biswas, Michigan State University

D15

Program Area: Civil Infrastructure Systems

Collaborative Research: Protocols for Wireless Networking and Multi-application Data Handling for Freeway Traffic Safety Applications

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Denis Blackmore, New Jersey Institute of Technology

E269

Program Area: Dynamical Systems

Collaborative Research: A Unified Dynamical Systems-Simulation-Visualization Approach to Modeling and Analyzing Granular Flow Phenomena

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Jose Blanchet, Columbia University

E232

Program Area: Operations Research

CAREER: Efficient Monte Carlo Methods in Engineering and Science: From Coarse Analysis to Refined Estimators

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Jose Blanchet, Columbia University

E233

Program Area: Operations Research

Efficient Monte Carlo Methods for Gaussian Random Fields

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Antonio Bobet, Purdue University

C137

Program Area: Geomechanics and Geomaterials

Mechanical and Geophysical Characterization of Damage in Anisotropic Rock

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Dominic Boccelli, University of Cincinnati

D27

Program Area: Civil Infrastructure Systems

Real-Time Distribution System Network Modeling and Fault Diagnosis

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Dennis Bong, Ohio State University

C51

Program Area: Materials and Surface Engineering

Selective Aqueous-phase Adhesion by Molecularly Engineered Materials

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Ronaldo Borja, Stanford University

D58

Program Area: Geotechnical Engineering

Coupled Solid-Deformation/Fluid-Flow Simulation of Failure Initiation in Variably Saturated Slopes

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Ronaldo Borja, Stanford University
D177

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research
NEESR-CR: Properties of Cohesionless Soil Subsequent to Liquefaction and Resedimentation

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Francesco Borrelli, University of California, Berkeley
E85

Program Area: Control Systems

CAREER: Distributed Control and Constraints Satisfaction in Complex Networked Systems

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

David Bourell, University of Texas at Austin
B105

Program Area: Manufacturing Machines and Equipment

Electrochemical Infiltration of Selective Laser Sintered Preforms

Poster Session 5: Wednesday, July 11, 1:00 p.m.–4:00 p.m.

Anton Bowden, Brigham Young University
C238

Program Area: Biomechanics and Mechanobiology

CAREER: Biomechanical Consequences of Spinal Ligament Microstructure

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Carleen Bowers, University of Rochester
B169

Program Area: NanoManufacturing

Biocatalytic Nanolithography

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Stephen Boyles, University of Texas at Austin
D3

Program Area: Civil Infrastructure Systems

Collaborative Research: Stochastic and Dynamic Hyperpath Equilibrium Models

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Scott Brandenburg, University of California-Los Angeles
D200

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research

NEESR-II: Evaluation of Seismic Levee Deformation Potential by Destructive Cyclic Field Testing

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Stanko Brankovic, University of Houston
B178

Program Area: NanoManufacturing

GOALI: Electrochemical Nanofabrication of High-Anisotropy Bit-Patterned Magnetic Arrays using Self-Limiting Ion Milling Fabricated Templates

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Jonathan Bray, University of California, Berkeley

D42

Program Area: Geotechnical Engineering

Collaborative Research: Geoengineering Extreme Events Reconnaissance (GEER) Association: Turning Disaster Into Knowledge

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Jonathan Bray, University of California, Berkeley

D43

Program Area: Geotechnical Engineering

Earthquake Surface Fault Rupture Interaction with Building Foundations

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Jonathan Bray, University of California, Berkeley

D178

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research

NEESR-SG: Seismic Performance Assessment in Dense Urban Environments

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

John Brigham, University of Pittsburgh

D87

Program Area: Hazard Mitigation and Structural Engineering

Computational Methods for Optimized Reliability and Efficiency in Smart Structural Systems

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Ioannis Brilakis, Georgia Institute of Technology

D16

Program Area: Civil Infrastructure Systems

Progressive Site Modeling with Videogrammetry

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Ioannis Brilakis, Georgia Institute of Technology

D17

Program Area: Civil Infrastructure Systems

CAREER: Visual Pattern Recognition Models for Remote Sensing of Civil Infrastructure

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Ioannis Brilakis, Georgia Institute of Technology

D18

Program Area: Civil Infrastructure Systems

Reciprocal Reconstruction and Recognition for Modeling of Constructed Facilities

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

L. Brinson, Northwestern University

C28

Program Area: Mechanics of Materials

New Approach to Nanoindentation Experiments and Modeling: Toward Fundamental Understanding of Thin Polymer Films and Polymer Nanocomposites

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Samuel Brody, Texas A&M University

D112

Program Area: Infrastructure Management and Extreme Events

Examining the 100-Year Floodplain as a Metric of Risk, Loss, and Household Adjustment

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

James Brumbelow, Texas A&M University

D131

Program Area: Infrastructure Management and Extreme Events

Agent-Based Modeling for Planning Emergency Response to Contamination Emergencies in Water Utilities

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Satish T. S. Bukkapatnam, Oklahoma State University

B118

Program Area: Manufacturing Machines and Equipment

Characterization and Real Time Defect Mitigation in Chemical/Mechanical Polishing of Microelectronic Wafers Using Decision Theory and MultiSensor Fusion

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Rigoberto Burgueno, Michigan State University

C149

Program Area: Structural Materials and Mechanics

Hybrid Nanostructured Material Systems for Tailored Stress-Wave Mitigation of Impact and Blast Effects

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Eric Butcher, New Mexico State University

E270

Program Area: Dynamical Systems

Collaborative Research: Stability, Identification, and Stochastic Resonance in Stochastic Delayed Systems

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

William Buttlar, University of Illinois at Urbana-Champaign

C150

Program Area: Structural Materials and Mechanics

GOALI: A Hybrid Failure Approach using Digital Image Correlation for Functionally Graded Thin-Bonded Overlays

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Oral Buyukozturk, Massachusetts Institute of Technology

C183

Program Area: Structural Materials and Mechanics

Debonding in Bi-layer Material Systems under Moisture Effects : A Multi-scale Fracture Approach

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Oral Buyukozturk, Massachusetts Institute of Technology

D68

Program Area: Hazard Mitigation and Structural Engineering

A Robust Methodology for the Standoff Condition Assessment of FRP-Retrofitted Concrete Systems

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

GRANTEE POSTER SESSION SCHEDULE

C

Steve C.S. Cai, Louisiana State University & Agricultural and Mechanical College **D88**

Program Area: Hazard Mitigation and Structural Engineering

Investigation and Damage Mitigation of Low-lying Coastal Bridges under Hurricane-induced Wind and Wave Actions

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Wei Cai, Stanford University **C2**

Program Area: Mechanics of Materials

CAREER: Bridging Defect Models and Micro-Deformation Experiments

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Juan Caicedo, University of South Carolina at Columbia **D69**

Program Area: Hazard Mitigation and Structural Engineering

CAREER: Cooperative Human-Computer Model Updating Cognitive Systems (MUCogS)

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

James Calvin, New Jersey Institute of Technology **E196**

Program Area: Operations Research

Algorithms and Complexity for Global Optimization

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Jaime Camelio, Virginia Polytechnic Institute and State University **B206**

Program Area: Manufacturing Enterprise Systems

GOALI: Quality Mining—A Novel Framework for Quality Monitoring and Control for Data-rich Manufacturing Systems

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Fred Cannon, Pennsylvania State University, University Park **B21**

Program Area: Materials Processing and Manufacturing

GOALI: Novel Low-Polluting Collagen-Alkali Silicate

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Guozhong Cao, University of Washington **B147**

Program Area: NanoManufacturing

Solution-Based Fabrication of Coherent Nanocomposite Film Electrodes for Li-Ion Batteries

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

GRANTEE POSTER SESSION SCHEDULE

Jian Cao, Northwestern University

B22

Program Area: Materials Processing and Manufacturing

Incremental Forming at Multi-Scales

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Jian Cao, Northwestern University

B23

Program Area: Materials Processing and Manufacturing

GOALI: Process Analysis and Variation Control in Micro-stamping

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Luca Caracoglia, Northeastern University

D89

Program Area: Hazard Mitigation and Structural Engineering

CAREER: An Innovative Performance-Based Simulation Framework for High-Rise Buildings against Wind Hazards

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

JoAnn Carmin, Massachusetts Institute of Technology

D132

Program Area: Infrastructure Management and Extreme Events

Preparing Cities for Climate Change: An International Comparative Assessment of Urban Adaptation Planning

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Michael Cassidy, University of California, Berkeley

D28

Program Area: Civil Infrastructure Systems

Theories of Multimodal Urban Mobility

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

David Castelbaum, Colorado State University

D51

Program Area: Geotechnical Engineering

Collaborative Research: Experimental and Computational Investigation of Consolidation-Induced Contaminant Transport for High Water Content Geo-Materials

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Oana Cazacu, University of Florida

B24

Program Area: Materials Processing and Manufacturing

GOALI: High-strain Rate Deformation and Failure of Magnesium Alloys

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Amy Cerato, University of Oklahoma, Norman Campus

C118

Program Area: Geomechanics and Geomaterials

CAREER: The Role of Specific Surface Area and Cation Exchange Capacity in Understanding and Predicting Expansive Soil Behavior

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Shantanu Chakrabartty, Michigan State University

E135

Program Area: Sensors and Sensing Systems

CAREER: Integrated Research and Education in Self-powered Micro-sensing for Embedded and Implantable Structural Health Monitoring

Poster Session 5: Wednesday, July 11, 1:00 p.m.–4:00 p.m.

Jayajit Chakraborty, University of South Florida

D113

Program Area: Infrastructure Management and Extreme Events

Collaborative Research: Advancing Environmental Equity Research: Vulnerability to Air Pollution and Flood Risks in Houston and Miami

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Abhijit Chandra, Iowa State University

B83

Program Area: Manufacturing Machines and Equipment

Chemical Mechanical Paired Grinding

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Ching Chang, University of Massachusetts, Amherst

C127

Program Area: Geomechanics and Geomaterials

Deformation and Failure Behavior of Soils under Erosion

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Shih-Ho Chao, University of Texas at Arlington

D179

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research

NEESR-CR: Steel Truss Systems with Enhanced Seismic Safety and Performance

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Shih-Ho Chao, University of Texas at Arlington

D180

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research

NEESR-CR: Full-Scale RC and HPFRC Frame Subassemblages Subjected to Collapse-Consistent Loading Protocols for Enhanced Collapse Simulation and Internal Damage Characterization

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Xiuli Chao, University of Michigan, Ann Arbor

E180

Program Area: Service Enterprise Systems

Collaborative Research on Studies of Multichannel Opaque Service Enterprise

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Ioannis Chasiotis, University of Illinois at Urbana-Champaign

C52

Program Area: Materials and Surface Engineering

CAREER: Nanoscale Confinement in Polymers: Integrated Research and Education in Nanoscale Experimental Mechanics

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Fanglin (Frank) Chen, University of South Carolina at Columbia

C94

Program Area: Materials and Surface Engineering

Self-Rising Approach to Synthesize Hierarchically Porous Mixed Ionic and Electronic Conducting Cathodes for Solid Oxide Fuel Cells

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Genda Chen, Missouri University of Science and Technology

D70

Program Area: Hazard Mitigation and Structural Engineering

Exploring Polymer Cross-Linked Aerogels for Their Strength and Energy Absorption in Seismic Retrofit of RC Structures

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Jian Chen, University of Wisconsin, Milwaukee

C53

Program Area: Materials and Surface Engineering

Advanced Carbon Nanotube-Liquid Crystalline Elastomer Nanocomposites and Their Actuation Properties

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Junhong Chen, University of Wisconsin, Milwaukee

B2

Program Area: Materials Processing and Manufacturing

Collaborative Research: Exploration of Graphene-Nanocrystal Metamaterials

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Li-Han Chen, University of California-San Diego

B148

Program Area: NanoManufacturing

Collaborative Research: High-Throughput Nanomanufacturing of 10 NM Feature Patterns Using Ultra-Sharp Probe Arrays

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Peng Chen, University of Pittsburgh

B1

Program Area: Materials Processing and Manufacturing

Collaborative Research: Laser Manufacturing of Three-Dimensional Lightwave Circuits and Nano-Optical Devices

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Peng Chen, University of Pittsburgh

B179

Program Area: NanoManufacturing

Nuclear Nano-Engineering

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Peng Chen, University of Pittsburgh

E110

Program Area: Sensors and Sensing Systems

EAGER: Fiber Sensors Networks for Crude Oil Migration Monitoring In Ocean

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Shaochen Chen, University of California-San Diego

B170

Program Area: NanoManufacturing

Surface Plasmon-Assisted Nanolithography

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Suren Chen, Colorado State University

D90

Program Area: Hazard Mitigation and Structural Engineering

Reliability-Based Analysis and Design Loads For Slender Long-Span Bridges

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Wei Chen, Northwestern University

E2

Program Area: Engineering and Systems Design

Stochastic Multiscale Computational Design Methodology

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Xi Chen, Columbia University

C13

Program Area: Mechanics of Materials

CAREER: The Science Underpinning Mechanical Self-Assembly

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Xin Chen, University of Illinois at Urbana-Champaign

E215

Program Area: Operations Research

Tractable Approximation of Dynamic Decision Making Models Under Uncertainty

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Youping Chen, University of Florida

C219

Program Area: Biomechanics and Mechanobiology

Reproducing the Extraordinary Mechanical Properties of Biomaterials through Multiscale Simulation

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Gary Cheng, Purdue University

B96

Program Area: Manufacturing Machines and Equipment

Collaborative Research: Electromagnetic Peening Assisted Laser Micromachining (EPALM)—A Hybrid Micromachining Process with Enhanced Mechanical Properties

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Yang-Tse Cheng, University of Kentucky

C95

Program Area: Materials and Surface Engineering

GOALI: Understanding and Controlling Coupled Mechanical and Chemical Degradation Phenomena within Insertion Electrodes

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Yet-Ming Chiang, Purdue University
C96
Program Area: Materials and Surface Engineering

Collaborative Research: Mechanical and Electrical Reliability Maximization of Rechargeable Lithium-Ion Batteries through Microstructure Design

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Yong Cho, University of Nebraska at Omaha
D4
Program Area: Civil Infrastructure Systems

CAREER: Hybrid 3D Unstructured Workspace Modeling: A Critical Component in Developing an Automated Construction Site

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Jongeun Choi, Michigan State University
E86
Program Area: Control Systems

CAREER: Multi-Agent Systems and Gaussian Processes: Applications in Environmental Sciences

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Stephen Chou, Princeton University
B180
Program Area: NanoManufacturing

Cutting, Selecting, and Transfer-Printing Technology for Graphene-on-Demand over Entire Wafers and FET Applications

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Eugene Chow, Palo Alto Research Center Incorporated
B149
Program Area: NanoManufacturing

Mesoscale Printer

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Arindam Chowdhury, Florida International University
D71
Program Area: Hazard Mitigation and Structural Engineering

Development of Effective Approaches to the Large-Scale Aerodynamic Testing of Low-Rise Buildings

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Mashrur Chowdhury, Clemson University
D19
Program Area: Civil Infrastructure Systems

Vehicle-Infrastructure Integration Enabled Plug-In Hybrid Electric Vehicles for Energy Management

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Cristian Ciobanu, Colorado School of Mines
C239
Program Area: Biomechanics and Mechanobiology

CAREER: Structural Helicity in Ultra-Thin Alloy Nanowires

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Cinzia Cirillo, University of Maryland, College Park

D29

Program Area: Civil Infrastructure Systems

Dynamic Choice Models for Challenging Societies with an Application to Car Ownership Decisions

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Jonathan Clark, Florida State University

E250

Program Area: Dynamical Systems

Collaborative Research: Dynamics of Running on Variable Inclines

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Laura Clarke, North Carolina State University

B3

Program Area: Materials Processing and Manufacturing

Utilizing the Photothermal Effect of Metal Nanoparticles for Processing of Polymers

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Peggi Clouston, University of Massachusetts, Amherst

C184

Program Area: Structural Materials and Mechanics

Modeling the Design Limit States of Structural Composite Lumber

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Randy Cogill, University of Virginia

E234

Program Area: Operations Research

Optimal Time-Reversible Policies for Markov Decision Processes

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Daniel Cole, University of Pittsburgh

B160

Program Area: NanoManufacturing

Dynamic Maskless Holographic Lithography

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Emmanuel Collins, Florida State University

E285

Program Area: Dynamical Systems

Modeling and Motion Planning for Autonomous Skid-Steered Vehicles

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Gerard Cornuejols, Carnegie Mellon University

E197

Program Area: Operations Research

Integer and Combinatorial Optimization: Intersection Cuts from Multiple Rows

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Ross Corotis, University of Colorado at Boulder **D91**

Program Area: Hazard Mitigation and Structural Engineering

Structural Reliability and Sustainable Resilience

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

John Coulter, Lehigh University **B53**

Program Area: Materials Processing and Manufacturing

GOALI: Intelligent Melt Rotation for Enhanced Injection Molding of Polymer and Nanocomposite Products

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

John Coulter, Lehigh University **B195**

Program Area: Interdisciplinary Research

IDR: Mesenchymal Stem Cells and Mechanotransduction: An Investigation of Nano-Structured Injection Molded Polymeric Biointerfaces

Poster Session 5: Wednesday, July 11, 1:00 p.m.–4:00 p.m.

Thomas Cova, University of Utah **D133**

Program Area: Infrastructure Management and Extreme Events

Protective Action Triggers

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Daniel Cox, Oregon State University **D201**

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research

NEESR II: Mitigating the Risk of Coastal Infrastructure through understanding Tsunami-Structure Interaction and Modeling

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Nathan Crane, University of South Florida **B35**

Program Area: Materials Processing and Manufacturing

High Yield Self Assembly of Functional Thermoelectric Devices

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Nathan Crane, University of South Florida **B119**

Program Area: Manufacturing Machines and Equipment

Large Stroke Microscale Actuators Based on Electrowetting

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Gianluca Cusatis, Northwestern University **D72**

Program Area: Hazard Mitigation and Structural Engineering

Man-made Hazard Mitigation of Reservoir Dams: Monte Carlo Simulation with Multiscale Modeling of Concrete and Accurate Fluid-Structure Interaction

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

GRANTEE POSTER SESSION SCHEDULE

D

Narendra Dahotre, University of North Texas **B36**

Program Area: Materials Processing and Manufacturing

Collaborative Research: Composite Surfacing of Amorphous Materials by Laser Interference Nanopatterning

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Narendra Dahotre, University of North Texas **B37**

Program Area: Materials Processing and Manufacturing

Laser-Assisted Rapid Surface Microstructuring of Alumina Ceramic

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Jiangang Dai, Georgia Institute of Technology **E216**

Program Area: Operations Research

Analysis and Control of Large-scale Service Systems

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Liming Dai, Case Western Reserve University **B134**

Program Area: Nanoscale Interdisciplinary Research Team and Scalable NanoManufacturing

NIRT: Fabrication of carbon nanotube based dry adhesive surfaces mimicking gecko-feet

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Liming Dai, Case Western Reserve University **B171**

Program Area: NanoManufacturing

The Mechanistic Study on N-doped Carbon Nanomaterials as Highly Efficient Cathode for Fuel Cells

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Samantha Daly, University of Michigan, Ann Arbor **C29**

Program Area: Mechanics of Materials

Experimental Investigation of Microstructural Effects on Deformation and Fracture Mechanisms in Nanostructured Metallic Materials

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Mohammed Daqaq, Clemson University **B68**

Program Area: Manufacturing Machines and Equipment

Understanding the Macroscopic Dynamics of Ultrasonic Consolidation

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Mohammed Daqaq, Clemson University **E111**

Program Area: Sensors and Sensing Systems

A Novel Concept for Micro-Power Generation Using Flow-induced Self-excited Oscillations

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Chiara Daraio, California Institute of Technology

C3

Program Area: Mechanics of Materials

CAREER: Experimental Investigation of Highly Nonlinear Granular Crystals for the Development of New Mechanical Systems and Acoustic Metamaterials

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Tuhin Das, University of Central Florida

E51

Program Area: Control Systems

Controlling Transient Behavior of Solid Oxide Fuel Cells Using an Invariant Property

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Shideh Dashti, University of Colorado at Boulder

D159

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research

NEESR: Seismic Response of Shallow Underground Structures in Dense Urban Environments

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Alexandre d'Aspremont, Princeton University

E235

Program Area: Operations Research

Collaborative Research: Mathematical Programming for Streaming Data

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Joseph Davidson, Arizona State University

B69

Program Area: Manufacturing Machines and Equipment

Math Based Precision Manufacturing and Metrology for Complex Mechanical Assemblies

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Rachel Davidson, University of Delaware

D114

Program Area: Infrastructure Management and Extreme Events

RAPID: Post-Earthquake Fires in the March 2011 Japan Earthquake and Tsunami

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Angela Davies, University of North Carolina at Charlotte

B84

Program Area: Manufacturing Machines and Equipment

In Situ Form Metrology in Manufacturing by Combining Engineered Optical Scattering and Photogrammetry

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Lauren Davis, North Carolina Agricultural & Technical State University

E162

Program Area: Service Enterprise Systems

Collaborative Research: Engineering Efficient and Equitable Food Distribution Under Uncertainty

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

GRANTEE POSTER SESSION SCHEDULE

Stephen Davis, Northwestern University

B25

Program Area: Materials Processing and Manufacturing

Collaborative Research: Dynamics and Stability of Metallic Foams: Network Modelling

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Anirban De, Manhattan College

D59

Program Area: Geotechnical Engineering

RUI: Understanding the Role of Flexible and Rigid Barriers in Mitigating Surface Blast Effects on Underground Structures

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Maarten P. de Boer, Carnegie Mellon University

C14

Program Area: Mechanics of Materials

Collaborative Research: Stick-slip Dynamics of Micromachined Interfaces

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Gregory Deierlein, Stanford University

C185

Program Area: Structural Materials and Mechanics

Collaborative Research: Multi-Scale Simulation of Low-Triaxiality Fracture and Ultra Low Cycle Fatigue in Steel Structures

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Gregory Deierlein, Stanford University

D92

Program Area: Hazard Mitigation and Structural Engineering

Integrated System and Component Reliability in Seismic Collapse Safety of Structures

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Gregory Deierlein, Stanford University

D181

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research

NEESR: Seismically Isolated Unibody Residential Buildings for Enhanced Life-Cycle Performance

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Jason DeJong, University of California-Davis

C138

Program Area: Geomechanics and Geomaterials

Bio-Mediated Improvement of Soil and Soil-Structure Interface Behavior

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Jason DeJong, University of California-Davis

D182

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research

NEESR-II: Biological Improvement of Sands for Liquefaction Prevention and Damage Mitigation

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

GRANTEE POSTER SESSION SCHEDULE

Brian Denton, North Carolina State University

E163

Program Area: Service Enterprise Systems

CAREER: Optimization of Screening and Treatment Delivery Systems for Chronic Diseases

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Brian Denton, North Carolina State University

E164

Program Area: Service Enterprise Systems

Optimization of Medical Treatment Decisions for Type 2 Diabetes

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Jaydev Desai, University of Maryland, College Park

E52

Program Area: Control Systems

Mechanical Phenotyping of Cells: Haptics-Enabled Atomic Force Microscopy

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Salil Desai, North Carolina Agricultural & Technical State University

B85

Program Area: Manufacturing Machines and Equipment

CAREER: Hybrid Approach to Direct-Write Based Micro and Nano Manufacturing

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Hans DeSmidt, University of Tennessee, Knoxville

E286

Program Area: Dynamical Systems

CAREER: Vibration-Based Active and Passive Damage Identification of Time-Varying Dynamical Systems with Applications to Rotating Structures

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Reginald DesRoches, Georgia Institute of Technology

D73

Program Area: Hazard Mitigation and Structural Engineering

Collaborative Research: Machine Vision Enhanced Post Earthquake Inspection and Rapid Loss Estimation

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Reginald DesRoches, Georgia Institute of Technology

D160

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research

NEESR-CR-Innovative Seismic Retrofits for Resilient Reinforced Concrete Buildings

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Vijaya Kumar Devabhaktuni, University of Toledo

E20

Program Area: Engineering and Systems Design

New Methodologies for System-Level Electromagnetic Compatibility (EMC) Analysis of Electronic Systems

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

GRANTEE POSTER SESSION SCHEDULE

Santosh Devasia, University of Washington

E53

Program Area: Control Systems

Control of Distributed Nanosteppers

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Santosh Devasia, University of Washington

E287

Program Area: Dynamical Systems

Vibration Mitigation in Inchworm Nanopositioners for SPMs

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Elizabeth Dickey, North Carolina State University

C54

Program Area: Materials and Surface Engineering

GOAL: Laser Surface Processing of Ceramic Eutectics for Enhanced Cutting Tool Performance

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Yifu Ding, University of Colorado at Boulder

C73

Program Area: Materials and Surface Engineering

Instabilities in Patterned Polymer Surfaces

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Seddik Djouadi, University of Tennessee, Knoxville

E54

Program Area: Control Systems

Optimal Model Reduction for Aerodynamics Boundary Feedback Control

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Zvonimir Dogic, Brandeis University

C200

Program Area: Biomechanics and Mechanobiology

Collaborative Research: Mechanics and Structural Polymorphism of Bacterial Flagellar Assemblies

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Denis Dorozhkin, University of Connecticut

E34

Program Area: Engineering and Systems Design

CAREER: Geometric Singularities in Engineering Design and Manufacturing: A Generic Spacetime Approach

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Denis Dorozhkin, University of Connecticut

E35

Program Area: Engineering and Systems Design

Geometric Skeletons for Topologically Evolving Domains

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Thomas Dow, North Carolina State University

B150

Program Area: NanoManufacturing

GOAL: Nanocoining

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Vinayak Dravid, Northwestern University

C220

Program Area: Biomechanics and Mechanobiology

Implementation of Fluidic-Scanning Near Field Ultrasound Holography with Integrated Electronic Detection for Nano-Bio-Mechanics

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Traian Dumitrica, University of Minnesota, Twin Cities

C240

Program Area: Biomechanics and Mechanobiology

CAREER: Nanomechanics from First principles: A Symmetry-Adapted Methodology

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Rebecca Dupaix, Ohio State University

B54

Program Area: Materials Processing and Manufacturing

CAREER: Integrated Approach to Modeling, Simulation, and Design for Manufacture of Micro-hot Embossing Using a Polymer Glass Transition Modeling Framework

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Shirley Dyke, Purdue University

D202

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research

Workshop/Collaborative Research: Vision 2020: An Open Space Technology Workshop on the Future of Earthquake Engineering; St. Louis, Missouri; January 2010

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Shirley Dyke, Purdue University

D203

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research

NEESR-SG: Performance-Based Design and Real-time Large-scale Testing to Enable Implementation of Advanced Damping Systems

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Yuris Dzenis, University of Nebraska, Lincoln

B135

Program Area: Nanoscale Interdisciplinary Research Team and Scalable NanoManufacturing

NIRT: NanoManufacturing and Analysis of Active Hierarchical Nanofilamentary Nanostructures

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

E

Christopher Eamon, Wayne State University **D93**

Program Area: Hazard Mitigation and Structural Engineering

Accurate and Efficient Reliability Analysis of Complex Structural Engineering Problems

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Demetre Economou, University of Houston **B181**

Program Area: NanoManufacturing

Large Area, Rapid Manufacturing of Virtually Any Nanopattern Using Nanopantography

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Ronald Eguchi, ImageCat, Inc. **D134**

Program Area: Infrastructure Management and Extreme Events

RAPID: The Role of Urban Development Patterns in Mitigating the Effects of Tsunami Run-up

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Kornel Ehmann, Northwestern University **B38**

Program Area: Materials Processing and Manufacturing

Laser-Induced Plasma Micro-Machining (LIP-MM)

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Herbert Einstein, Massachusetts Institute of Technology **D57**

Program Area: Geotechnical Engineering

Cavern Design for the Deep Underground Science and Engineering Laboratory (DUSEL)

Poster Session 5: Wednesday, July 11, 1:00 p.m.–4:00 p.m.

Kamil Ekinci, Trustees of Boston University **C97**

Program Area: Materials and Surface Engineering

Tailor-made Superhydrophobic Surfaces for MEMS and NEMS

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Usama El Shamy, Southern Methodist University **C119**

Program Area: Geomechanics and Geomaterials

Multiscale Experimental and Computational Investigations of Erosion-Induced Failure of Levee Systems

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Ahmed Elgamal, University of California-San Diego **D161**

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research

NEESR-II: A Seismic Study of Wind Turbines for Renewable Energy

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Ryan Elliott, University of Minnesota, Twin Cities **E126**

Program Area: Sensors and Sensing Systems

CAREER: Branch-Following and Bifurcation Methods to Identify Active Materials for Tomorrow's Sensors and Actuators

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Michael Engelhardt, University of Texas at Austin **D94**

Program Area: Hazard Mitigation and Structural Engineering

Elevated Temperature Performance of Shear Connectors for Composite Beams

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Bogdan Epureanu, University of Michigan, Ann Arbor **E288**

Program Area: Dynamical Systems

Micro-Fluid-Structural Sensing Based on Sensitivity Vector Fields and Morphing Modes Created by Nonlinear Feedback Excitation

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

F. Safa Erenay, University of Wisconsin, Madison **E165**

Program Area: Service Enterprise Systems

CAREER: Optimizing Disease Screening & Diagnosis

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Ozlem Ergun, Georgia Institute of Technology **E176**

Program Area: Service Enterprise Systems

Managing Debris Collection and Disposal Operations

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Ozlem Ergun, Georgia Institute of Technology **E177**

Program Area: Service Enterprise Systems

Fair and Efficient Implementation of Extended Producer Responsibility Legislation

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

David Erickson, Cornell University **B194**

Program Area: Interdisciplinary Research

IDR: Self-Reliant, Autonomous Microsystems for Biophysical Monitoring of Small Animals (Lab-on-a-Bird)

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Ozan Erol, Washington State University **E76**

Program Area: Control Systems

New Magnetorheological Actuator with Embedded Hall-Effect Sensor for Hysteresis Elimination

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

GRANTEE POSTER SESSION SCHEDULE

F

Larry Fahnstock, University of Illinois at Urbana-Champaign **D108**

Program Area: Hazard Mitigation and Structural Engineering
Innovative Self-Centering Braces for Advanced Seismic Performance

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Michael Falk, Johns Hopkins University **C55**

Program Area: Materials and Surface Engineering
Extended Time Scale Simulation Studies of Nanoscale Friction

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Michael Falvo, University of North Carolina at Chapel Hill **C201**

Program Area: Biomechanics and Mechanobiology
Tuning Morphology and Mechanics of Fibrin Assemblies

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Jun Fan, Missouri University of Science and Technology **E136**

Program Area: Sensors and Sensing Systems
Novel Coaxial Cable Bragg Grating Sensors for Large Strain Measurement in SHM

Poster Session 5: Wednesday, July 11, 1:00 p.m.–4:00 p.m.

Tai-Hsi Fan, University of Connecticut **C221**

Program Area: Biomechanics and Mechanobiology
CAREER: The Role of Mobility in Antibody Aggregation

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Nicholas Fang, Massachusetts Institute of Technology **B136**

Program Area: Nanoscale Interdisciplinary Research Team and Scalable NanoManufacturing
SNM: Digital Optofluidic Self Assembly of Heterogeneous Metamaterials

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Vivek Farias, Massachusetts Institute of Technology **E198**

Program Area: Operations Research
CAREER: Large Scale Stochastic Control: A Math Programming and Discrete Optimization Lens

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Ronald Fearing, University of California, Berkeley **C241**

Program Area: Biomechanics and Mechanobiology
Collaborative Research: Electrically Controlled Nanofibrillar Surfaces for Cleaning and Adhesion

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Brian Feeny, Michigan State University

E289

Program Area: Dynamical Systems

A Positive Effect of Negative Stiffness: Wave Behavior and Energy Management

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Eugene Feinberg, SUNY at Stony Brook

E217

Program Area: Operations Research

Constrained Optimization of Markov Decision Processes

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Qianmei Feng, University of Houston

B207

Program Area: Manufacturing Enterprise Systems

Collaborative Research: Integrated Modeling and Optimization of Manufacturing Variability and Product Reliability for Advanced and Evolving Technologies

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Flavio Fenton, Cornell University

E251

Program Area: Dynamical Systems

Nonlinear Dynamics and Bifurcations in Cardiac Tissue

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Scott Ferguson, North Carolina State University

E3

Program Area: Engineering and Systems Design

GOAL: A Multidisciplinary Approach to Simultaneous Market Segmentation and Product Family Definition

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Michael Ferris, University of Wisconsin, Madison

E236

Program Area: Operations Research

Extended Mathematical Programs: Hierarchical Models and Solution

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Richard Finno, Northwestern University

D52

Program Area: Geotechnical Engineering

Advancing the Capabilities of Adaptive Management Techniques in Geotechnics

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Alison Flatau, University of Maryland, College Park

E252

Program Area: Dynamical Systems

GOAL: Dynamic Coupling of Synthetic Jet Actuators and Flow Fields

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

GRANTEE POSTER SESSION SCHEDULE

Robert Fleischman, University of Arizona

D204

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research
NEESR: Inertial Force-Limiting Floor Anchorage Systems for Seismic Resistant Building Structures

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Ernst-Ludwig Florin, University of Texas at Austin

C222

Program Area: Biomechanics and Mechanobiology
Controlling the Mechanical Properties of Fiber Bundles through their Molecular Architecture

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Sean Fontenot, University of Oregon, Eugene

B4

Program Area: Materials Processing and Manufacturing
Self-Assembled Liquid Crystal Thermoset 3-D Nano-Composites With Functionally Graded Properties

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Craig Foster, University of Illinois at Chicago

C186

Program Area: Structural Materials and Mechanics
Numerical and Experimental Analysis of Earth-Based Structural Materials

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Diane Foster, University of New Hampshire

D205

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research
NEESR: Tsunami Induced Coherent Structures and their Impact on our Coastal Infrastructure

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Patrick Fox, University of California-San Diego

D162

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research
NEESR-CR: Earthquake Performance of Full-Scale Reinforced Soil Walls

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Joelle Frechette, Johns Hopkins University

C74

Program Area: Materials and Surface Engineering
CAREER: Engineering Surface Interactions to Modulate a Confined Fluid

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Terry Friesz, Pennsylvania State University, University Park

D5

Program Area: Civil Infrastructure Systems
Stochastic Dynamic Game-Theoretic Models of Urban Freight Systems

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Gary Fry, Texas A&M University

D206

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research
NEESR-CR: Multi-Scale, Mechanistic Fracture Prediction and Optimal Panel Zone Participation in Steel Moment Frame Buildings

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Peter Furth, Northeastern University

D20

Program Area: Civil Infrastructure Systems
Self-Organizing Traffic Signals

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Barry Fussell, University of New Hampshire

B106

Program Area: Manufacturing Machines and Equipment
Minimization of Force Model Uncertainty for CNC Milling Process Improvement

Poster Session 5: Wednesday, July 11, 1:00 p.m.–4:00 p.m.

Barry Fussell, University of New Hampshire

D60

Program Area: Geotechnical Engineering
'Smart Rocks' for Debris-Flow Landslide Research

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

G

Evan Galipeau, University of Pennsylvania

C30

Program Area: Mechanics of Materials
Fiber-Reinforced Polymeric Material Systems: A Multi-Scale, Elasto-Viscoplastic Homogenization Approach

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Evan Galipeau, University of Pennsylvania

C31

Program Area: Mechanics of Materials
Pattern-Changing Instabilities and Giant Magnetostriction in Periodic Magnetoelastic Composites

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Daniel Gall, Rensselaer Polytechnic Institute

C56

Program Area: Materials and Surface Engineering
Adaptive High-Temperature Lubrication through Nanopore Channels

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

David Gamarnik, Massachusetts Institute of Technology

E199

Program Area: Operations Research
Statistical Physics Methods and Algorithmic Applications in Graphical Games and Combinatorial Optimization

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Mahdi Ganji, University of Arizona

E290

Program Area: Dynamical Systems

Dynamics of Nanometer Gap Formation in Thermo-Tunneling Devices for Energy Conversion

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Di Gao, University of Pittsburgh

C75

Program Area: Materials and Surface Engineering

Collaborative Research: Condensation and Icing at Superhydrophobic Surfaces

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Huajian Gao, Brown University

C242

Program Area: Biomechanics and Mechanobiology

Effects of Elasticity and Geometry on Cellular Uptake of Nanoparticles

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Jianbo Gao, Wright State University

E253

Program Area: Dynamical Systems

Collaborative Research: Quantifying Predictability in Nonlinear Multiscale Systems with Applications to Tropical Cyclone Prediction

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Robert Gao, University of Connecticut

B55

Program Area: Materials Processing and Manufacturing

Collaborative Research: Multivariate Remote Process Sensing for Improved Observability in Injection Molding

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Maria Garlock, Princeton University

D95

Program Area: Hazard Mitigation and Structural Engineering

Collaborative Research: Fire Damage Mitigation and Post-Fire Evaluation of Steel Girder Bridges

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

James Garrett, Carnegie Mellon University

D30

Program Area: Civil Infrastructure Systems

Indirect Bridge Health Monitoring Using Moving Vehicles

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Laurie Garrow, Georgia Institute of Technology

E181

Program Area: Service Enterprise Systems

Integrating Flexible Discrete Choice and Revenue Management Models

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

GRANTEE POSTER SESSION SCHEDULE

Henri Gavin, Duke University

D163

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research

RAPID: Performance of the Base-Isolated Christchurch Women's Hospital during the Sequence of Strong Earthquakes and Aftershocks in New Zealand from September 2010 through 2011

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Tomas Gedeon, Montana State University

E271

Program Area: Dynamical Systems

Fluid-Structure Interaction in Arthropod Mechanoreceptors with Application to Bio-Inspired Micro-Fluidic Sensors

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Brian Gerber, University of Colorado at Denver

D115

Program Area: Infrastructure Management and Extreme Events

Managing Evacuee Ingress: Network Interactions and Community Hosting Performance

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Leonid Germanovich, Georgia Institute of Technology

D44

Program Area: Geotechnical Engineering

Collaborative Research: Development of a Fracture Processes Facility at DUSEL Homestake

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Joseph Geunes, University of Florida

B226

Program Area: Manufacturing Enterprise Systems

Collaborative Research: Mitigating the Cost of Anarchy in Complex Supply Chain Systems

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Michael Gevelber, Trustees of Boston University

B182

Program Area: NanoManufacturing

Real-Time Control for Engineering Electrospun Nanofiber Diameter Distributions for Advanced Applications

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Masoud Ghandehari, Polytechnic University of New York

B196

Program Area: Interdisciplinary Research

IDR: Optical Imaging of High pH Dependent Degradation in Infrastructure Materials

Poster Session 5: Wednesday, July 11, 1:00 p.m.–4:00 p.m.

Pritha Ghosh, Texas A&M University

C15

Program Area: Mechanics of Materials

Modeling and Computational Methodologies for the Simulation of the Response of Multifunctional Programmable Materials

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

GRANTEE POSTER SESSION SCHEDULE

Somnath Ghosh, Johns Hopkins University

C32

Program Area: Mechanics of Materials

Collaborative Proposal: Integrated Computational System for Probability Based Multi-Scale Model (PMM) of Ductile Fracture in Lightweight Alloys

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Victor Giurgiutiu, University of South Carolina at Columbia

E94

Program Area: Sensors and Sensing Systems

Exact Modeling of Power and Energy Transduction for Optimum Design of Structurally-Integrated Thin-Film Active Sensors

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

William Goddard, California Institute of Technology

B133

Program Area: Nanoscale Interdisciplinary Research Team and Scalable NanoManufacturing

SNM: Electronically Controlled Surface Assembly of DNA Nanostructures

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Alejandro Gonzalez Ruiz, University of New Mexico

E87

Program Area: Control Systems

CAREER: Compressive Cooperative Sensing and Navigation in Mobile Networks

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Keith Gooch, Ohio State University

C202

Program Area: Biomechanics and Mechanobiology

Biomechanical Regulation of Cellular Signaling and Organization

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Jonathan Goodall, University of South Carolina at Columbia

D6

Program Area: Civil Infrastructure Systems

Simulation of Integrated Urban Infrastructure Systems using Component-based Modeling

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Russell Gorga, North Carolina State University

B56

Program Area: Materials Processing and Manufacturing

A Mechanistic Understanding of the Process-Property Relationships in an Alternative Electrospinning Process

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Nakhiah Goulbourne, University of Michigan, Ann Arbor

E112

Program Area: Sensors and Sensing Systems

CAREER: Multiphysics Modeling and Experiments for Pulatile Membrane Sensors

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Andrew Gouldstone, Northeastern University
B197
Program Area: Interdisciplinary Research

IDR/Collaborative Research: Activities in Thermal Spray Processing and Volcanology

Poster Session 5: Wednesday, July 11, 1:00 p.m.–4:00 p.m.

Sanjay Govindjee, University of California, Berkeley
E127
Program Area: Sensors and Sensing Systems

High Performance Simulation Tools for Complex MEMS Resonator Design

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Nabil Grace, Lawrence Technological University
C151
Program Area: Structural Materials and Mechanics

GOALI/RUI: Development of Innovative New Highway Bridge System

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Samuel Graham, Georgia Institute of Technology
B161
Program Area: NanoManufacturing

High Throughput Process Screening and in-situ Characterization for Graphene Synthesis

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Lori Graham-Brady, Johns Hopkins University
C187
Program Area: Structural Materials and Mechanics

Collaborative Research Strain-rate Dependent Properties of Cement-Based Materials: A Multi-Scale Experimental and Modeling Effort

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Zachary Grasley, Texas A&M University
C188
Program Area: Structural Materials and Mechanics

CAREER: Linking Nanoscale and Macroscale Viscoelastic Responses of Cementitious Materials

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Itzhak Green, Georgia Institute of Technology
C189
Program Area: Structural Materials and Mechanics

Degradation and Fault Detection of Rotordynamic Machinery Using Real-Time Experimental Modal Analysis

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Christopher Gregg, East Tennessee State University
D135
Program Area: Infrastructure Management and Extreme Events

Effects of Environmental Cues and Informal and Official Warnings on Protective Action Decision Making: A Case Study for Earthquakes and Tsunamis in the Indian Ocean

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Mircea Grigoriu, Cornell University

C16

Program Area: Mechanics of Materials

Effective Properties of Multi-phase Materials by Stochastic Reduced Order Models (SROMs)

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Joanna Groza, University of California-Davis

B172

Program Area: NanoManufacturing

GOALI: Rapid Sintering to Manufacture Fully Dense and Bioactive Nanocrystalline Hydroxyapatite

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

David Grummon, Michigan State University

C98

Program Area: Materials and Surface Engineering

High-Authority Two-Way Surface Form Memory

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Zhiyong Gu, University of Massachusetts, Lowell

B39

Program Area: Materials Processing and Manufacturing

Collaborative Research: Microscale Joining Using Nanoheater Structures

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Yongpei Guan, University of Florida

E218

Program Area: Operations Research

CAREER: A Study of Stochastic and Robust Integer Programming: Algorithms, Computations and Applications

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Madhav Guatam, University of Toledo

C57

Program Area: Materials and Surface Engineering

Fabrication of Zinc Nitride and Zinc-Oxy-Nitride Thin Films for Photovoltaic and Optoelectronic Applications

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Kevin Gue, Auburn University

B227

Program Area: Manufacturing Enterprise Systems

Storage Systems with Virtual Aisles

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

James Guest, Johns Hopkins University

E21

Program Area: Engineering and Systems Design

Optimal Topology Design under Fabrication and Demand Uncertainties

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

GRANTEE POSTER SESSION SCHEDULE

Seth Guikema, Johns Hopkins University

D21

Program Area: Civil Infrastructure Systems

Drinking Water Distribution System Management Incorporating Health and Asset Risk

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Seth Guikema, Johns Hopkins University

D116

Program Area: Infrastructure Management and Extreme Events

Multi-Scale Modeling of Interdependent Critical Infrastructure System Performance During Hurricanes

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Lingjie Guo, University of Michigan, Ann Arbor

B183

Program Area: NanoManufacturing

Nanomanufacturing Process and Applications Based on Dynamic Nano-Inscribing

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Rui (Ray) Guo, Duke University

C139

Program Area: Geomechanics and Geomaterials

Chemo-Mechanical Nano-Scale Mechanisms of Aging of Soils

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Yuebin Guo, University of Alabama, Tuscaloosa

B70

Program Area: Manufacturing Machines and Equipment

GOAL: Six-Sigma Based Robust Process Design Under Tool Deterioration for Giga Fatigue Life of Precision Machined Components in Hard Turning

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Yuebin Guo, University of Alabama, Tuscaloosa

B71

Program Area: Manufacturing Machines and Equipment

Hybrid Dry Cutting–Finish Burnishing of Novel Biodegradable Magnesium-Calcium Implants for Superior Corrosion Performance

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Zhanhu Guo, Lamar University, Beaumont

B5

Program Area: Materials Processing and Manufacturing

Synergistic Conductive Multifunctional Polymer Nanocomposites with Soft and Hard NanoFillers

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Diwakar Gupta, University of Minnesota, Twin Cities

E182

Program Area: Service Enterprise Systems

Speed and Efficiency in Government Procurement of Transportation-Related Construction Services

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

GRANTEE POSTER SESSION SCHEDULE

Satyandra Gupta, University of Maryland, College Park

E36

Program Area: Engineering and Systems Design

Collaborative Research: Automatic Generation of Context-Dependent Simplified Models to Support Interactive Virtual Assembly

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Varun Gupta, University of Illinois at Urbana-Champaign

C33

Program Area: Mechanics of Materials

GOALI: Validated Multiscale Simulations of Ceramic Matrix Composites for Power Generation

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Vijay Gupta, University of California-Los Angeles

C4

Program Area: Mechanics of Materials

Loading Metal Nanostructures Under Extreme Conditions Using Stress Waves with Rarefaction Shock Profiles

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Maria Paz Gutierrez, University of California, Berkeley

D74

Program Area: Hazard Mitigation and Structural Engineering

Biologically Inspired Self-Activated Building Envelope Regulation System (SABERS)

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Maria Paz Gutierrez, University of California, Berkeley

E150

Program Area: Sensors and Sensing Systems

Biologically Inspired Self-Activated Building Envelope Regulation System (SABERS)

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

H

Raphael Haftka, University of Florida

E4

Program Area: Engineering and Systems Design

Estimating Probability of Improvement in Next Cycle of Surrogate Based Design Optimization

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Yacov Haimes, University of Virginia

D31

Program Area: Civil Infrastructure Systems

Adaptive Systems-Based Prioritization of Bridge Infrastructure Maintenance: Integrated Modeling of Technical, Socio-Economic, and Normative Dimensions

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Muhammad Hajj, Virginia Polytechnic Institute and State University

D96

Program Area: Hazard Mitigation and Structural Engineering

A Functional Approach for the Analysis of Peak Wind Loads on Houses Exposed to Hurricanes and Validation of Wind Tunnel Simulations

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Samer Hamdar, George Washington University

D7

Program Area: Civil Infrastructure Systems

Collaborative Research: New Methods for Measuring, Evaluating and Predicting the Safety Impact of Road Infrastructure Systems on Driver Behavior

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Paul Hansma, University of California-Santa Barbara

B198

Program Area: Interdisciplinary Research

IDR: Bio-Inspired Actuators for Next Generation Infrastructure Systems

Poster Session 5: Wednesday, July 11, 1:00 p.m.–4:00 p.m.

Julie Zhili Hao, Old Dominion University

E22

Program Area: Engineering and Systems Design

Robust Design of High Performance MEMS Resonators

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Yaowu Hao, University of Texas at Arlington

C223

Program Area: Biomechanics and Mechanobiology

Collaborative Research: Hierarchically Structured Polycrystalline Hollow Gold Nanoparticles—a Model System for Integrated Experimental and Multiscale Computational Nanomechanics

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Md Haque, Pennsylvania State University, University Park

C243

Program Area: Biomechanics and Mechanobiology

Mechanics of Materials at the Extreme Length-Scales

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Sandip Harimkar, Oklahoma State University

B40

Program Area: Materials Processing and Manufacturing

EAGER: Spark Plasma Sintering of Bulk Nanostructured Thermoelectric Materials

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Tequila Harris, Georgia Institute of Technology

B6

Program Area: Materials Processing and Manufacturing

Understanding the Relationship Between Processing and Performance for Functional Materials

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

GRANTEE POSTER SESSION SCHEDULE

Judith Harrison, United States Naval Academy

C58

Program Area: Materials and Surface Engineering

Collaborative Research: Atomistic Simulations of the Nanotribology of Carbon-based Materials: Establishing Links between Structure, Chemistry, and Performance

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Anastasios John Hart, University of Michigan, Ann Arbor

B151

Program Area: NanoManufacturing

Fabrication of Freeform Hierarchical Micro/Nanostructures by Control of Capillary Interactions with Aligned Carbon Nanotubes

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Youssef Hashash, University of Illinois at Urbana-Champaign

C128

Program Area: Geomechanics and Geomaterials

Towards an Integrated Computational-Experimental Laboratory Testing Framework for Soil Behavior Characterization and Modeling

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Tasnim Hassan, North Carolina State University

D183

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research

NEESR-CR: An Innovative Seismic Performance Enhancement Technique for Steel Building Beam-Column Connections

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Kianoosh Hatami, University of Oklahoma, Norman Campus

C140

Program Area: Geomechanics and Geomaterials

Developing Sensor-Enabled Geosynthetics using Conducting Carbon Networks: A Proof-of-Concept Study

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Taviare Hawkins, University of Massachusetts, Amherst

C203

Program Area: Biomechanics and Mechanobiology

Physical Regulation of Microtubule Biomechanics

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Kurt Hebert, Iowa State University

C47

Program Area: Materials and Surface Engineering

Modeling the Formation of Self-Ordered Nanoporous Anodic Oxides

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

GRANTEE POSTER SESSION SCHEDULE

Jonathan Helm, University of Michigan, Ann Arbor

E166

Program Area: Service Enterprise Systems

Hospital Systems Occupancy Prediction and Control to Increase Access, Smooth Provider Workload, and Reduce Cost

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Clifford Henderson, Georgia Institute of Technology

B57

Program Area: Materials Processing and Manufacturing

Understanding and Exploiting the Transport Behavior of Polymers in Confined Geometries

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Sunderesh Heragu, University of Louisville

B228

Program Area: Manufacturing Enterprise Systems

Collaborative Proposal: EARly-concept Grants for Exploratory Research (EAGER): Design Principles for Warehouses with Autonomous Vehicles (WAVE)

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Henry Hess, Columbia University

C204

Program Area: Biomechanics and Mechanobiology

Accelerated Degradation of Active Nanosystems by Biomolecular Motors

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Illya Hicks, William Marsh Rice University

E237

Program Area: Operations Research

Branch Decomposition Techniques for Submodular Optimization

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Andrew Hirsh, University of Michigan, Ann Arbor

E254

Program Area: Dynamical Systems

Predicting the Torsional Dynamics of DNA

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Dean Ho, Northwestern University

B162

Program Area: NanoManufacturing

CAREER: Scalable Fabrication of Nanodiamond Patch Platforms for Sustained Drug Release

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Erik Hobbie, North Dakota State University, Fargo

C224

Program Area: Biomechanics and Mechanobiology

Nanoscale Structural Rearrangement and Strain Softening in Ultra-Pure Nanotube Membranes

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

GRANTEE POSTER SESSION SCHEDULE

Dorit Hochbaum, University of California, Berkeley

E200

Program Area: Operations Research

New Optimization Techniques in Data Mining

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Dorit Hochbaum, University of California, Berkeley

E201

Program Area: Operations Research

Novel Efficient Clustering Techniques for Data Mining, Ranking, Pattern Recognition and Segmentation of Large Scale Data Sets

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Jose Holguin-Veras, Rensselaer Polytechnic Institute

D136

Program Area: Infrastructure Management and Extreme Events

RAPID: Field Investigation on Post-Disaster Humanitarian Logistic Practices under Cascading Disasters and a Persistent Threat: The Tohoku Earthquake Disasters

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Katja Holttä-Otto, University of Massachusetts, Dartmouth

E23

Program Area: Engineering and Systems Design

Collaborative Research: Extreme Experience Design for Breaking Barriers to Innovation

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

John Hooker, Carnegie Mellon University

E219

Program Area: Operations Research

Multivalued Decision Diagrams in Optimization

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Jennifer Horney, University of North Carolina at Chapel Hill

D117

Program Area: Infrastructure Management and Extreme Events

The Effects of Pre-Disaster Recovery Plans on Post-Disaster Recovery Among Socially Vulnerable Populations

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

David Horsley, University of California-Davis

E137

Program Area: Sensors and Sensing Systems

CAREER: Nonlinear Mechanically Amplified MEMS for Sensing and Communication

Poster Session 5: Wednesday, July 11, 1:00 p.m.–4:00 p.m.

Anette (Peko) Hosoi, Massachusetts Institute of Technology

E255

Program Area: Dynamical Systems

Collaborative Research: Optimal Gaits and Design for Locomoting Systems

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

GRANTEE POSTER SESSION SCHEDULE

Sandra Houston, Arizona State University

C141

Program Area: Geomechanics and Geomaterials

Collaborative Research: Surface Flux for Cracked and Intact Clays for Ponded and Sloped Conditions

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Roman Hryciw, University of Michigan, Ann Arbor

C129

Program Area: Geomechanics and Geomaterials

Laboratory, Field and In-Situ Soil Characterization Through Image Processing

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

S. Jack Hu, University of Michigan, Ann Arbor

B229

Program Area: Manufacturing Enterprise Systems

GOALI: Modeling Product Variety Induced Manufacturing Complexity for Assembly System Design

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Haiying Huang, University of Texas at Arlington

E95

Program Area: Sensors and Sensing Systems

CAREER: Passive Wireless Sensor Networks for Bio-inspired Sensor Skins

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Hanchen Huang, University of Connecticut

C76

Program Area: Materials and Surface Engineering

A New Characteristic Length Scale on Surfaces

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Pao-Tsung Huang, Purdue University

C130

Program Area: Geomechanics and Geomaterials

CAREER: Linking Rheology to Performance—An Integrated Approach to the Evaluation and Design of Trenchless Technology Fluids

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Qiang Huang, University of Southern California

B208

Program Area: Manufacturing Enterprise Systems

Collaborative Research: Nanostructure Growth Process Modeling and Optimal Experimental Strategies for Repeatable Fabrication of Nanostructures for Application in Photovoltaics

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Qiang Huang, University of Southern California

B209

Program Area: Manufacturing Enterprise Systems

In Situ Nanomanufacturing Process Control Through Multiscale Nanostructure Growth Modeling

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Rui Huang, University of Texas at Austin

C17

Program Area: Mechanics of Materials

Nonlinear Mechanics of Graphene-Based Materials

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Samuel Huang, University of Cincinnati

E183

Program Area: Service Enterprise Systems

GOALI: Robust and Efficient Knowledge Discovery With Application in Gene Expression Based Diagnosis

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Wenzhen Huang, University of Massachusetts, Dartmouth

E37

Program Area: Engineering and Systems Design

GOALI: Collaborative Research: A Mode-based Simulation Enabling Model and Methodologies for Geometric Variation and Tolerance Control

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Yinlun Huang, Wayne State University

B41

Program Area: Materials Processing and Manufacturing

Development of a Multiscale Modeling and Simulation Methodology for Predictive Paint Material Application in Automotive Coating

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Yong Huang, Clemson University

B86

Program Area: Manufacturing Machines and Equipment

CAREER: Understanding Process-Induced Damage in Laser-Assisted Cell Direct Writing–Bridging Manufacturing Science and Biomedical Research

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Yong Huang, Clemson University

B87

Program Area: Manufacturing Machines and Equipment

Fabrication of Double-Layer Cellular Spheroid using Acoustic Excitation-Assisted Compound Jetting

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Mont Hubbard, University of California-Davis

E67

Program Area: Control Systems

Human Control of Bicycle Dynamics with Experimental Validation and Implications for Bike Handling and Design

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

James Hubbard, National Institute of Aerospace Associates

E256

Program Area: Dynamical Systems

GOALI: Phased Array Synthetic Jets for Influencing Dynamics of Complex Flows

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

GRANTEE POSTER SESSION SCHEDULE

Daniel Huber, Carnegie Mellon University

D22

Program Area: Civil Infrastructure Systems

Automating the Creation of As-built Building Information Models

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

James Hubner, University of Alabama, Tuscaloosa

E113

Program Area: Sensors and Sensing Systems

CAREER: Molecular Luminescent Sensing for Global Strain Measurement

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Samuel Hunter, Pennsylvania State University, University Park

E24

Program Area: Engineering and Systems Design

Enhancing Creativity with a Concept Generator–Evaluation and Team Training

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Mahmoud Hussein, University of Colorado at Boulder

B199

Program Area: Interdisciplinary Research

IDR: Phononic Surfaces for Flow Control

Poster Session 5: Wednesday, July 11, 1:00 p.m.–4:00 p.m.

Mahmoud Hussein, University of Colorado at Boulder

E291

Program Area: Dynamical Systems

A Building Block Approach to Controlling Phonon Dynamics in Nanostructures

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Tara Hutchinson, University of California-San Diego

D207

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research

NEESR-CR: Full-Scale Structural and Nonstructural Building System Performance During Earthquakes

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

I

Olusegun Ilegbusi, University of Central Florida

B7

Program Area: Materials Processing and Manufacturing

Collaborative Research: Synthesis and Modeling of Novel Nanoparticle-Polymer Composite Films for Sensor Applications

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Jacqueline Isaacs, Northeastern University

B137

Program Area: Nanoscale Interdisciplinary Research Team and Scalable NanoManufacturing

SNM: Designing and Integrating LCA Methods for Nanomanufacturing Scale-up

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Albena Ivanisevic, North Carolina State University

C99

Program Area: Materials and Surface Engineering

Surface Engineering of Gallium Nitride with Biomolecules

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Tetsuya Iwasaki, University of California-Los Angeles

E68

Program Area: Control Systems

Central Pattern Generator (CPG) Control of Locomotion for Adaptive Gait Generation

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

J

Sheldon Jacobson, University of Illinois at Urbana-Champaign

D137

Program Area: Infrastructure Management and Extreme Events

New Approaches to Protecting Transportation Infrastructure

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Anand Jagota, Lehigh University

B200

Program Area: Interdisciplinary Research

IDR: Coupling Theory and Experiment to Quantify Biomolecule-Nanomaterial Interactions

Poster Session 5: Wednesday, July 11, 1:00 p.m.–4:00 p.m.

Patrick Jaillet, Massachusetts Institute of Technology

E202

Program Area: Operations Research

Online Optimization for Dynamic Resource Allocation Problems

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Mona Jarrahi, University of Michigan, Ann Arbor

E128

Program Area: Sensors and Sensing Systems

MEMS Reconfigurable Subwavelength Metallic Slits for Broadband Terahertz Modulation

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Iwona Jasiuk, University of Illinois at Urbana-Champaign

C34

Program Area: Mechanics of Materials

Image-Based Characterization and Multi-Scale Modeling of Bone

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Suhada Jayasuriya, University of Central Florida

E88

Program Area: Control Systems

EAGER: Local Control Strategies for Predicting Emergent Behavior and Cooperative Control in Real Time under Minimal Communication

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Seokho Jeong, Virginia Polytechnic Institute and State University

D164

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research
NEESR-CR: Topographic Effects in Strong Ground Motion—From Physical and Numerical Modeling to Design
Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Peng Jiang, University of Florida

B184

Program Area: NanoManufacturing
Scalable Self-Assembly of Colloidal Nanoparticles
Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Xiaoning Jiang, North Carolina State University

E138

Program Area: Sensors and Sensing Systems
Flexoelectric Strain Gradient Sensors- a New Sensing Technology for In-situ Structure Health Monitoring
Poster Session 5: Wednesday, July 11, 1:00 p.m.–4:00 p.m.

Andrew Johnson, Texas A&M University

E167

Program Area: Service Enterprise Systems
EAGER: Engineering Incentives for Health Care Systems
Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Drew Johnson, University of Texas at San Antonio

C120

Program Area: Geomechanics and Geomaterials
Plant Root Templated GeoTextiles
Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Mihailo Jovanovic, University of Minnesota, Twin Cities

E55

Program Area: Control Systems
CAREER: Enabling Methods for Modeling and Control of Transitional and Turbulent Wall-Bounded Shear Flows
Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Mihailo Jovanovic, University of Minnesota, Twin Cities

E56

Program Area: Control Systems
Collaborative Research: Algorithms for Design of Structured Distributed Controllers with Application to Large-Scale Vehicular Formations
Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

John Judge, Catholic University of America

E272

Program Area: Dynamical Systems
CAREER: Dynamics of Micro- and Nanomechanical Resonator Arrays
Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Maria Juenger, University of Texas at Austin

C162

Program Area: Structural Materials and Mechanics

Inorganic Polymers for Sustainable Civil Infrastructure

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Anak Agung Julius, Rensselaer Polytechnic Institute

E69

Program Area: Control Systems

Collaborative Research: Motion Control of Bacteria-Powered Microrobots

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Yung Joon Jung, Northeastern University

B163

Program Area: NanoManufacturing

Highly Organized Two and Three Dimensional Singlewalled Carbon Nanotubes- Polymer Hybrid Structures for Diverse Flexible Devices and Systems

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

K

Pierre Kabamba, University of Michigan, Ann Arbor

E77

Program Area: Control Systems

GOAL: Control of Cyclic Systems—Theory, Applications, and Experiments

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Kyriaki Kalaitzidou, Georgia Institute of Technology

B97

Program Area: Manufacturing Machines and Equipment

Freeform Fabrication of Multifunctional Nanocomposites via Selective Laser Sintering

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Vibha Kalra, Drexel University

B58

Program Area: Materials Processing and Manufacturing

EAGER: Confined Self Assembly of Fully Conjugated Rod-Rod Diblock Copolymers in Nanofibers

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Vineet Kamat, University of Michigan, Ann Arbor

D32

Program Area: Civil Infrastructure Systems

A Robust Method for Resolving Incorrect Visual Occlusion in Dynamic Augmented Reality Environments of Animated Engineering Operations

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Vineet Kamat, University of Michigan, Ann Arbor **D33**

Program Area: Civil Infrastructure Systems

Context-Aware Information Access for Rapid On-Site Decision Making in Construction, Maintenance, and Inspection of Civil Infrastructure Systems

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Edwin Kan, Cornell University **E96**

Program Area: Sensors and Sensing Systems

Non-Self-Jamming Passive Telemetry with Sensor Integration

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Shiv Kapoor, University of Illinois at Urbana-Champaign **B88**

Program Area: Manufacturing Machines and Equipment

Design of CNT Composite Microstructural Characteristics for Enhanced Engineering Functionality and Manufacturability

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Levent Kara, Carnegie Mellon University **E25**

Program Area: Engineering and Systems Design

Creativity Meets Constraints–Sketch-Based CAD for Industrial Designers with Engineering Constraint Management

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Adam Kareem, University of Maryland, College Park **C100**

Program Area: Materials and Surface Engineering

Influence of thin-fluid-film effects on surface characterization with dynamic atomic force microscopy

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Adam Kareem, University of Maryland, College Park **C205**

Program Area: Biomechanics and Mechanobiology

CAREER: Sub-NanoNewton Force Spectroscopy in Liquids with Dual-Frequency-Modulation AFM

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Anette Karlsson, University of Delaware **C18**

Program Area: Mechanics of Materials

The Mechanics of Debonding of Foam Core Sandwich Structure Under Cyclic Loading

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Jagannadham Kasichainula, North Carolina State University **B8**

Program Area: Materials Processing and Manufacturing

EAGER: Processing and Characterization of Novel Indium-graphene and Copper-graphene Composites for Heat Spreader Applications

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

GRANTEE POSTER SESSION SCHEDULE

Edward Kavazanjian, Arizona State University

C131

Program Area: Geomechanics and Geomaterials

Microbially-Induced Cementation of Sands by Denitrification

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Kazem Kazerounian, University of Connecticut

C225

Program Area: Biomechanics and Mechanobiology

CAREER: Hierarchies of Repair in Damaged Bone—A Role for Osteocytes

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Kazem Kazerounian, University of Connecticut

E38

Program Area: Engineering and Systems Design

A Mechanics Framework for the Analysis and Design of Protein Based Nano Machines

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Steven Keating, Massachusetts Institute of Technology

E26

Program Area: Engineering and Systems Design

EAGER: Bio-Beams—Functionally Graded Rapid Design & Fabrication

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Leehyun Keel, Tennessee State University

E78

Program Area: Control Systems

A Collaborative Research on Multivariable Fixed Order Controller Synthesis and Design from Data

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Scott Kelly, University of North Carolina at Charlotte

E257

Program Area: Dynamical Systems

Constrained Lagrangian and Hamiltonian Mechanics in Fluid-Body Interactions: Analytical Modeling and Computational Methods

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Scott Kelly, University of North Carolina at Charlotte

E258

Program Area: Dynamical Systems

Collaborative Research: Manipulation of Suspended Microparticles via Localized Fluid Boundary Dynamics: Modeling, Simulation, and Experiments

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

James Kendra, University of Delaware

D138

Program Area: Infrastructure Management and Extreme Events

RAPID: The Tohoku Catastrophe: Volunteers and Non-Profit Organizations in Post-Kobe Japan

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

James Kendra, University of Delaware
D165
Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research

Workshop on Deploying Post-Disaster Quick-Response Reconnaissance Teams: Methods, Strategies, and Needs

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Benjamin Keselowsky, University of Florida
C206
Program Area: Biomechanics and Mechanobiology

Mechanical Strain Modulation of Dendritic Cell-Directed Adaptive Immune Responses

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Kapil Khandelwal, University of Notre Dame
D75
Program Area: Hazard Mitigation and Structural Engineering

CAREER: Multiscale Topology Optimization: Design of Structural-Material Systems Under Extreme Events

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Jeffrey Kharoufeh, University of Pittsburgh
B210
Program Area: Manufacturing Enterprise Systems

Collaborative Research: Adaptive Maintenance Planning Based on Evolving Residual Life Distributions

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Milind Khire, Michigan State University
C142
Program Area: Geomechanics and Geomaterials

A Lattice Boltzmann Based Model for Predicting Unsaturated Flow through Soil Macropores and Capillary Pores

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Behrokh Khoshnevis, University of Southern California
B107
Program Area: Manufacturing Machines and Equipment

Digital Fabrication of High-Temperature Metals Using Selective Inhibition of Sintering

Poster Session 5: Wednesday, July 11, 1:00 p.m.–4:00 p.m.

Gap-Yong Kim, Iowa State University
B26
Program Area: Materials Processing and Manufacturing

Novel Manufacturing of Bio-inspired Metal Matrix Composites by Semisolid Forming-Joining

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

MinJun Kim, Drexel University
B173
Program Area: NanoManufacturing

CAREER: The Integration of Biomolecular Motors for Bacterial Actuation, Sensing, and Transport (BAST) at Micro/Nanoscale

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

GRANTEE POSTER SESSION SCHEDULE

Nam Kim, University of Florida

E5

Program Area: Engineering and Systems Design

Uncertainty Reduction by Testing, Inspection, Health Monitoring, and Maintenance (THIM) in Probabilistic Product Design

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Seong Kim, Pennsylvania State University, University Park

C101

Program Area: Materials and Surface Engineering

Understanding and Preventing Frictional Polymer Formation in MEMS

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Brad Kinsey, University of New Hampshire

B42

Program Area: Materials Processing and Manufacturing

GOAL: Characterization, Modeling, and Optimization of Magnetic Pulse Welding Processes

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Diego Klabjan, Northwestern University

B230

Program Area: Manufacturing Enterprise Systems

Approximate Dynamic Programming in Complex Multi-Echelon Inventory and Production Systems

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

William Klug, University of California-Los Angeles

C226

Program Area: Biomechanics and Mechanobiology

CAREER: Membrane-Protein Interactions and the Mechanics of Cell Organelles

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Melissa Knothe Tate, Case Western Reserve University

C244

Program Area: Biomechanics and Mechanobiology

Mechanical Modulation of Stem Cell Shape and Fate

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Suneel Kodambaka, University of California-Los Angeles

C59

Program Area: Materials and Surface Engineering

Collaborative Research: Engineering the Morphology and Microstructure of Group III-V Compound Semiconducting Nanowires

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Zhenyu (James) Kong, Oklahoma State University

E39

Program Area: Engineering and Systems Design

GOAL: Collaborative Research: A Mode-Based Simulation Enabling Model and Methodologies for Geometric Variation and Tolerance Control

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Nikhil Koratkar, Rensselaer Polytechnic Institute

C207

Program Area: Biomechanics and Mechanobiology

Collaborative: Brittle Epoxies Rendered Ductile- Crazing in Thermosetting Epoxy Nanocomposites

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Nikhil Koratkar, Rensselaer Polytechnic Institute

C208

Program Area: Biomechanics and Mechanobiology

Next Generation Li-Ion Rechargeable Batteries Featuring Nano-Engineered Anode Architectures

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Ioannis Korkolis, University of New Hampshire

B27

Program Area: Materials Processing and Manufacturing

GOAL: Fundamental Studies and Modeling of Pulsed Tube Hydroforming

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Konstantin Kornev, Clemson University

C77

Program Area: Materials and Surface Engineering

Design and Surface Engineering of Nanofiber-based Probes

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Marisol Koslowski, Purdue University

C102

Program Area: Materials and Surface Engineering

Microstructural Evolution of Molecular Crystals

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Sridhar Kota, University of Michigan, Ann Arbor

E6

Program Area: Engineering and Systems Design

Collaborative Research: Design Framework for Biomimetic Elasto-Fluidic Systems

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Steven Kramer, University of Washington

D184

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research

NEESR-CR: Evolutionary Intensity Measures for More Accurate and Informative Liquefaction Hazard Evaluation

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Matthew John Krane, Purdue University

B28

Program Area: Materials Processing and Manufacturing

GOAL: The Origin of Slag-Metal Interface Defects in Electroslag Remelting

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Ananth Krishnamurthy, University of Wisconsin, Madison

B204

Program Area: Manufacturing Enterprise Systems

i-PICS: Integration of Advance Demand Information with Pull-Type Production Control Systems

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Swaminathan Krishnan, California Institute of Technology

D97

Program Area: Hazard Mitigation and Structural Engineering

Quantifying the Risk Posed to Tall Steel Frame Buildings in Southern California from Earthquakes on the San Andreas Fault

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

James Krzanowski, University of New Hampshire

B120

Program Area: Manufacturing Machines and Equipment

A New Strategy for the Design of Wear Resistant Nitride Coatings for Dry Machining

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Simge Kucukyavuz, Ohio State University

B231

Program Area: Manufacturing Enterprise Systems

Mixed-Integer Optimization for Multi-Item Multi-Echelon Production and Distribution Planning

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Simge Kucukyavuz, Ohio State University

E220

Program Area: Operations Research

CAREER: Mixed-Integer Optimization under Joint Chance Constraints

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Ashok Kumar, University of South Florida

B108

Program Area: Manufacturing Machines and Equipment

Study of Reliability and Modeling for Process Optimization and Yield Improvements in Chemical Mechanical Planarization

Poster Session 5: Wednesday, July 11, 1:00 p.m.–4:00 p.m.

Ashok Kumar, University of South Florida

B109

Program Area: Manufacturing Machines and Equipment

GOALI/Collaborative Research: Interface Engineered Diamond Coatings for Dry Machining

Poster Session 5: Wednesday, July 11, 1:00 p.m.–4:00 p.m.

Sanjay Kumar, University of California, Berkeley

C227

Program Area: Biomechanics and Mechanobiology

CAREER: Microscale Mechanobiology of Actomyosin Stress Fiber Bundles: An Integrated Program for Research and Education in Cellular Bioengineering

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

GRANTEE POSTER SESSION SCHEDULE

Yue Kuo, Texas A&M University

B9

Program Area: Materials Processing and Manufacturing

A Novel Fabrication Process for Polysilicon Thin Film Solar Cells

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Yue Kuo, Texas A&M University

B211

Program Area: Manufacturing Enterprise Systems

Collaborative Research: Nonparametric Bayesian Modeling of Reliability of Nanoelectronics

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Yahya Kurama, University of Notre Dame

D208

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research

NEESR-CR: Post-Tensioned Coupled Shear Wall Systems

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Pradeep Kurup, University of Massachusetts, Lowell

D45

Program Area: Geotechnical Engineering

A Hybrid Electronic Tongue for Geoenvironmental Site Characterization

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Bruce Kutter, University of California-Davis

D166

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research

NEESR-CR: Design of Soil and Structure Compatible Yielding to Improve System Performance

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Changhyun Kwon, SUNY at Buffalo

D118

Program Area: Infrastructure Management and Extreme Events

Collaborative Research: Regulating Hazardous Materials Transportation by Multi-Objective Dual Toll Pricing

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Eil Kwon, University of Minnesota, Duluth

C163

Program Area: Structural Materials and Mechanics

RUI: Self-sensing Concrete Pavement

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Stelios Kyriakides, University of Texas at Austin

C35

Program Area: Mechanics of Materials

Mechanical Behavior and Crushing of Cellular Materials

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Jeffrey Kysar, Columbia University

C245

Program Area: Biomechanics and Mechanobiology

Monoatomically Thin Films: Nonlinear Mechanical Response and Mechanical-Electrical Coupling

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

L

Guanghui Lan, University of Florida

E238

Program Area: Operations Research

Theory and Applications of Stochastic First-order Methods for Large-scale Stochastic Convex Optimization

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Chris Landry, Pennsylvania State University, University Park

D53

Program Area: Geotechnical Engineering

CAREER: A Study of Predominant Flow Mechanisms and Parameters Controlling Contaminant Migration in Fractured Heterogeneous Rocks

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Cedric Langbort, University of Illinois at Urbana-Champaign

E89

Program Area: Control Systems

EAGER: Extensible Linear Distributed Controllers for Large Multi-Input-Multi-Output Systems, with Applications to Control of Networked Printers

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

John Lannutti, Ohio State University

B59

Program Area: Materials Processing and Manufacturing

Laser Machined Vascular Wall Engineering for Blood Vessel Manufacturing

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Samuel Lasley, Virginia Polytechnic Institute and State University

D61

Program Area: Geotechnical Engineering

CAREER: Determination of Performance-Based Earthquake Engineering Parameters using Paleoseismic Techniques

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Samuel Lasley, Virginia Polytechnic Institute and State University

D62

Program Area: Geotechnical Engineering

Energy-based Approach for Evaluating and Mitigating Liquefaction Potential

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Jorge Laval, Georgia Institute of Technology

D8

Program Area: Civil Infrastructure Systems

CAREER: Impact of Freeway Geometric Design on Congestion Characteristics

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Kam Leang, University of Nevada, Reno

B185

Program Area: NanoManufacturing

A Novel Multifunctional SPM Probe with Modular Quick-Change Tips for Fully Automated Probe-Based Nanomanufacturing

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Deborah Leckband, University of Illinois at Urbana-Champaign

C209

Program Area: Biomechanics and Mechanobiology

Force Transduction and Tension Sensing at Intercellular Junctions

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Eva Lee, Georgia Institute of Technology

E203

Program Area: Operations Research

Investigations in Mixed Integer Programming

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Taeyoung Lee, Florida Institute of Technology

E259

Program Area: Dynamical Systems

Collaborative Research: Computational Geometric Uncertainty Propagation for Hamiltonian Systems on a Lie Group

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Justin Legleiter, West Virginia University

C228

Program Area: Biomechanics and Mechanobiology

CAREER: The Role of Mechanical Properties in Amyloid Binding to Cellular Surfaces

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Shuting Lei, Kansas State University

B98

Program Area: Manufacturing Machines and Equipment

Defect Free and Robust Microstructuring Using Femtosecond Axicon-lens-focused Beam (FAB) with Application Focus in Thin Film Solar Cell Manufacturing

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Yu Lei, University of Connecticut

B201

Program Area: Interdisciplinary Research

IDR/Collaborative Research: Magnetic Beads Linked Immunoassay Meets Micro Coulter Counter: Novel Multiplexed Biosensor System for Food Safety

Poster Session 5: Wednesday, July 11, 1:00 p.m.–4:00 p.m.

GRANTEE POSTER SESSION SCHEDULE

Tanmay Lele, University of Florida

C246

Program Area: Biomechanics and Mechanobiology

Maintenance of Tension in Dynamic Stress Fibers

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Tanmay Lele, University of Florida

C247

Program Area: Biomechanics and Mechanobiology

CAREER: The Function of Nuclear-Cytoskeletal Tethers in Cell Mechanosensing

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Anne Lemnitzer, University of California-Irvine

D167

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research

RAPID: U.S. Instrumentation and Data Processing of a Large-Scale Experiment on Soil-Structure Interaction of Underground Structures on the E-Defense Shake Table in Miki, Japan

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Donald Leo, Virginia Polytechnic Institute and State University

E114

Program Area: Sensors and Sensing Systems

Auditory Mimics using Membrane-based Biomolecular Arrays

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Kristina Lerman, University of Southern California

D139

Program Area: Infrastructure Management and Extreme Events

INTEROP: Rapid Deployment of Humanitarian Assistance Social Networks for ad hoc Geospatial Data Sharing (GeoNets)

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Zayd Leseman, University of New Mexico

E292

Program Area: Dynamical Systems

Collaborative Research: Improvement of MEMS Performance by Structural Vibrations–Theory and Practical Implementations

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Susan Lessner, University of South Carolina at Columbia

C210

Program Area: Biomechanics and Mechanobiology

Novel Experimental and Theoretical Approaches to Understand Biomechanics of Atherosclerotic Plaque Rupture

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Ming Leu, Missouri University of Science and Technology

B121

Program Area: Manufacturing Machines and Equipment

GOAL: Freeze-form Extrusion Fabrication of Composite Structures Using Ultra High Temperature Ceramics and Refractory Metals

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Ming Leu, Missouri University of Science and Technology

B122

Program Area: Manufacturing Machines and Equipment

Bio-Inspired Design, Fabrication and Testing of Bipolar Plates for PEM Fuel Cells

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Retsef Levi, Massachusetts Institute of Technology

E221

Program Area: Operations Research

CAREER: New Algorithmic Approaches to Computationally Challenging Stochastic Supply Chain and Revenue Management Models

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Scott Levin, Johns Hopkins University

E168

Program Area: Service Enterprise Systems

Forecasting Demand for Pediatric Critical Care

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Mark Lewis, Cornell University

E184

Program Area: Service Enterprise Systems

Upgrades, Reneging and Retrials: Advanced Dynamic Control of Service Systems

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Changzhi Li, Texas Tech University

E151

Program Area: Sensors and Sensing Systems

Software-Defined MIMO Radar Fusion for Structural Health Monitoring Sensor Network

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Christopher Li, Drexel University

C176

Program Area: Structural Materials and Mechanics

Depletion Mechanisms of Antioxidants in Polyethylene-Clay Nanocomposites

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Guoqiang Li, Louisiana State University & Agricultural and Mechanical College

C19

Program Area: Mechanics of Materials

A Self-Healing Smart Syntactic Foam

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

GRANTEE POSTER SESSION SCHEDULE

Jacqueline Li, CUNY City College

B202

Program Area: Interdisciplinary Research

IDR: Optimization of Nanodielectric Composites for Energy Storage Applications

Poster Session 5: Wednesday, July 11, 1:00 p.m.–4:00 p.m.

Ji Li, University of Connecticut

E27

Program Area: Engineering and Systems Design

EAGER: Visualization of Protein Folding for Nano-Machine Design

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Jiangyu Li, University of Washington

B10

Program Area: Materials Processing and Manufacturing

Processing Nanocrystalline Thermoelectric Oxides for High Efficiency Energy Harvesting

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Jing Li, Arizona State University

B212

Program Area: Manufacturing Enterprise Systems

Regression-based Quality Improvement in Complex Systems with Consideration of Data Uncertainty

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Jing Li, Lehigh University

E293

Program Area: Dynamical Systems

New Model and Methodology for Signal Estimation and Decoding

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Jingshan Li, University of Wisconsin, Madison

E169

Program Area: Service Enterprise Systems

EAGER: Improvability Theory for Hospital Emergency Department: A System-Theoretic Method to Reduce Crowding

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Jr-Shin Li, Washington University

E79

Program Area: Control Systems

CAREER: Ensemble Control with Applications to Spectroscopy, Imaging, and Computation

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Mo Li, Georgia Institute of Technology

C36

Program Area: Mechanics of Materials

EAGER: Constitutive Relations in Amorphous Metals

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Teng Li, University of Maryland, College Park

B152

Program Area: NanoManufacturing

Collaborative Research: Deciphering the Reliability of Nano Ceramic Films on Polymer Substrates: A Mechanistic Study

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Teng Li, University of Maryland, College Park

E129

Program Area: Sensors and Sensing Systems

Graphene-based Ultrasensitive Nanostructures

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Wei Li, University of Texas at Austin

B164

Program Area: NanoManufacturing

GOALI/Collaborative Research: Fabrication of Multifunctional Nanofoams from Polymer Nanocomposites

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Xiaodong Li, University of South Carolina at Columbia

B47

Program Area: Materials Processing and Manufacturing

High Throughput Manufacturing of Carbide Nanowire-Carbon Microfiber Hybrid Structures and Polymer Composites from Cotton Textiles

Poster Session 5: Wednesday, July 11, 1:00 p.m.–4:00 p.m.

Yue Li, Michigan Technological University

D98

Program Area: Hazard Mitigation and Structural Engineering

Integration of Mainshock-Aftershock Sequences Into Performance-Based Engineering Using Publicly Available NEEShub Data

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Zhichao Li, North Carolina Agricultural & Technical State University

B110

Program Area: Manufacturing Machines and Equipment

CAREER: Fundamental Research on Rotary Ultrasonic Machining of Dental Ceramic Materials

Poster Session 5: Wednesday, July 11, 1:00 p.m.–4:00 p.m.

Daan Liang, Texas Tech University

D119

Program Area: Infrastructure Management and Extreme Events

Development of a Quantitative Model for Measuring Regional Economic Resilience to Hurricanes

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Daan Liang, Texas Tech University

D120

Program Area: Infrastructure Management and Extreme Events

H12: A New Measure of Hurricane Impact for Innovation in Enterprise Risk Management

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Shuangshuang Liang, Texas A&M University

E57

Program Area: Control Systems

CAREER: Model-Based Control and Diagnostics for Transcritical CO₂ Vapor Compression Cycle Systems

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Haitao Liao, University of Tennessee, Knoxville

B213

Program Area: Manufacturing Enterprise Systems

Exploration of a Statistically Accurate and Energy Efficient Accelerated Testing Methodology

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Peter Liaw, University of Tennessee, Knoxville

C60

Program Area: Materials and Surface Engineering

Surface Modification of Bulk-Metallic Glasses by a Laser-Peening Process

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Andrew Lim, University of California, Berkeley

E239

Program Area: Operations Research

Coordinating Multiple Decision Makers in a Service Environment

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Liwei Lin, University of California, Berkeley

B174

Program Area: NanoManufacturing

Direct Synthesis, Assembly and Integration of Graphene via Micro CVD

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Yingzi (Lynn) Lin, Northeastern University

E139

Program Area: Sensors and Sensing Systems

CAREER: Bridging Cognitive Science and Sensor Technology: Non-intrusive and Multi-modality Sensing in Human-Machine Interactions

Poster Session 5: Wednesday, July 11, 1:00 p.m.–4:00 p.m.

Zhiqun Lin, Georgia Institute of Technology

B186

Program Area: NanoManufacturing

Collaborative Research: Large-Scale Nanomanufacturing of Well-Positioned and Highly Aligned DNA Wires from a Capillary Bridge

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Michael Lindell, Texas A&M University

D140

Program Area: Infrastructure Management and Extreme Events

RAPID: Immediate Behavioral Response to Earthquakes in New Zealand and Japan

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Vadim Linetsky, Northwestern University

E204

Program Area: Operations Research

Multivariate Dynamic Stochastic Models of Credit Risk

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Julie Linsey, Texas A&M University

E7

Program Area: Engineering and Systems Design

Enhancing Engineering Innovation through Physical Representation: Identifying the Cognitive Enhancements

Provided by Representation and Creating Novel Design Methods

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Cliff Lissenden, Pennsylvania State University, University Park

E97

Program Area: Sensors and Sensing Systems

Continuous Piezoelectric Health Monitoring Systems Based on Ultrasonic Guided Waves

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Philip Liu, Cornell University

D185

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research

NEESR-SD: Measuring Runup and Bed Shear Stress Using Long Stroke Wave-Makers

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Zhaowei Liu, University of California-San Diego

B138

Program Area: Nanoscale Interdisciplinary Research Team and Scalable NanoManufacturing

SNM: Continuous and Scalable Nanomanufacturing for 3-Dimensional Functional Biomedical Devices

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Stefan Llewellyn Smith, University of California-San Diego

E260

Program Area: Dynamical Systems

Collaborative Research: Beyond Point Vortices: Moving Singularities and Wave Fields in Fluid Mechanics

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Rasaratnam Logendran, Oregon State University

B232

Program Area: Manufacturing Enterprise Systems

A Generalized Framework for Scheduling of Printed Circuit Boards

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Kenneth Loh, University of California-Davis

E115

Program Area: Sensors and Sensing Systems

Bio-Inspired Sensing using Optoelectronic Nanocomposites (BISON)

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Hongbing Lu, University of Texas at Dallas

C103

Program Area: Materials and Surface Engineering

Collaborative Research: Measurements of Yield Strength and Local Viscoelastic Properties Using Nanoparticle Embedment Methods

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Kathy Lu, Virginia Polytechnic Institute and State University

B43

Program Area: Materials Processing and Manufacturing

Multi-Scale Study of Nanoparticle Sintering

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Hongbing Lu, University of Texas at Dallas

C78

Program Area: Materials and Surface Engineering

Collaborative Research: Characterization and Modeling of Natural Fiber Polymer Matrix Composites for Correlating Natural Fiber/Matrix Morphology with Viscoelastic Properties

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Wu Lu, Ohio State University

E130

Program Area: Sensors and Sensing Systems

III Nitride NEMS Devices for Chemical and Biological Sensing

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Gunnar Lucko, Catholic University of America

D23

Program Area: Civil Infrastructure Systems

Financial Analysis and Optimization for Linear Scheduling Model of Construction Projects with Integrated Singularity Functions

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

James Luedtke, University of Wisconsin, Madison

E185

Program Area: Service Enterprise Systems

Collaborative Research: Staffing and Routing in Service Systems with Uncertain Arrival Rates: An Integrated Stochastic Programming and Asymptotic Analysis Approach

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

James Luedtke, University of Wisconsin, Madison

E240

Program Area: Operations Research

CAREER: Risk Management via Stochastic Programming: Models, Computation, and Applications

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Peter Luh, University of Connecticut

D141

Program Area: Infrastructure Management and Extreme Events

Building Emergency Evacuation: Innovative Modeling and Optimization

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Cheng Luo, University of Texas at Arlington

B60

Program Area: Materials Processing and Manufacturing

Generation Of Sidewall Patterns Using A Thermal Shape-Memory Polymer

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Craig Lusk, University of South Florida

E8

Program Area: Engineering and Systems Design

Uncertainty Quantification for the Kinematic Approach to Compliant Mechanism Design

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Yuri Lvov, Louisiana Tech University

B165

Program Area: NanoManufacturing

Tubule Nanocontainers for Corrosion Inhibitors

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Christopher Lynch, University of California-Los Angeles

E140

Program Area: Sensors and Sensing Systems

Piezoelectric Sensor/Actuator Rosettes For Noise And Vibration Control

Poster Session 5: Wednesday, July 11, 1:00 p.m.–4:00 p.m.

Jerome Lynch, University of Michigan, Ann Arbor

D209

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research

NEESR-SG: Damage Detection and Health Monitoring of Buried Pipelines after Earthquake-Induced Ground Movement

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Jerome Lynch, University of Michigan, Ann Arbor

E141

Program Area: Sensors and Sensing Systems

CAREER: Nanoengineered Sensing Skins for Structural Health Monitoring—An Integrated Research and Education Career Experience

Poster Session 5: Wednesday, July 11, 1:00 p.m.–4:00 p.m.

Patrick Lynett, Texas A&M University

D168

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research

NEESR-SG: TSUNAMOS: A Validated, Multi-Scale Tsunami Model for Hybrid Numerical-Experimental Simulation

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

M

Hideo Mabuchi, Stanford University

E70

Program Area: Control Systems

Tracking Individual Biomolecules via Fluorescence Modulation and Feedback

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Norbert Maerz, Missouri University of Science and Technology

C121

Program Area: Geomechanics and Geomaterials

Collaborative Research: Extracting 3-D Fracture Orientations for Rock Failure Analysis by Combining Optical Imaging and LIDAR Scanning Technologies

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Stephen Mahin, University of California, Berkeley

D186

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research

Coordinating Workshops for the NEES/E-Defense Collaborative Research Program in Earthquake Engineering (Phase 2)

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Gnanamanikam Mahinthakumar, North Carolina State University

D34

Program Area: Civil Infrastructure Systems

An Adaptive Leak Detection and Risk Analysis Framework for Urban Water Distribution Systems

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Brian Maicke, University of Tennessee Space Institute

E294

Program Area: Dynamical Systems

GOALI: Predicting Acoustic Wave Dynamics in Solid and Hybrid Rocket Motors

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Lisa Maillart, University of Pittsburgh

E170

Program Area: Service Enterprise Systems

Optimizing Implanted Cardiac Device Follow-Up Care

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Lisa Maillart, University of Pittsburgh

E171

Program Area: Service Enterprise Systems

Markov Decision Process Models for Optimizing Vaccine Administration

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

GRANTEE POSTER SESSION SCHEDULE

Richard Malak, Texas A&M University

E40

Program Area: Engineering and Systems Design

GOALI/Collaborative Research: A Methodology for Utility-Based Decision Making in Large Design Organizations Using Empirically-Derived Risk Indicators

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Arif Malik, Saint Louis University

B123

Program Area: Manufacturing Machines and Equipment

GOALI: Reliability-Based Design and Operation of Metal Rolling Mills using Bayesian Theory and a New Rolling Model

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Rajib Mallick, Worcester Polytechnic Institute

C152

Program Area: Structural Materials and Mechanics

Collaborative Research: Use of Novel Heat Spreader Technology for Reduction of High Temperature Related Rutting in Asphalt Pavements

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Noah Malmstadt, University of Southern California

B175

Program Area: NanoManufacturing

Engineered Microfluidic Mixing for Green Nanocrystal Manufacturing

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Ajay Malshe, University of Arkansas

B89

Program Area: Manufacturing Machines and Equipment

Collaborative Research: Design and Fundamental Understanding of Advanced Minimum Quantity Lubrication (MQL) Machining using Nanolubricants

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Antoinette Maniatty, Rensselaer Polytechnic Institute

C5

Program Area: Mechanics of Materials

GOALI/Collaborative Research: Understanding Cracking and Defect Formation During AlN Crystal Growth

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Dinesh Manocha, University of North Carolina at Chapel Hill

E41

Program Area: Engineering and Systems Design

GOALI: Digital Layout and Assembly of Large CAD Structures

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Majid Manzari, George Washington University

D46

Program Area: Geotechnical Engineering

Multiscale Meshfree Analysis of Failure in Geostuctures Founded on or Containing Liquefiable Soils

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Scott Mao, University of Pittsburgh

C37

Program Area: Mechanics of Materials

Integrated Experiment and Atomistic Computation on Moisture-Induced Interfacial Embrittlement

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Scott Mao, University of Pittsburgh

C229

Program Area: Biomechanics and Mechanobiology

Nanoscale Characterization of Nanostructured Thin Film with Ultrahigh Strength and Ductility

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Francois Margot, Carnegie Mellon University

E186

Program Area: Service Enterprise Systems

Real Option Management of Commodity and Energy Conversion Assets

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Laurence Marks, Northwestern University

C61

Program Area: Materials and Surface Engineering

Tribology in Full View

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Maria Marshall, Purdue University

D142

Program Area: Infrastructure Management and Extreme Events

Small Business Demise and Recovery After a Natural Disaster

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Pier Marzocca, Clarkson University

E295

Program Area: Dynamical Systems

Efficient Reduced-Order Modeling Tools for Aeroelastic Predictions in Super Long-Span Bridges

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Stephen Mascaro, University of Utah

E80

Program Area: Control Systems

Optimal Control of Actuator Arrays with Electric and Thermofluidic Inputs

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Forrest Masters, University of Florida

D76

Program Area: Hazard Mitigation and Structural Engineering

CAREER: Behavior of Hurricane Wind and Wind-Driven Rain in the Coastal Suburban Roughness Sublayer

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

GRANTEE POSTER SESSION SCHEDULE

Carlos Mastrangelo, University of Utah

E98

Program Area: Sensors and Sensing Systems

Particle Imaging Manometry

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Karel Matous, University of Notre Dame

C38

Program Area: Mechanics of Materials

EAGER: Multiscale Modeling of Heterogeneous Interfaces

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Fabio Matta, University of South Carolina at Columbia

D99

Program Area: Hazard Mitigation and Structural Engineering

Collaborative Research: Resilient and Sustainable Engineered Fiber-Reinforced Earthen Masonry for High Wind Regions

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Konstantin Matveev, Washington State University

E261

Program Area: Dynamical Systems

Dynamics of Novel Air-Assisted Marine Vehicles

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

George Mavroeidis, Catholic University of America

D77

Program Area: Hazard Mitigation and Structural Engineering

CAREER: A Comprehensive Approach for Investigating the Effects of Near-Fault Dynamic Ground Deformations on Engineering Structures

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Constantinos Mavroidis, Northeastern University

E116

Program Area: Sensors and Sensing Systems

Customizable Sensors for Humans Using an Integrated Polymer: C-SHIP

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Peter May, University of Washington

D9

Program Area: Civil Infrastructure Systems

Collaborative Research: Critical Infrastructure Policy

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

J. Michael McCarthy, University of California-Irvine

E9

Program Area: Engineering and Systems Design

Geometric Synthesis of Articulated Systems

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

John McCartney, University of Colorado at Boulder

D54

Program Area: Geotechnical Engineering

Soil Structure Interaction in Geothermal Foundations

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Leigh McCue-Weil, Virginia Polytechnic Institute and State University

E262

Program Area: Dynamical Systems

CAREER: A Unified Research and Outreach Program in Nonlinear Vessel Dynamics

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Cole McDaniel, California Polytechnic State University

D169

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research

NEESR: Ultra-Low Forced Vibration Testing

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Brian McFall, Georgia Institute of Technology

D187

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research

NEESR-CR: Tsunami Generation by Landslides: Integrating Laboratory Scale Experiments, Numerical Models and Natural Scale Applications

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Laura McLay, Virginia Commonwealth University

D121

Program Area: Infrastructure Management and Extreme Events

CAREER: Extreme Weather Events and Emergency Medical Services: A Discrete Optimization Modeling Framework

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Kurt McMullin, San Jose State University

D188

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research

NEESR-SG: Experimental Determination of Performance of Drift-Sensitive Nonstructural Systems under Seismic Loading

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Laine Mears, Clemson University

B99

Program Area: Manufacturing Machines and Equipment

CAREER: Model-Based Control of Machining Processes and Scalability for Manufacturing System Control

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Sanjay Mehrotra, Northwestern University

E178

Program Area: Service Enterprise Systems

Multi-objective Robust Stochastic Planning and Scheduling of Healthcare Service Providers

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Sanjay Mehrotra, Northwestern University
E179
Program Area: Service Enterprise Systems

Addressing Geographical Disparities in Transplant Organ Accessibility Across United States

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Sanjay Mehrotra, Northwestern University
E222
Program Area: Operations Research

Distribution and Moment-Robust Optimization Models and Algorithms

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Sanjay Mehrotra, Northwestern University
E223
Program Area: Operations Research

Models and Algorithms for Risk Adjusted Optimization with Robust Utilities

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Carol Menassa, University of Wisconsin, Madison
D24
Program Area: Civil Infrastructure Systems

BRIGE: Integrated Social, Environmental, Economic, and Technical (SEET) Model for Sustainable Retrofit of Existing Buildings

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Cindy Menches, Illinois Institute of Technology
D35
Program Area: Civil Infrastructure Systems

Flexible Decision-making in Response to Disruptive Events on Construction Sites

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

David Mendonca, Rensselaer Polytechnic Institute
D143
Program Area: Infrastructure Management and Extreme Events

CAREER: Improvisation in Response to Extreme Events

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Chia-Hsiang Menq, Ohio State University
B124
Program Area: Manufacturing Machines and Equipment

Modeling and Control of Magnetically Actuated Compliant Micromanipulators Enabling Multi-axis Scanning of 3D Micro/Nano Objects

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Chia-Hsiang Menq, Ohio State University
B125
Program Area: Manufacturing Machines and Equipment

Six-Axis Visual Sensing and Visual Servo Control Rendering Direct Metrology for Manipulation of Multiple Micro Objects

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Vincent Mercado, Rensselaer Polytechnic Institute

D189

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research
NEESR-II: Advanced Site Monitoring and Effective Characterization of Site Nonlinear Dynamic Properties and Model Calibration

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

William Merryman, Vanderbilt University

C248

Program Area: Biomechanics and Mechanobiology
CAREER: Deconvoluting Fibroblast Mechanobiology

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Bernie Mettler, University of Minnesota, Twin Cities

E71

Program Area: Control Systems
Analyzing and Modeling Human Adaptive Spatial Control Skills Using General Principles of Optimal Control

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Edgar Meyhofer, University of Michigan, Ann Arbor

C211

Program Area: Biomechanics and Mechanobiology
Probing the Effects of Highly Bent and Twisted DNA on Transcription by RNA Polymerase

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Jeremy Michalek, Carnegie Mellon University

E10

Program Area: Engineering and Systems Design
CAREER: Driving Design–Modeling the Influence of Market Forces and Public Policy on Vehicle Design Decisions

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Michael Miles, Brigham Young University

B111

Program Area: Manufacturing Machines and Equipment
High Speed Friction Stir Spot Welding: A New Approach to Spot Joining of Ultra High Strength Steel

Poster Session 5: Wednesday, July 11, 1:00 p.m.–4:00 p.m.

Michael Miles, Brigham Young University

C104

Program Area: Materials and Surface Engineering
GOALI: Defect Detection Microscopy: Microstructure Design for Formability of Wrought Magnesium Alloys

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Scott Miles, Western Washington University

D122

Program Area: Infrastructure Management and Extreme Events
Repeat Disaster Impacts to Infrastructure Networks and their Effects on Economic Agent Recovery

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Elise Miller-Hooks, University of Maryland, College Park

D10

Program Area: Civil Infrastructure Systems

Resilience in Rail-Based Intermodal Transportation Systems: Performance Measurement and Decision Support

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Alex Mills, University of North Carolina at Chapel Hill

E172

Program Area: Service Enterprise Systems

Collaborative Research: Priority Dispatching of Patients in the Aftermath of a Mass-Casualty Event

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Sergiy Minko, Clarkson University

B153

Program Area: NanoManufacturing

Collaborative Research: Forests of Magnetic Nanofibers for Liquid Transport and Manipulation

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Eduardo Miranda, Stanford University

D210

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research

NEESR-CR: Collapse Simulation of Multi-Story Buildings through Hybrid Testing

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Anil Misra, University of Kansas Center for Research, Inc.

C190

Program Area: Structural Materials and Mechanics

Relationship of Theoretical Nano-scale Structure/Properties of Calcium Silicate Hydrate (CSH) and Experimental Micro-scale Properties of Cement Paste

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Devesh Misra, University of Louisiana at Lafayette

C230

Program Area: Biomechanics and Mechanobiology

Nanoscale Near-Surface Deformation Response in Nanostructured Materials

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Samy Missoum, University of Arizona

E11

Program Area: Engineering and Systems Design

Advances in Explicit Design Space Decomposition for Computational Design

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Farrokh Mistree, University of Oklahoma, Norman Campus

E28

Program Area: Engineering and Systems Design

Collaborative Research: EAGER–Managing Uncertainty by Integrating Information Economics and Robust Design

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

GRANTEE POSTER SESSION SCHEDULE

Judith Mitrani-Reiser, Johns Hopkins University

D144

Program Area: Infrastructure Management and Extreme Events

Modeling Building Downtime Due to Hurricane Impacts

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Panagiotis Mitropoulos, Arizona State University

D25

Program Area: Civil Infrastructure Systems

CAREER: Safety as an Emergent Property of the Production System: Production Practices and Team Processes of High Reliability Crews

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Gregory Mocko, Clemson University

E42

Program Area: Engineering and Systems Design

Integrative Situated Design: Linking Functions and Affordances Through Form

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Jack Moehle, University of California, Berkeley

D190

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research

NEESR-GC: Mitigation of Collapse Risk in Vulnerable Concrete Buildings

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Jeffrey Moehlis, University of California-Santa Barbara

E273

Program Area: Dynamical Systems

Controlling Populations of Neurons

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Louay Mohammad, Louisiana State University & Agricultural and Mechanical College

C164

Program Area: Structural Materials and Mechanics

A New Approach to Recycle Asphalt Shingles in Hot Mix Asphalt

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Benjamin Mohr, Tennessee Technological University

C153

Program Area: Structural Materials and Mechanics

Nanoscale Characterization of Expansion Due to Delayed Ettringite Formation

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Pal Molian, Iowa State University

B72

Program Area: Manufacturing Machines and Equipment

Shock Wave Induced Freeform Technique (SWIFT) for Manufacturing of Diamond Microtools

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

GRANTEE POSTER SESSION SCHEDULE

Pal Molian, Iowa State University

B187

Program Area: NanoManufacturing

A Hybrid Nanomanufacturing Approach for the Synthesis of Artificial Nacres

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Michael Mooney, Colorado School of Mines

C132

Program Area: Geomechanics and Geomaterials

Exploring the Relationship between Vibratory Roller-Based

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Diego Moran, Georgia Institute of Technology

E241

Program Area: Operations Research

Collaborative Research: Fundamentals of Convex Mixed Integer Nonlinear Programming

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Elise Morgan, Boston University

C212

Program Area: Biomechanics and Mechanobiology

Collaborative Research: Micro- and Nano-Scale Characterization and Modeling of Bone Tissue

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

K. Morsi, San Diego State University

B44

Program Area: Materials Processing and Manufacturing

Novel Current-Activated Tip-based Sintering (CATS)

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

David Morton, University of Texas at Austin

E205

Program Area: Operations Research

Prioritization via Stochastic Optimization

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Khalid Mosalam, University of California, Berkeley

D211

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research

EAGER: Next Generation Hybrid Simulation–Evaluation and Theory

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Donald Moynihan, University of Wisconsin, Madison

D123

Program Area: Infrastructure Management and Extreme Events

The Network Governance of Crisis Response: Analyzing the Incident Command System

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Pallab Mozumder, Florida International University

D145

Program Area: Infrastructure Management and Extreme Events

Communicating Forecast Information to Optimize Evacuation Behavior

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Christopher Muhlstein, Pennsylvania State University, University Park

C249

Program Area: Biomechanics and Mechanobiology

Synthesis and Nanomechanical Properties of Crystalline Boron-based Nanofilaments

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Ranjan Mukherjee, Michigan State University

E81

Program Area: Control Systems

Impulsive Control of Under-Actuated Dynamical Systems

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Anastasia Muliana, Texas A&M University

C39

Program Area: Mechanics of Materials

Nonlinear Field-Coupling Responses of Adaptive Functionally Graded Structures

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Brigid Mullany, University of North Carolina at Charlotte

B90

Program Area: Manufacturing Machines and Equipment

CAREER: An Innovative Look at Precision Polishing Dynamics

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

N

Satish Nagarajaiah, William Marsh Rice University

D191

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research

NEESR-SG: Development of Next Generation Adaptive Seismic Protection Systems

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Ahmed Naguib, Michigan State University

E58

Program Area: Control Systems

Collaborative Research: IDR-Model-based Feedback Control of Transient Growth in a Laminar Boundary

Layer: Bridging the Gap between CFD and Experiments

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Clay Naito, Lehigh University

D100

Program Area: Hazard Mitigation and Structural Engineering

Collaborative Research: Development of a Blast and Ballistic Resistant Precast Concrete Armored Wall System

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Narutoshi Nakata, Johns Hopkins University **D78**

Program Area: Hazard Mitigation and Structural Engineering

CAREER: Advanced Acceleration Control Methods and Substructure Techniques for Shaking Table Tests

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Marvin Nakayama, New Jersey Institute of Technology **E224**

Program Area: Operations Research

Modeling and Simulation of Complex Stochastic Systems and Cascading Failures, with Applications to the Electric Power Grid

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Roger Narayan, University of North Carolina at Chapel Hill **B100**

Program Area: Manufacturing Machines and Equipment

CAREER: Laser Processing of Microstructured Medical Devices

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Angelia Nedich, University of Illinois at Urbana-Champaign **E242**

Program Area: Operations Research

CAREER: Cooperative Multi-Agent Optimization

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Barry Nelson, Northwestern University **E206**

Program Area: Operations Research

GOALI: Quantifying Input Uncertainty in Stochastic Simulation

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Ian Nettleship, University of Pittsburgh **B61**

Program Area: Materials Processing and Manufacturing

Manufacturing the Microstructural Niche for Liver Tissue Bioreactors

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Jun Ni, University of Michigan, Ann Arbor **B73**

Program Area: Manufacturing Machines and Equipment

High-Performance Micromachining of Glass using Electrochemical Discharge Machining (ECDM) for Mems Applications

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Xianglei Ni, University of Pittsburgh **E274**

Program Area: Dynamical Systems

Collaborative Research: Novel NDE/SHM Approach Based on Highly Nonlinear Dynamics

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Yu Nie, Northwestern University

D36

Program Area: Civil Infrastructure Systems

Toward More Reliable Mobility: Improved Decision Support Tools for Transportation Systems

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Christopher Niezrecki, University of Massachusetts, Lowell

E296

Program Area: Dynamical Systems

Dynamic Stress-Strain Prediction of Vibrating Structures in Operation

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Jorge Nocedal, Northwestern University

E187

Program Area: Service Enterprise Systems

Collaborative Research: Market-Based Calibration of Pricing Models for Financial and Energy Option Contracts

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Andrew Norris, Rutgers University, New Brunswick

C6

Program Area: Mechanics of Materials

Cloaking Mechanical Waves

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

O

Motohiro Ohno, University of Michigan, Ann Arbor

C165

Program Area: Structural Materials and Mechanics

Development and Characterization of Durable Geopolymer Composites for Truly Sustainable Infrastructure Applications

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Okenwa Okoli, Florida State University

E131

Program Area: Sensors and Sensing Systems

Development of a Triboluminescence and Photocatalysis Based System for Intrinsic Structural Health Monitoring

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Guney Olgun, Virginia Polytechnic Institute and State University

D63

Program Area: Geotechnical Engineering

The Use of Energy Piles for Sustainable Energy

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Oliver O'Reilly, University of California, Berkeley **E275**

Program Area: Dynamical Systems

The Dynamics of a Novel Wave Energy Converter

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

James Orlin, Massachusetts Institute of Technology **E225**

Program Area: Operations Research

Nearly Optimal Solutions for Stochastic Optimization Problems

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Nina Orlovskaya, University of Central Florida **B11**

Program Area: Materials Processing and Manufacturing

Collaborative Research: Mixed Ionic Electronic Conducting (MIEC) Cathodes for Intermediate Temperature Solid Oxide Fuel Cells

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Nina Orlovskaya, University of Central Florida **C20**

Program Area: Mechanics of Materials

Time Dependent Creep Deformation of Non Polar Mixed Conducting Ferroelastic Perovskites

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Thomas O'Rourke, Cornell University **D212**

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research

NEESR-CR: Earthquake Response and Rehabilitation of Critical Lifelines

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Christine Ortiz, Massachusetts Institute of Technology **C213**

Program Area: Biomechanics and Mechanobiology

Nanomechanics of Cartilage Extracellular Matrix Macromolecules from Aged, Diseased, and Engineered Tissues

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Tim Osswald, University of Wisconsin, Madison **B48**

Program Area: Materials Processing and Manufacturing

Modeling Fiber-Matrix Separation and Fiber Jamming During Processing of Fiber Filled Composites

Poster Session 5: Wednesday, July 11, 1:00 p.m.–4:00 p.m.

Yanfeng Ouyang, University of Illinois at Urbana-Champaign **D11**

Program Area: Civil Infrastructure Systems

CAREER: Information Mechanisms and Robust Stabilization of Nonlinear, Stochastic Transportation Networks

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Tugrul Ozel, Rutgers University, New Brunswick

B12

Program Area: Materials Processing and Manufacturing

EAGER: Pulsed Laser Assisted Exfoliation of Single Crystalline SiC Thin Layers for Cost Effective Micro-Device Fabrication

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Tugrul Ozel, Rutgers University, New Brunswick

B101

Program Area: Manufacturing Machines and Equipment

Predictive Modeling and Optimization of Machining Induced Surface Integrity with Applications in Titanium and Nickel-Based Alloyed End Products

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

P

Jamie Padgett, William Marsh Rice University

D146

Program Area: Infrastructure Management and Extreme Events

IT-Enabled Continuous Risk Assessment of Bridge Networks for Customized and Actionable Multi-Hazard Interventions

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Jamie Padgett, William Marsh Rice University

D147

Program Area: Infrastructure Management and Extreme Events

CAREER: A Risk-Based Model to Achieve Sustainable Solutions for Bridge Infrastructure Subjected to Multiple Threats

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Shamim Pakzad, Lehigh University

E152

Program Area: Sensors and Sensing Systems

A Wirelessly Preemptive Sensing System for Quasi-Realtime Earthquake Monitoring of Bridges

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Derek Paley, University of Maryland, College Park

E263

Program Area: Dynamical Systems

Collaborative Research: Targeting Observations of Tropical Cyclones using Cooperative Control of Unmanned Aircraft

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Luther Palmer, University of South Florida

E72

Program Area: Control Systems

BRIGE: Running Over Rough Terrain–Enhancing Biological Hypotheses

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Sibel Pamukcu, Lehigh University
C143
Program Area: Geomechanics and Geomaterials

Engineering Soils with Thermally Controlled Wettability on Command

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Sibel Pamukcu, Lehigh University
E142
Program Area: Sensors and Sensing Systems

Wireless Signal Networks for Subsurface Modeling and Geo-Event Characterization

Poster Session 5: Wednesday, July 11, 1:00 p.m.–4:00 p.m.

Rong Pan, Arizona State University
B214
Program Area: Manufacturing Enterprise Systems

Collaborative Research: Efficient Experimentation for Product and Process Reliability Improvement

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Santosh Pandey, Iowa State University
E99
Program Area: Sensors and Sensing Systems

High-Resolution Electrical Sensing of Surface Charges and Currents of Living Cells

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Harold Park, Trustees of Boston University
C79
Program Area: Materials and Surface Engineering

CAREER: Multiscale Design of the Coupled Optomechanical Properties of Silicon Nanowires

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Matthew Parkinson, Pennsylvania State University, University Park
E12
Program Area: Engineering and Systems Design

GOALI: Accelerating Digital Design Through Web-Accessible Anthropometric Data and Digital Human Models

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Gustavo Parra-Montesinos, University of Michigan, Ann Arbor
D170
Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research

NEESR-CR: Assessment of Punching Shear Vulnerability of Slab-Column Connections with Shear Stud Reinforcement

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Gregory N. Parsons, North Carolina State University
B154
Program Area: NanoManufacturing

Continuous Atmospheric Pressure Atomic Layer Deposition Process for Controlled Nanoscale Thin Film Coatings

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

GRANTEE POSTER SESSION SCHEDULE

Robert Peattie, Tufts University

C231

Program Area: Biomechanics and Mechanobiology

A Combined Experimental-Computational Method to Evaluate Abdominal Aortic Aneurysm Wall Stress

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Zhijian Pei, Kansas State University

B91

Program Area: Manufacturing Machines and Equipment

Ultrasonic Vibration-Assisted Pelleting of Cellulosic Biomass for Biofuel Manufacturing

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Assimina Pelegri, Rutgers University, New Brunswick

C250

Program Area: Biomechanics and Mechanobiology

Multi-Scale Modeling of Central Nervous System White Matter

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Javier Pena, Carnegie Mellon University

E207

Program Area: Operations Research

Computing Equilibria for Large Sequential Games

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Feniosky Pena-Mora, Columbia University

D12

Program Area: Civil Infrastructure Systems

Interactive Ubiquitous Visualization of Construction Progress Monitoring with D4AR (4 Dimensional Augmented Reality) Models

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

John Perepezko, University of Wisconsin, Madison

C105

Program Area: Materials and Surface Engineering

The Design and Analysis of Aluminide Surface Layers for Low Temperature Synthesis

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Juan Pestana-Nascimento, University of California, Berkeley

C122

Program Area: Geomechanics and Geomaterials

Improved Description of the Seismic Response of Deep Soft Clay Deposits

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Catherine Peters, Princeton University

C133

Program Area: Geomechanics and Geomaterials

Collaborative Research: DUSEL CO₂—A Deep Underground Laboratory for Geologic CO₂ Sequestration Studies: Design of the Facility and Experiments

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

GRANTEE POSTER SESSION SCHEDULE

Kara Peters, North Carolina State University **C177**

Program Area: Structural Materials and Mechanics

Self-Healing Sandwich Composites

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

George Pharr, University of Tennessee, Knoxville **C62**

Program Area: Materials and Surface Engineering

Indentation-Induced Damage Initiation and Evolution in Single- and Poly-Crystalline Ceramics

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

George Pharr, University of Tennessee, Knoxville **C214**

Program Area: Biomechanics and Mechanobiology

Collaborative Research: Aging and Disease Effects on Viscous Energy Dissipation of Bone as Characterized by Nanoindentation

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Ramana Pidaparti, Virginia Commonwealth University **C232**

Program Area: Biomechanics and Mechanobiology

Multiscale Study of the Respiratory Airway Mechanics for Cellular Inflammation

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Olivier Pierron, Georgia Institute of Technology **C251**

Program Area: Biomechanics and Mechanobiology

Fabrication and Thermomechanical Characterization of NiTi Shape Memory Alloy Nanowires

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Marek-Jerzy Pindera, University of Virginia **C215**

Program Area: Biomechanics and Mechanobiology

Microstructural Effects in Tailoring the Response of Engineered Bio-Materials

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Michael Pinedo, New York University **B215**

Program Area: Manufacturing Enterprise Systems

Collaborative Research: Container Scheduling–Complexity, Algorithms and Heuristics

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Claire Poh, Clemson University **C166**

Program Area: Structural Materials and Mechanics

Development of Performance-Based Design Guidelines for Integrating Phase Change Materials in Buildings

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Michael Pollino, Case Western Reserve University

D192

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research
NEESR: Seismic Rehabilitation of Substandard Building Structures through Implementation of Stiff Rocking Cores (SRCRehab)

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Andreas Polycarpou, University of Illinois at Urbana-Champaign

C80

Program Area: Materials and Surface Engineering
Synthesis and Tribological Behavior of Metal Diboride-Nitride Coatings: Optimizing the Hard and Compliant Response

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Peter Polyvas, University of Arizona

E143

Program Area: Sensors and Sensing Systems
Wearable Micro-Sensors for Digital Palpation Tonometry and Soft Tissue Analysis

Poster Session 5: Wednesday, July 11, 1:00 p.m.–4:00 p.m.

Elmira Popova, University of Texas at Austin

E226

Program Area: Operations Research
Collaborative Research: Decision-Dependent Stochastic Processes Inference and Optimization

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Maurizio Porfiri, Polytechnic University of New York

E117

Program Area: Sensors and Sensing Systems
Little Eddies and Small Vibrations: Untapped Sources for Energy Harvesting in Aquatic Environments

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Maurizio Porfiri, Polytechnic University of New York

E264

Program Area: Dynamical Systems
CAREER: Guidance and Control of Fish Shoals using Bio-Mimetic Robots

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Maurizio Porfiri, Polytechnic University of New York

E265

Program Area: Dynamical Systems
Collaborative Research: Geometry of Group Behaviors with Application to Fish Schooling

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Siavash Pourkamali Anaraki, University of Denver

E132

Program Area: Sensors and Sensing Systems
Development of a Hybrid Nano-Electro-Mechanical Sensor Technology for Nanoscale Aerosol Mass and Momentumprobing

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

GRANTEE POSTER SESSION SCHEDULE

Monica Prezzi, Purdue University

D47

Program Area: Geotechnical Engineering

Integrated Framework for 3D Analysis of Soil-Pile Interaction

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Oleg Prokopyev, University of Pittsburgh

E243

Program Area: Operations Research

Novel Optimization-Based Biclustering Algorithms for Biomedical Data Analysis

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

David Y.H. Pui, University of Minnesota Institute of Technology

B166

Program Area: NanoManufacturing

Real Time Measurement of Agglomerated or Aggregated Airborne Nanoparticles Released From a Manufacturing Process and Their Transport Characteristics

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Anand Puppala, University of Texas at Arlington

C144

Program Area: Geomechanics and Geomaterials

Collaborative Research: SWCC Based Models for Realistic Simulation of Swell Behavior of Expansive Soils

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Prashant Purohit, University of Pennsylvania

C233

Program Area: Biomechanics and Mechanobiology

CAREER: Entropic Elasticity of Fluctuating Filaments and Networks

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Q

Hang (Jerry) Qi, University of Colorado at Boulder

C252

Program Area: Biomechanics and Mechanobiology

Mechanics of Cell Alignment due to Contact Guidance by Nanoscale Surface Topography

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Wei Qi, University of California, Berkeley

E188

Program Area: Service Enterprise Systems

Collaborative Research: Effective Management of Smart Grids and Smart Meters for Creating a Sustainable Energy Future

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

GRANTEE POSTER SESSION SCHEDULE

Xiaoping Qian, Illinois Institute of Technology

B102

Program Area: Manufacturing Machines and Equipment

Direct Measurement from Scan Data with Adaptive Moving Least-Squares Surfaces under Controlled Spatial Dependency

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Zhiguang Qian, University of Wisconsin, Madison

B216

Program Area: Manufacturing Enterprise Systems

A Statistical Framework for the Design and Analysis of Multi-Fidelity Computer Experiments

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Xiaoping Qian, Illinois Institute of Technology

E43

Program Area: Engineering and Systems Design

GOAL: Computing Tip-Specimen Shape Interaction for Accurate, High Throughput Nano-Imaging of General Three-Dimensional Structures by Atomic Force Microscopy

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Tong Qiu, Pennsylvania State University, University Park

D55

Program Area: Geotechnical Engineering

Analytical and Experimental Study of Pore Fluid Induced Damping and Effective Density in Saturated Soil During Shear Wave Excitations

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

R

Sharif Rahman, University of Iowa

E13

Program Area: Engineering and Systems Design

Reliability-Based Design Optimization of Large-Scale Complex Systems

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Binod Rai, University of Memphis

C106

Program Area: Materials and Surface Engineering

Grain Refined Nanocomposites: A Study on the Effect of Additives on Microstructure and Magnetic Properties of Permanent Magnets

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Anne Raich, Lafayette College

D64

Program Area: Geotechnical Engineering

RUI: Pervious Concrete Piles: An Innovative Ground Improvement Alternative

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Masoud Rais-Rohani, Mississippi State University
E14
Program Area: Engineering and Systems Design

Computational Design Tool Development for Multilevel Optimization of Product-Material Systems Under Uncertainty

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Farshad Rajabipour, Pennsylvania State University, University Park
C167
Program Area: Structural Materials and Mechanics

Engineering and Life Cycle Assessment of Activated Recycled Glass-Based Concretes

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Rajesh Rajamani, University of Minnesota, Twin Cities
E82
Program Area: Control Systems

Active Noise Control Systems for Windows Using Transparent Carbon Nanotube Actuators

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Kamlakar Rajurkar, University of Nebraska, Lincoln
B74
Program Area: Manufacturing Machines and Equipment

Theoretical and Experimental Study of Debris Removal and Tool Wear in Micro Electro Discharge Machining (Micro-EDM)

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Theodore Ralphs, Lehigh University
E208
Program Area: Operations Research

Decomposition-Based Optimization: A New Solver Paradigm

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Arvind Raman, Purdue University
E276
Program Area: Dynamical Systems

GOAL: Nonlinear, Multi-modal, and Stochastic Dynamics of Low-stiffness Microcantilevers in Liquid Environment Atomic Force Microscopy

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Ainissa Ramirez, Yale University
B29
Program Area: Materials Processing and Manufacturing

Rapid Fabrication of Three-Dimensional Structures Using Magnetically-Responsive Low-Melting-Point Alloys

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Julio Ramirez, Purdue University
D220
Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Operations

NEES Operations

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

C. Andrew Ramsburg, Tufts University

D48

Program Area: Geotechnical Engineering

Exploration of the Mechanisms Controlling Emulsion-Based Alkalinity Release during Subsurface Remediation

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Hayder Rasheed, Kansas State University

C168

Program Area: Structural Materials and Mechanics

EAGER: Engineered Bio-Composites for Sustainable Concrete

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Richard Regueiro, University of Colorado at Boulder

C7

Program Area: Mechanics of Materials

Collaborative Proposal: Bridging and Coupling Particle to Continuum Length-Scale Mechanics for Simulating Deformation and Flow of Dense Dry Particulate Materials

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Benjamin Rehder, Arizona State University

C154

Program Area: Structural Materials and Mechanics

CAREER: Linking Pore Structure, Performance, and Material Design of a Sustainable Macroporous Concrete for Multifunctional Applications

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Dacheng Ren, Syracuse University

C81

Program Area: Materials and Surface Engineering

CAREER: Patterned Biofilm Formation by Surface Design: Linking Structure to Physiology and Genetics

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Spiridon Reveliotis, Georgia Institute of Technology

B233

Program Area: Manufacturing Enterprise Systems

Optimized Scheduling of Complex Resource Allocation Systems through Approximate Dynamic Programming

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Jeffrey Rhoads, Purdue University

E277

Program Area: Dynamical Systems

Exploiting Parametric Effects in Resonant Nanosystems

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Jeffrey Rhoads, Purdue University

E278

Program Area: Dynamical Systems

CAREER: Exploiting Collective Behaviors in Coupled Micro- and Nanosystems

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

John Rice, Utah State University **C123**

Program Area: Geomechanics and Geomaterials

Collaborative Research: Critical Hydraulic Conditions for Piping in Sandy Soils, Laboratory Measurement and Numerical Simulation

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Kyle Riding, Kansas State University **C169**

Program Area: Structural Materials and Mechanics

Collaborative Research: New Natural Supplementary Cementitious Materials for Concrete

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

H. Ronald Riggs, University of Hawaii **D213**

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research

NEESR-CR: Impact Forces from Tsunami-Driven Debris

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Liesel Ritchie, University of Colorado at Boulder **D124**

Program Area: Infrastructure Management and Extreme Events

Effects of Technological Disasters on Dimensions of Social Capital: A Longitudinal Study of the 2008 TVA Kingston Fossil Plant Ash Release

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Giorgio Rizzoni, Ohio State University **E297**

Program Area: Dynamical Systems

A System Dynamics Modeling Methodology to Predict Transient Phenomena in Compressible Fluid Flow Systems

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

John Rogers, University of Illinois at Urbana-Champaign **B143**

Program Area: NanoScale Engineering Center

NSEC: Center for Nano-Chemical-Electrical-Mechanical Manufacturing Systems\Nano-CEMMS

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Gonzalo Romero, Massachusetts Institute of Technology **E189**

Program Area: Service Enterprise Systems

Alleviating Travel Delay Uncertainties in Traffic Assignment and Traffic Equilibrium

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Donald Roper, University of Arkansas **E153**

Program Area: Sensors and Sensing Systems

Gold Nanoparticle Ensembles on Optical Plasmon Capillaries for Virus/DNA Sensing

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

David Rosen, Georgia Institute of Technology

E15

Program Area: Engineering and Systems Design

A Multiscale Heterogeneous Foundation for Computer-Aided Design

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Jamal Rostami, Pennsylvania State University, University Park

C134

Program Area: Geomechanics and Geomaterials

Study of Soil Abrasivity and Development of a Reliable Soil Abrasivity Index

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Jamal Rostami, Pennsylvania State University, University Park

C145

Program Area: Geomechanics and Geomaterials

GOAL: Study of Advance Rate of Hard Rock Tunnel Boring Machines (TBMs) and the Impacts of Ground Conditions and Machine Specifications

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Paat Rusmevichientong, University of Southern California

E227

Program Area: Operations Research

CAREER: Real-Time Stochastic Optimization with Large Structured Strategy Sets and High-Volume Data Streams

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Andrzej Ruszczynski, Rutgers University, New Brunswick

E244

Program Area: Operations Research

Collaborative Research: Successive Risk-Neutral Approximations of Dynamic Risk-Averse Optimization Problems

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Massimo Ruzzene, Georgia Institute of Technology

E279

Program Area: Dynamical Systems

Nonlinear Acoustic Meta-Materials for Wave Propagation Management and Control

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Keri Ryan, University of Nevada, Reno

D101

Program Area: Hazard Mitigation and Structural Engineering

Collaborative Research: An Innovative Gap Damper to Control Seismic Isolator Displacements in Extreme Earthquakes

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Keri Ryan, University of Nevada, Reno

D193

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research
NEESR-SG: TIPS–Tools to Facilitate Widespread Use of Isolation and Protective Systems, a NEES/E-Defense Collaboration

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

S

Nikolaos Sahinidis, Carnegie Mellon University

E209

Program Area: Operations Research
Novel Relaxations for Global Optimization

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Mehdi Saïdi, University of Nevada, Reno

D214

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research
NEESR-SG; Seismic Performance of Bridge Systems with Conventional and Innovative Materials

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Srinivasa Salapaka, University of Illinois at Urbana-Champaign

E90

Program Area: Control Systems
A Tractable Computational Framework for Dynamic Coverage and Clustering

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Christopher Saldana, Pennsylvania State University, University Park

B112

Program Area: Manufacturing Machines and Equipment
Collaborative Research: Deformation Phenomena in Surface Texturing by Machining-Based Processes

Poster Session 5: Wednesday, July 11, 1:00 p.m.–4:00 p.m.

Rodrigo Salgado, Purdue University

C124

Program Area: Geomechanics and Geomaterials
A Novel Method of Analysis of Single Piles and Pile Groups Subjected to Lateral Loads

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Sanjay Sampath, SUNY at Stony Brook

B45

Program Area: Materials Processing and Manufacturing
GOALI: Novel Interface Driven Phenomena in Thermal Sprayed Systems: Mechanics, Materials Processing and Industrial Linkages

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

GRANTEE POSTER SESSION SCHEDULE

Johnson Samuel, Rensselaer Polytechnic Institute

B75

Program Area: Manufacturing Machines and Equipment

Physics-Based Study of Graphene Colloidal Systems as Metal Working Fluids for Micro-Machining Applications

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Florence Sanchez, Vanderbilt University

C191

Program Area: Structural Materials and Mechanics

CAREER: An Integrated Research and Education Program in Long-Term Durability of Nano-Structured Cement-Based Materials during Environmental Weathering

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Brett Sanders, University of California-Irvine

D148

Program Area: Infrastructure Management and Extreme Events

Data Integration and Model Development to Mitigate Urban Flooding Hazards Linked to Sea Level Rise

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Brett Sanders, University of California-Irvine

D149

Program Area: Infrastructure Management and Extreme Events

Prediction and Mitigation of Beach Overwash and Resultant Urban Flooding in Coastal California

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

David Sanders, University of Nevada, Reno

D171

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research

NEESR-SG: Seismic Simulation and Design of Bridge Columns under Combined Actions, and Implications on System Response

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Gaurav Sant, Arizona State University

C155

Program Area: Structural Materials and Mechanics

Phase Change Materials in Concrete: A New Strategy to Improve the Thermal Damage Resistance and Thermal Energy Efficiency of Concrete Structures

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Gaurav Sant, University of California-Los Angeles

C170

Program Area: Structural Materials and Mechanics

Collaborative Research: Fundamental Studies on Composition-Microstructure-Performance Relationships of Sustainable Cementitious Binders

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Ravi Saraf, University of Nebraska, Lincoln

B188

Program Area: NanoManufacturing

Regulating Current Through a Nanoparticle Necklace by Microorganism: A Transformative Technology for Biofuel Cells and Biosensors

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Partha Sarkar, Iowa State University

D79

Program Area: Hazard Mitigation and Structural Engineering

Study of Microburst Winds and Their Loading Effects on Built Structures

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Mehrdad Sasani, Northeastern University

D194

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research

NEESR: Near Collapse Performance of Existing Reinforced Concrete Frame Buildings

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Richard Sause, Lehigh University

D215

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research

NEESR-CR: Performance-Based Design for Cost-Effective Seismic Hazard Mitigation in New Buildings Using Supplemental Passive Damper Systems

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Andrew Schaefer, University of Pittsburgh

E173

Program Area: Service Enterprise Systems

Optimizing Flu Shot Design Under Uncertainty

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Andrew Schaefer, University of Pittsburgh

E174

Program Area: Service Enterprise Systems

Collaborative Research: The Optimal Timing of Kidney Exchanges: A Markov Game Approach

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Benjamin Schafer, Johns Hopkins University

D172

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research

NEESR-CR: Enabling Performance-Based Seismic Design of Multi-Story Cold-Formed Steel Structures

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Caroline Schauer, Drexel University

C63

Program Area: Materials and Surface Engineering

GOALI: Mechanically Robust Structural Color System Based on Biomimetic Principles

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Tony Schmitz, University of North Carolina at Charlotte

B92

Program Area: Manufacturing Machines and Equipment

Collaborative Research: Applying Bayesian Predictive Modeling and Decision Theory to Milling Profit Optimization under Uncertainty

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Tony Schmitz, University of North Carolina at Charlotte

B93

Program Area: Manufacturing Machines and Equipment

Collaborative Research: Unified Three-Dimensional Dynamic Modeling for Drilling and Milling Tool Assemblies (STaRC-3D)

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

John Schroeder, Texas Tech University

D109

Program Area: Hazard Mitigation and Structural Engineering

Documenting the Engineering-Relevant Aspects of Extreme Thunderstorm Winds

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Jan Schroers, Yale University

B30

Program Area: Materials Processing and Manufacturing

GOAL: Miniature Net-Shape Fabrication Method Using Thermoplastic Forming with Bulk Metallic Glass

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Jan Schroers, Yale University

B155

Program Area: NanoManufacturing

Nanoimprinting with Amorphous Metals

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Mark Schulz, University of Cincinnati

B139

Program Area: Nanoscale Interdisciplinary Research Team and Scalable NanoManufacturing

SNM GOAL: Carbon Nanotube Superfiber to Revolutionize Engineering Designs

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Axel Schulzgen, University of Central Florida

E144

Program Area: Sensors and Sensing Systems

GOAL: Developing Piezospectroscopic Sensing Systems in Adhesives and Coatings

Poster Session 5: Wednesday, July 11, 1:00 p.m.–4:00 p.m.

Justin Schwartz, North Carolina State University

B13

Program Area: Materials Processing and Manufacturing

Magnetic Field-Assisted Processing of Piezoelectric/Magnetostrictive Thin Film Composites to Enhance Properties

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

GRANTEE POSTER SESSION SCHEDULE

Michael Scott, Oregon State University

D80

Program Area: Hazard Mitigation and Structural Engineering

CAREER: Particle Finite Element Response Sensitivity Analysis of Fluid-Structure Interaction

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Jeffrey Scruggs, University of Michigan, Ann Arbor

E59

Program Area: Control Systems

CAREER: Control of Vibratory Energy Harvesting and Energy Constrained Systems

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Paul Selvadurai, University of California, Berkeley

D56

Program Area: Geotechnical Engineering

Fundamental Physical Mechanisms Leading to Initiation of Fault Rupture, With Application to Induced Seismicity at the Geysers Geothermal Field

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Venkat Selvamanickam, University of Houston

B14

Program Area: Materials Processing and Manufacturing

GOALI: Epitaxial Growth of Superconducting Thin Film Tapes with Prefabricated Nanostructures

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Vladimir Semak, Pennsylvania State University, University Park

B103

Program Area: Manufacturing Machines and Equipment

Fundamental Study of Pulse Length Dependency for Laser Ablation and Melt Formation

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Suvrajeet Sen, Ohio State University

E228

Program Area: Operations Research

Stochastic Mixed-Integer Optimization: Polyhedral Theory, Large-Scale Algorithms and Computations

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Carlo Sequin, University of California, Berkeley

E44

Program Area: Engineering and Systems Design

Inverse 3D Modeling

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Halil Sezen, Ohio State University

D102

Program Area: Hazard Mitigation and Structural Engineering

Experimental and Computational Simulation of Progressive Collapse of Buildings

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Devavrat Shah, Massachusetts Institute of Technology

E245

Program Area: Operations Research

What Do Customers Like: A New Approach That Lets The Data Decide

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Jami Shah, Arizona State University

E29

Program Area: Engineering and Systems Design

EAGER: Holistic Ideation for Creative Design

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Jami Shah, Arizona State University

E30

Program Area: Engineering and Systems Design

EAGER: MyDesignSpace: Discovering Design Patterns from Holistic Ideation Web Tool

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Jami Shah, Arizona State University

E45

Program Area: Engineering and Systems Design

Identification, Characterization & Measurement of Design Skills and Designer Profiles

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Jami Shah, Arizona State University

E46

Program Area: Engineering and Systems Design

Major: Understanding and Aiding Problem Formulation in Creative Conceptual Design

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Reza Shahbazian-Yassar, Michigan Technological University

C107

Program Area: Materials and Surface Engineering

A New Perspective on Energy Harvesting Nanowires: The Role of Chemistry and Structure of Nanowires

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

M. Ravi Shankar, University of Pittsburgh

B31

Program Area: Materials Processing and Manufacturing

Self-Assembling Ductile and Tough Bulk Nanostructured Alloys of High Thermal-Stability

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

M. Ravi Shankar, University of Pittsburgh

B32

Program Area: Materials Processing and Manufacturing

Deformation Mechanics and Microstructure Evolution During Microforming of Metals

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

M. Ravi Shankar, University of Pittsburgh

B126

Program Area: Manufacturing Machines and Equipment

Measuring Thermomechanical Material Response During Micromachining by In Situ Scanning Electron Microscopy

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Gang Shao, University of Central Florida

E154

Program Area: Sensors and Sensing Systems

Micromachinable Polymer-Derived Ceramic Ultrahigh-Temperature Sensors

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Vadim Shapiro, University of Wisconsin, Madison

E31

Program Area: Engineering and Systems Design

EAGER: Virtual Engineering for Conservation and Sustainability of Cultural Heritage

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Vadim Shapiro, University of Wisconsin, Madison

E47

Program Area: Engineering and Systems Design

Collaborative Research: Engineering Analysis of Imprecise Models

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Vadim Shapiro, University of Wisconsin, Madison

E48

Program Area: Engineering and Systems Design

Configuration Modeling, Design, and Analysis

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Pradeep Sharma, University of Houston

B140

Program Area: Nanoscale Interdisciplinary Research Team and Scalable NanoManufacturing

NIRT: Active Electromechanical Nanostructures Without the Use of Piezoelectric Constituents

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Pradeep Sharma, University of Houston

C40

Program Area: Mechanics of Materials

Size-Dependent Super-Piezoelectricity in Nanostructures

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Pradeep Sharma, University of Houston

C41

Program Area: Mechanics of Materials

EAGER/Collaborative Research: Coaxing Graphene to be Piezoelectric

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Pradeep Sharma, University of Houston

C82

Program Area: Materials and Surface Engineering

The Origins of the Dead-Layer in High Energy Storage Density Nanocapacitors

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Leon Shaw, University of Connecticut

B33

Program Area: Materials Processing and Manufacturing

Novel Processing of WC/Co Hardmetals with Simultaneous Improvements in Hardness and Toughness Derived From Nanocrystalline Powder

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Brian Sheldon, Brown University

C108

Program Area: Materials and Surface Engineering

GOAL: Stress Evolution and Related Phenomena in Composite Electrodes for Li Ion Batteries

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

I-Yeu Shen, University of Washington

E118

Program Area: Sensors and Sensing Systems

Performance Enhancement of PZT Thin-Film Microactuators via a Multi-Scale, Multi-Domain Design

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

I-Yeu Shen, University of Washington

E119

Program Area: Sensors and Sensing Systems

Bio-Inspired Inner-Ear Microphones via a Piezoelectric Substrate and Nanorods

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

I-Yeu Shen, University of Washington

E298

Program Area: Dynamical Systems

Vibration Analysis and Health Diagnosis of Spinning Cyclic Symmetric Rotors with Flexible Bearing and Housing Supports

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Jinglai Shen, University of Maryland, Baltimore County

E73

Program Area: Control Systems

Collaborative Research: A Constrained Optimal Control Approach to Nonparametric Estimation with Applications to Biological, Biomedical and Engineering Systems

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Mengyan Shen, University of Massachusetts, Lowell

E133

Program Area: Sensors and Sensing Systems

Sensing Mechanism and Persistence of Semiconductor Gas Sensors on Nanostructured Surfaces

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

GRANTEE POSTER SESSION SCHEDULE

Jianjun Shi, Georgia Institute of Technology **B217**

Program Area: Manufacturing Enterprise Systems

GOAL: Causation-Based Quality Control—A New Paradigm to Achieve Effective Monitoring, Diagnosis, and Control for Complex Manufacturing Systems

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Jianjun Shi, Georgia Institute of Technology **B218**

Program Area: Manufacturing Enterprise Systems

Metamodel-Based Measurement, Control, and Optimization of Engineered Surfaces

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Sheldon Shi, Mississippi State University **C83**

Program Area: Materials and Surface Engineering

Impregnated Inorganic Nanoparticles at the Natural Fiber-Thermoplastic Polymer Interface

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Yunfeng Shi, Rensselaer Polytechnic Institute **C64**

Program Area: Materials and Surface Engineering

Quantitative Understanding of Atomic Wear Using Accelerated Molecular Simulation

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Albert Shih, University of Michigan, Ann Arbor **B127**

Program Area: Manufacturing Machines and Equipment

Collaborative Research: Tissue Cutting Mechanics—Investigation of the Effective and Minimally Invasive Biopsy

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Yung Shin, Purdue University **B113**

Program Area: Manufacturing Machines and Equipment

High Speed Picosecond Laser Scribing of Multilayer Thin Films in Solar Cell

Poster Session 5: Wednesday, July 11, 1:00 p.m.–4:00 p.m.

Rajiv Shivpuri, Ohio State University **E16**

Program Area: Engineering and Systems Design

GOAL: Bayesian Hierarchical Network based Computational Framework for Risk Tolerant Process Design

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Andrei Shkel, University of California-Irvine **E100**

Program Area: Sensors and Sensing Systems

Folded Nuclear Magnetic Resonance Gyroscope

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

GRANTEE POSTER SESSION SCHEDULE

Pranav Shrotriya, Iowa State University

B76

Program Area: Manufacturing Machines and Equipment

Two-Dimensional Cutting of Polycrystalline Diamond and CBN Tools and Dies using a Novel Laser/Waterjet Hybrid Manufacturing Process

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Kenneth Shull, Northwestern University

C84

Program Area: Materials and Surface Engineering

Crack Propagation in Self-Healing Polymer Gels with High Toughness

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Gennady Shvets, University of Texas at Austin

B189

Program Area: NanoManufacturing

Development of Ultra-Dense Plasmonic Sensors Arrays Using Epitaxial Periodically-Perforated Silver Films

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Pedro Silva, George Washington University

D81

Program Area: Hazard Mitigation and Structural Engineering

Collaborative Research: Damage Compliant Inelastic Design Parameters for Performance-Based-Seismic-Design of Slender RC Columns

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Dan Simon, Cleveland State University

E17

Program Area: Engineering and Systems Design

GOAL: Biogeography-Based Optimization of Multiple Related Complex Systems

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Joseph Sinfield, Purdue University

D65

Program Area: Geotechnical Engineering

Geoenvironmental Influences on Raman Spectroscopic Monitoring of Chlorinated Solvents

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Joseph Sinfield, Purdue University

C146

Program Area: Geomechanics and Geomaterials

Engineering the Pore Fluid of Sands with Highly Plastic Nano-Particles for Liquefaction revention

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Puneet Singla, SUNY at Buffalo

B203

Program Area: Interdisciplinary Research

IDR/Collaborative Research: Characterizing Uncertainty in the Motion of Volcanic Plumes Advected by Wind Fields

Poster Session 5: Wednesday, July 11, 1:00 p.m.–4:00 p.m.

GRANTEE POSTER SESSION SCHEDULE

Puneet Singla, SUNY at Buffalo

E74

Program Area: Control Systems

Image Guided Tracking of Tumor Motion for Conformal Radiation Therapy

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Nicholas Sitar, University of California, Berkeley

D195

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research

NEESR-CR: Seismic Earth Pressures on Retaining Structures

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Karen Smilowitz, Northwestern University

E175

Program Area: Service Enterprise Systems

Design and Control Principles for Mobile Health Care Operations Management -- The Case of Asthma Control

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

J. Cole Smith, University of Florida

E210

Program Area: Operations Research

Integrating Dynamic Programming within Mixed-Integer Programming Techniques

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Michael Smith, Trustees of Boston University

C234

Program Area: Biomechanics and Mechanobiology

Collaborative Research: Molecular Mechanics Dictate the Mechanical Behavior of an Extracellular Matrix Fiber

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Stuart Smith, University of North Carolina at Charlotte

B114

Program Area: Manufacturing Machines and Equipment

Material Removal Mechanisms in Vortex Machining

Poster Session 5: Wednesday, July 11, 1:00 p.m.–4:00 p.m.

Andrew Smyth, Columbia University

D103

Program Area: Hazard Mitigation and Structural Engineering

Data Fusion of Heterogeneous Sensor Measurements for Enhanced Structural Modeling

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Nathan Sniadecki, University of Washington

C253

Program Area: Biomechanics and Mechanobiology

CAREER: Mechanics of Vascular Smooth Muscle Cell Contraction–Subcellular Structure-Function Relationships

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Amir Soleimanpour, University of Toledo

E120

Program Area: Sensors and Sensing Systems

Fundamental Investigation of Pulsed Laser Irradiation on Metal Oxide Gas Sensor Performance

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Junho Song, University of Illinois at Urbana-Champaign

D125

Program Area: Infrastructure Management and Extreme Events

Risk-informed Management and Post-disaster Operations of Lifeline Networks by Rapid, Condition-based System Reliability Analysis

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Gangbing Song, University of Houston

D173

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research

NEESR Payload: Damage Detection of Reinforced Concrete Columns Subjected to Combined Actions

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Eric Sonnenthal, University of California, Berkeley

C147

Program Area: Geomechanics and Geomaterials

Collaborative Research: Coupled Thermal-Hydrological-Mechanical-Chemical-Biological Experimental Facility at DUSEL Homestake

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Siavash Sorooshian, University of Nevada, Reno

D216

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research

NEESR-GC: Simulation of the Seismic Performance of Nonstructural Systems

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Sabrina Spatari, Drexel University

C171

Program Area: Structural Materials and Mechanics

Enhancing the Life Cycle of Plastic Pipes Through Nano-reinforcement

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Douglas Spearot, University of Arkansas

B156

Program Area: NanoManufacturing

Fundamental Understanding of Nanoparticle-Based Lubricants Tuned to Respond to Harsh Boundary Lubrication Conditions

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Billie Spencer, University of Illinois at Urbana-Champaign

E145

Program Area: Sensors and Sensing Systems

Bio-Informed Framework Enabling Multimetric Infrastructure Monitoring

Poster Session 5: Wednesday, July 11, 1:00 p.m.–4:00 p.m.

GRANTEE POSTER SESSION SCHEDULE

Jelena Srebric, Pennsylvania State University, University Park **C192**

Program Area: Structural Materials and Mechanics

Modeling of Natural Plant Materials to Enable Performance Evaluation of Environmentally Friendly Buildings

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Sri Sritharan, University of Oklahoma, Norman Campus **D174**

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research

NEESR-SG: Understanding and Improving the Seismic Behavior of Pile Foundations in Soft Clays

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Sri Sritharan, Iowa State University **D217**

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research

NEESR-CR: Unbonded Post-Tensioned Rocking Walls for Seismic Resilient Structures

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Binil Starly, University of Oklahoma, Norman Campus **B77**

Program Area: Manufacturing Machines and Equipment

CAREER: Bio-Manufacturing Heterogeneous Multi-scale 3D Matrices for Engineering Living Tissue Systems

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Martin Starzewski, University of Illinois at Urbana-Champaign **C42**

Program Area: Mechanics of Materials

Mechanics of Fractal Materials

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Paul Steen, Cornell University **B34**

Program Area: Materials Processing and Manufacturing

Collaborative Research: Manipulating the Contacting and Solidification of Molten Metal in Continuous Casting

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Martin Steinert, Stanford University **E32**

Program Area: Engineering and Systems Design

EAGER: AnalyzeD—Analyzing Engineering Design Activities

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Daniel Steingart, CUNY City College **C65**

Program Area: Materials and Surface Engineering

GOALI: A Comparative Study of Electrochemical Codeposition with In-Situ Electron Microscopy

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Dusan Stipanovic, University of Illinois at Urbana-Champaign

E91

Program Area: Control Systems

Collaborative Research: Safe Coordination of Multiple Autonomous Vehicles

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Robert Stone, Oregon State University

E33

Program Area: Engineering and Systems Design

Collaborative Research: Quantifying Creativity in Automated Design through a Multiagent Coordination Framework

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Alejandro Strachan, Purdue University

C8

Program Area: Mechanics of Materials

Cyber-Enabled Predictive Models for Polymer Nanocomposites: Multiresolution Simulations and Experiments

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Ji Won Suk, University of Texas at Austin

C21

Program Area: Mechanics of Materials

Mechanical Characterization of Atomically Thin Membranes

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Tom Suleski, University of North Carolina at Charlotte

B104

Program Area: Manufacturing Machines and Equipment

Can Multi-Scale Optics be Fabricated by Ultraprecision Systems—Hierarchical Fabrication Across Seven Orders of Magnitude?

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Wei Sun, Drexel University

B46

Program Area: Materials Processing and Manufacturing

A Dual Functional Freeform Microplasma Surface Patterning and Biologics Printing

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Vishnu Baba Sundaresan, Virginia Commonwealth University

E101

Program Area: Sensors and Sensing Systems

CAREER: Ionic Transistor Devices for Sensing and Controlled Actuation—An Integrated Research, Teaching and Community Outreach Program

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Krishnan Suresh, University of Wisconsin, Madison

E18

Program Area: Engineering and Systems Design

CAREER: Next-Generation Shape Optimization of Geometrically Complex Artifacts

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Jeannette Sutton, University of Colorado at Colorado Springs

D150

Program Area: Infrastructure Management and Extreme Events

Collaborative Research: Informal Online Communication in Crises and Disaster Events: Content, Structure, and Dynamics

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Jeannette Sutton, University of Colorado at Colorado Springs

D151

Program Area: Infrastructure Management and Extreme Events

Disaster Resilient Rural Communities: The Effect of Information Access on Rural Collective Efficacy

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

John Szivek, University of Arizona

E121

Program Area: Sensors and Sensing Systems

SENSORS: In Vivo Joint Regeneration Monitoring System to be Able to Establish Rehabilitation Approaches during Healing

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Izabela Szlufarska, University of Wisconsin, Madison

C109

Program Area: Materials and Surface Engineering

CAREER: Molecular Basis for Viscoelastic Response on Nano-Mechanical Biosensors

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

T

Ertugrul Taciroglu, University of California-Los Angeles

C22

Program Area: Mechanics of Materials

Collaborative Research: Validated Multiscale Simulation Framework for Large-strain Thermo-mechanical Response of Open-Cell Aluminum Foams

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Mahmoud Reda Taha, University of New Mexico

C193

Program Area: Structural Materials and Mechanics

Synthesis and Multi-Scale Mechanical Characterization of CSH

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Mitra Taheri, Drexel University

C110

Program Area: Materials and Surface Engineering

Multiscale Correlation of Magnetism and Microstructure at Iron/Oxide Interfaces

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Sam Tajbakhsh, Pennsylvania State University, University Park

B219

Program Area: Manufacturing Enterprise Systems

On-line Profile-to-Profile Process Adjustment for Robust Parameter Design Scenarios

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Li Tan, University of Nebraska, Lincoln

C66

Program Area: Materials and Surface Engineering

Self-Organized Nanolayers for Organic Thin-Film Transistors

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Xiaobo Tan, Michigan State University

E60

Program Area: Control Systems

Nonlinear and Adaptive Control of Smart Material-Actuated Systems with Application to Nanopositioning

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Xiaoli Tan, Iowa State University

C43

Program Area: Mechanics of Materials

Mechanics of Multi-responsive Ceramics for Electrical Capacitors with High power/Energy density

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Choon Yik Tang, University of Oklahoma, Norman Campus

E92

Program Area: Control Systems

Control-Theoretic Approaches to Communication-Efficient, Distributed Convex Optimization over Wireless Networks

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Jay Tang, Brown University

C235

Program Area: Biomechanics and Mechanobiology

Biomechanics of Actin Networks Regulated by Physical Mechanisms

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Jiong Tang, University of Connecticut

E280

Program Area: Dynamical Systems

Collaborative Research: Efficient Probabilistic Approach Using Order Reduction and Hybrid Models -- A New Paradigm for Structural Dynamic Analysis

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Xiaoduan Tang, Iowa State University

C111

Program Area: Materials and Surface Engineering

Development of Scanning Photothermal Microscope for Nanoscale Sub-surface Structural Defect Characterization

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Rafiqul Tarefder, University of New Mexico

C194

Program Area: Structural Materials and Mechanics

CAREER: Characterization and Modeling of Asphalt Concrete for Moisture-Induced Damage

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Rafiqul Tarefder, University of New Mexico

C195

Program Area: Structural Materials and Mechanics

GOALI: Nanoscale Testing and Molecular Modeling of Aging in Asphalt

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

John Taylor, Virginia Polytechnic Institute and State University

D37

Program Area: Civil Infrastructure Systems

CAREER: Building Occupant Network Dynamics (BOND)–Multi-scale Experimentation and Simulation in the Built Environment to Achieve Sustained Energy Conservation

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Jochen Teizer, Georgia Institute of Technology

D13

Program Area: Civil Infrastructure Systems

Automated Vision-Based Sensing for Site Operations Analysis

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Jale Tezcan, Southern Illinois University at Carbondale

D82

Program Area: Hazard Mitigation and Structural Engineering

A Bayesian Approach for Modeling and Simulation of Non-Stationary Ground Motions

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Tolga Tezcan, University of Rochester

E229

Program Area: Operations Research

CAREER: Robust Design and Control of Parallel Server Systems: Analysis via Augmented Fluid Models and Heavy-Traffic Asymptotic Regimes

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Ying Tian, University of Nevada, Las Vegas

D104

Program Area: Hazard Mitigation and Structural Engineering

Collaborative Research: Dynamic Disproportionate Collapse in Flat-Plate Buildings

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

John Tichy, Rensselaer Polytechnic Institute

C85

Program Area: Materials and Surface Engineering

Limits to Lubrication Theory in Microsystems

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

GRANTEE POSTER SESSION SCHEDULE

Albert To, University of Pittsburgh

C9

Program Area: Mechanics of Materials

A New Atomistic-to-Continuum Thermomechanical Model that Enables a Novel Averaging Method for Molecular Dynamics Simulations

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Masayoshi Tomizuka, University of California, Berkeley

B193

Program Area: Interdisciplinary Research

IDR/Collaborative Research: Monitoring and Mobility Assistance with Wireless Body Sensor Network and Mechatronic Actuation

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Huseyin Topaloglu, Cornell University

E190

Program Area: Service Enterprise Systems

Approximate Dynamic Programming for Perishable Asset Management with Applications in Dynamic Pricing, Capacity Allocation and Revenue Management

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Huseyin Topaloglu, Cornell University

E191

Program Area: Service Enterprise Systems

A General Framework for Incorporating Choice Models into Operations Management Decisions

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Nicolas Triantafyllidis, University of Michigan, Ann Arbor

C23

Program Area: Mechanics of Materials

Collaborative Research: Fundamental Experimental and Theoretical Investigation of Finite Strain and High Strain-Rate Electromagnetic Loading Processes in Metals

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Dallas Trinkle, University of Illinois at Urbana-Champaign

C24

Program Area: Mechanics of Materials

GOALI: Modeling Solute Effects in Magnesium Alloys: First-principles to Predictive Finite-Element

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Dallas Trinkle, University of Illinois at Urbana-Champaign

C112

Program Area: Materials and Surface Engineering

CAREER: First-Principles Modeling of Titanium-Oxygen-Solute Interaction: Materials Design for Improved Energy Efficiency

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Craig Trumbo, Colorado State University

D126

Program Area: Infrastructure Management and Extreme Events

Dynamics of Hurricane Risk Perception

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Michael Tsapatsis, University of Minnesota, Twin Cities

B141

Program Area: Nanoscale Interdisciplinary Research Team and Scalable NanoManufacturing

NIRT: Precise Building Blocks for Hierarchical Nanomanufacturing of Membranes with Molecular Resolution

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Kwok-Leung Tsui, Georgia Institute of Technology

B220

Program Area: Manufacturing Enterprise Systems

Collaborative Research: Validation, Calibration, and Prediction of Computer Models with Functional Output

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Cameron Turner, Colorado School of Mines

E19

Program Area: Engineering and Systems Design

Design Space Analysis with Hyperdimensional Metamodels

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Kimberly Turner, University of California-Santa Barbara

E102

Program Area: Sensors and Sensing Systems

Collaborative Research: Novel Microscale Resonant Sensors for Chemical and Biological Detection

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

U

Nasim Uddin, University of Alabama at Birmingham

C178

Program Area: Structural Materials and Mechanics

Composite Structural Insulated Panels (CSIPs) for Hazard Resistant Structures

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Nasim Uddin, University of Alabama at Birmingham

D38

Program Area: Civil Infrastructure Systems

Developing Bridge Weigh-in-Motion (B-WIM) Health Monitoring Systems for Bridge Infrastructure Safety

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Satish Ukkusuri, Purdue University

D152

Program Area: Infrastructure Management and Extreme Events

Collaborative Research: From Warnings to Evacuation in Hurricanes: a Holistic Investigation using an Interdisciplinary Approach

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Merve Unuvar, Rutgers University, New Brunswick

E246

Program Area: Operations Research

Discrete Moment Problems and Applications

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Reha Uzsoy, North Carolina State University

B234

Program Area: Manufacturing Enterprise Systems

International Collaboration: Capacity Anticipation and Modeling for Production Planning with Flexible Resources

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Reha Uzsoy, North Carolina State University

B235

Program Area: Manufacturing Enterprise Systems

Next Generation Algorithms for Planning Production and Inventories with Uncertain Demand and Congestion

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

V

Hooman Vahedi Tafreshi, Virginia Commonwealth University

B176

Program Area: NanoManufacturing

Bimodal Nanofiber Mats with Controlled Microstructures for Size-Sensitive Nanoparticle Filtration/Separation and Superhydrophobic Drag Reduction

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Ardalan Vahidi, Clemson University

E61

Program Area: Control Systems

Predictive Energy Management in Smart Vehicles: Exploiting Traffic and Terrain Preview for Fuel Savings

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Alexander Vakakis, University of Illinois at Urbana-Champaign

E281

Program Area: Dynamical Systems

Collaborative Research: Global/Local System Identification of Strongly Nonlinear Dynamical Systems

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

John van de Lindt, University of Alabama, Tuscaloosa

D175

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research

NEESR-CR: NEESsoft-Seismic Risk Reduction for Soft-Story, Wood frame Buildings

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Benjamin Van Roy, Stanford University

E211

Program Area: Operations Research

Directed Regression

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Shannon Van Zandt, Texas A&M University

D127

Program Area: Infrastructure Management and Extreme Events

Developing A “Living Laboratory” for Examining Community Recovery and Resilience After Disaster

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Judy Vance, Iowa State University

E49

Program Area: Engineering and Systems Design

GOAL: A Hybrid Method to Support Natural Interaction of Parts in a Virtual Environment

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Judy Vance, Iowa State University

E50

Program Area: Engineering and Systems Design

EAGER: Haptics for Large Scale Virtual Environments to Assess Assembly Tasks

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

John Vande Vate, Georgia Institute of Technology

E230

Program Area: Operations Research

Stochastic Control In Semiconductor Supply Chain

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Kalman Varga, Vanderbilt University

E299

Program Area: Dynamical Systems

Quantum dynamics at the nanoscale

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Semyon Vaynman, Northwestern University

C44

Program Area: Mechanics of Materials

Design and Development of Body-Centered Cubic Alloys with Increased Strength and Toughness for Infrastructural and Structural Applications

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Semyon Vaynman, Northwestern University

C156

Program Area: Structural Materials and Mechanics

Design and Development of Fire-Resistant Ferritic Steels for Structural Applications

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

GRANTEE POSTER SESSION SCHEDULE

Franck Vernerey, University of Colorado at Boulder

C254

Program Area: Biomechanics and Mechanobiology

Multiscale Biomimetic Study of the Mechanics of Fish Scales

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Narendiran Vitchuli, North Carolina State University

B62

Program Area: Materials Processing and Manufacturing

A New Paradigm for Scalable Fabrication of Polymer Nanofibers by Bulk Shear and Phase Separation

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Joost Vlassak, Harvard University

C25

Program Area: Mechanics of Materials

Stress and Deformation caused by Insertion in Li Ion Batteries

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Paul Voyles, University of Wisconsin, Madison

C45

Program Area: Mechanics of Materials

Nanoscale Mechanics of Bulk Amorphous Metals

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

W

Amy Wagoner Johnson, University of Illinois at Urbana-Champaign

B63

Program Area: Materials Processing and Manufacturing

Customized Load-Bearing Scaffolds Using Multiscale Porosity and Multi-Material Domains

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

S. Travis Waller, University of Texas at Austin

D39

Program Area: Civil Infrastructure Systems

Predicting Disrupted Network Behavior

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Mark Walter, Ohio State University

C67

Program Area: Materials and Surface Engineering

GOALI: Electrode Interface Stresses, Degradation, and Failure

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Hong Wan, Purdue University

B221

Program Area: Manufacturing Enterprise Systems

Collaborative Research: Optimal Sampling Plans in Supply Chains with Endogenous Product Quality

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Anbo Wang, Virginia Polytechnic Institute and State University

E155

Program Area: Sensors and Sensing Systems

Fully-Distributed Fiber-Optic Sensors for Pressure and Transverse Stress Measurement

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Anbo Wang, Virginia Polytechnic Institute and State University

E156

Program Area: Sensors and Sensing Systems

Fiber-Optic Technology for Fully-Distributed Physical, Chemical, and Biological Sensing

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Chuji Wang, Mississippi State University

E146

Program Area: Sensors and Sensing Systems

A Multi-functional Fiber Optic Sensor Platform Using a Time Domain Sensing Scheme

Poster Session 5: Wednesday, July 11, 1:00 p.m.–4:00 p.m.

Fuyuan Wang, University of Illinois at Urbana-Champaign

E247

Program Area: Operations Research

Four Mathematical Programming Paradigms with Operations Research Applications

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Herbert Wang, University of Wisconsin, Madison

C125

Program Area: Geomechanics and Geomaterials

Collaborative Research: Fiber-Optic Strain Monitoring of Rock Masses in Large Underground Facilities

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Howard (Hao) Wang, SUNY at Binghamton

B15

Program Area: Materials Processing and Manufacturing

Collaborative Research: Large-Scale Fabrication of Thin Polymer Nanocomposite Films

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Jialai Wang, University of Alabama, Tuscaloosa

C157

Program Area: Structural Materials and Mechanics

Characterization of Environment-Assisted Subcritical Debond of Bonded Repairs/Strengthening of Aging Infrastructure

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Jialai Wang, University of Alabama, Tuscaloosa

C158

Program Area: Structural Materials and Mechanics

Collaborative Research: Geopolymeric Nanocomposite, A Next Generation Material For Infrastructure Sustainability

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

GRANTEE POSTER SESSION SCHEDULE

Jifeng Wang, University of Illinois at Urbana-Champaign

C86

Program Area: Materials and Surface Engineering

Design of Transforming Materials

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Junlan Wang, University of Washington

C87

Program Area: Materials and Surface Engineering

CAREER: Experimental Investigation of Mechanical Properties of Nanoporous Thin Films

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Junmin Wang, Ohio State University

E62

Program Area: Control Systems

Synergistically Integrated In-Cylinder Condition and Fueling Control for Advanced Multi-Mode Combustion Diesel Engines

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Jyhwen Wang, Texas A&M University

B49

Program Area: Materials Processing and Manufacturing

Hydroforming of Sandwich Panels

Poster Session 5: Wednesday, July 11, 1:00 p.m.–4:00 p.m.

Kejin Wang, Iowa State University

C196

Program Area: Structural Materials and Mechanics

Understanding Rheology of Cement-based Materials through Integrated Experiments and Computations at Multiple Scales

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Linbing Wang, Virginia Polytechnic Institute and State University

C197

Program Area: Structural Materials and Mechanics

Digital Mix Design for Performance Optimization of Asphalt Concrete

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Qian Wang, Pennsylvania State University, University Park

E93

Program Area: Control Systems

Modeling and Feedback Design for Autonomic Management of Enterprise-scale Virtualized Data Centers

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Shi-Qing Wang, University of Akron

C10

Program Area: Mechanics of Materials

Melt Fracture in Soft Solid-Like Polymeric Materials

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Xingwei Wang, University of Massachusetts, Lowell

E103

Program Area: Sensors and Sensing Systems

CAREER: Novel Mechanism for Generation and Receiving of Ultrasound on a Single Fiber Using Nanoparticles

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Xudong Wang, University of Wisconsin, Madison

B190

Program Area: NanoManufacturing

Self-Controlled Surface-Selective Atomic Layer Deposition for Integrated Vertical Nanowire Field Effect Transistors

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Gordon Warn, Pennsylvania State University, University Park

D83

Program Area: Hazard Mitigation and Structural Engineering

Stability of Elastomeric and Lead-Rubber Seismic Isolation Bearings Under Extreme Earthquake Loading

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

April Warnock, University of Michigan, Ann Arbor

D128

Program Area: Infrastructure Management and Extreme Events

Detection and Mitigation of Hazardous Releases in Infrastructure Systems

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Joseph Wartman, Drexel University

D196

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research

NEESR-CR: Seismically Induced Rock-Slope Failure: Mechanisms and Prediction

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

James Watkins, University of Massachusetts, Amherst

B144

Program Area: NanoScale Engineering Center

NSEC: Center for Hierarchical Manufacturing

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Dean Webster, North Dakota State University Fargo

C179

Program Area: Structural Materials and Mechanics

Structural Composites with High Biobased Content

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Bingqing Wei, University of Delaware

B16

Program Area: Materials Processing and Manufacturing

Collaborative Research: Manufacturing Deformable Energy Storage Devices from Carbon Nanotube Macro-Films

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

GRANTEE POSTER SESSION SCHEDULE

Bingqing Wei, University of Delaware

B167

Program Area: NanoManufacturing

Collaborative Research: Heterogeneous Integration of Patterned 3-D Nanotube Supercapacitors on CMOS

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Lisa Weiland, University of Pittsburgh

E122

Program Area: Sensors and Sensing Systems

CAREER: High Performance, Mechanically Robust Ionometric Sensors

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Haifang Wen, Washington State University

C135

Program Area: Geomechanics and Geomaterials

An Innovative Approach to Mitigate Shrinkage Cracking in Cementitiously Stabilized Soils

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Kris Wernstedt, Virginia Polytechnic Institute and State University

D153

Program Area: Infrastructure Management and Extreme Events

DRRC/Collaborative Research: Emergency Management in Rural America: Decision-Makers Use of Climate Science in Flood Planning and Management

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Ward Whitt, Columbia University

E248

Program Area: Operations Research

Multi-Server Queues with Time-Varying Arrival Rates

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Andrew Whittaker, SUNY at Buffalo

D218

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research

NEESR-SG: Performance-Based Design of Squat Reinforced Concrete Shear Walls

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Eric Williams, Arizona State University

D14

Program Area: Civil Infrastructure Systems

Urban Form and Energy Use Explored Through Dynamic Networked Infrastructure Model

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Steve Wojtkiewicz, University of Minnesota, Twin Cities

D105

Program Area: Hazard Mitigation and Structural Engineering

Rapid Identification, Control, and Uncertainty Analysis of Structural Models

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Colin Wolden, Colorado School of Mines

B17

Program Area: Materials Processing and Manufacturing

High Throughput Manufacturing of Nanolaminates

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Shing-Chung Wong, University of Akron

B64

Program Area: Materials Processing and Manufacturing

CAREER: Electrospinning-Enabled Bio-Inspired Materials Research and Education

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Robert Wood, Harvard University

E63

Program Area: Control Systems

CAREER: Bio-inspired Automatic Control of a Flying Robotic Insect

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

David Wootton, Cooper Union

B128

Program Area: Manufacturing Machines and Equipment

GOALI/Collaborative Research: Design and Manufacturing of Bioactive Surgical Fixation Devices Using Injection Molding of Gradient Cellular Structures

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Benxin Wu, Illinois Institute of Technology

B18

Program Area: Materials Processing and Manufacturing

EAGER/Collaborative Research: Laser Sintering of Nanolayered Carbon Nanotube Paper for Functionally Gradient Ceramic Nanocomposites

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Benxin Wu, Illinois Institute of Technology

B129

Program Area: Manufacturing Machines and Equipment

CAREER: Fundamental Research on a Novel Ultrasound-assisted Water-confined Laser Micromachining Technology

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Jason Wu, William Marsh Rice University

D26

Program Area: Civil Infrastructure Systems

CAREER: Reliability Assessment and Risk Mitigation Principles for Smart Interdependent Infrastructure Systems

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Junqiao Wu, University of California, Berkeley

B191

Program Area: NanoManufacturing

Off-Equilibrium Doping of Semiconductor Nanowires

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Richard Wysk, North Carolina State University

B205

Program Area: Manufacturing Enterprise Systems

EAGER: Engineering for Regenerative Medicine

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Gerard Wysocki, Princeton University

E104

Program Area: Sensors and Sensing Systems

CAREER: Coherent Mid-Infrared Molecular Dispersion Spectroscopy for Ultra-Sensitive Chemical Detection

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

X

Marino Xanthos, New Jersey Institute of Technology

B65

Program Area: Materials Processing and Manufacturing

GOALI: Fundamental Material and Processing Studies on Hot-Melt Extrusion-A Novel Pharmaceutical Manufacturing Process

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Zhenhai Xia, University of Akron

C68

Program Area: Materials and Surface Engineering

Integrated Studies of Interfaces in Nanocomposites and Nanoimprinting

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Xinran Xiao, Michigan State University

C26

Program Area: Mechanics of Materials

GOALI: Stress in a Porous Polymeric Membrane Separator in a Lithium-Ion Battery

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Susan Xu, Pennsylvania State University, University Park

B236

Program Area: Manufacturing Enterprise Systems

Risk Management of Supply Chain Networks with Dependent Disruptions

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Terry Xu, University of North Carolina at Charlotte

B157

Program Area: NanoManufacturing

CAREER: Boron-based One-dimensional Nanostructures of Thermoelectric Energy Conversion

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Xianfan Xu, Purdue University

B142

Program Area: Nanoscale Interdisciplinary Research Team and Scalable NanoManufacturing

SNM: Scalable Nanomanufacturing Machine Based on Parallel Optical Antenna Array

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Y

Hitomi Yamaguchi Greenslet, University of Florida

B115

Program Area: Manufacturing Machines and Equipment

Magnetic Field Assisted Nanomachining of Ultraprecision Surfaces

Poster Session 5: Wednesday, July 11, 1:00 p.m.–4:00 p.m.

Hitomi Yamaguchi Greenslet, University of Florida

C88

Program Area: Materials and Surface Engineering

Surface Functionalization by Magnetic Field Assisted Finishing

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Henry Yang, University of California-Santa Barbara

B78

Program Area: Manufacturing Machines and Equipment

Collaborative Research: Controlling Surface Damage in Machining of Hierarchical Biological Composites

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Henry Yang, University of California-Santa Barbara

C216

Program Area: Biomechanics and Mechanobiology

Collaborative Research: Nanostructured Alloys With Unprecedented Properties

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Jann Yang, University of California-Irvine

E157

Program Area: Sensors and Sensing Systems

Finite-Element Based Damage Identification and Tracking of Civil Structures

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Jian Yang, New Jersey Institute of Technology

E192

Program Area: Service Enterprise Systems

Collaborative Research: The Nonatomic-Game Approach to Revenue Management Under Competition

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Shu Yang, University of Pennsylvania

B177

Program Area: NanoManufacturing

From a Single Micropatterned Elastic Membrane to a Library of Complex Patterns of Nanostructures: an Efficient Nanomanufacturing Route via Harnessing of Elastic Instability

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

GRANTEE POSTER SESSION SCHEDULE

Bin Yao, Purdue University

E83

Program Area: Control Systems

EAGER: A Holistic Approach to Adaptive Robust Control of Systems with Uncertain Nonsmooth Nonlinearities with Application to Cable-Conduit Actuated Surgical Robotic Devices

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

David Yao, Columbia University

E212

Program Area: Operations Research

Dynamic Scheduling and Resource Control in Stochastic Processing Networks: Beyond Priority Rules

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Donggang Yao, Georgia Institute of Technology

B67

Program Area: Materials Processing and Manufacturing

Precision Microprofile Extrusion with a Wall Slip Condition

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Y. Lawrence Yao, Columbia University

B66

Program Area: Materials Processing and Manufacturing

Laser Modification of Surface Crystallinity of Biodegradable Polymers

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Y. Lawrence Yao, Columbia University

B94

Program Area: Manufacturing Machines and Equipment

GOAL: Dissimilar Metal Joining for Micro-Scale Medical Devices

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Matthew Yates, University of Rochester

C113

Program Area: Materials and Surface Engineering

Surface Crystallization to Optimize Nanostructure of Proton Conductors in Hydrogen Membrane Fuel Cells

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

M. K. Yegian, Northeastern University

D197

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research

NEESR: Induced Partial Saturation (LPS) Through Transport and Reactivity for Liquefaction Mitigation

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Allen Yi, Ohio State University

B79

Program Area: Manufacturing Machines and Equipment

Micro-Optics Based 3D Microfabrication System

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

GRANTEE POSTER SESSION SCHEDULE

Jingang Yi, Rutgers University, New Brunswick

E64

Program Area: Control Systems

GOAL: Safety-Preserved Estimation and Control of Tire/Road Interaction

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Huiming Yin, Columbia University

C198

Program Area: Structural Materials and Mechanics

CAREER: Energy in Sustainable Infrastructure–Multi-scale/physical Approach to a Novel Hybrid Solar Roofing Panel

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Yong-Kyu Yoon, University of Florida

B130

Program Area: Manufacturing Machines and Equipment

Exploration of Multidirectional 3-D UV Lithography for Advanced Microfabrication

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Zhanping You, Michigan Technological University

C172

Program Area: Structural Materials and Mechanics

A Microstructure-Based Modeling Approach to Characterize Asphalt Materials

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Zhanping You, Michigan Technological University

C173

Program Area: Structural Materials and Mechanics

EAGER: Using Nonmetals Separated from E-Waste and Waste Plastic Bags in Improving the Mechanical Properties of Asphalt Materials

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Mohammad Younis, SUNY at Binghamton

E282

Program Area: Dynamical Systems

Collaborative Research: Exploration of the Nonlinear Dynamics of NEMS Carbon Nanotube Resonators

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Cheng Yu, University of North Texas

D84

Program Area: Hazard Mitigation and Structural Engineering

CAREER: Comprehensive Research on Cold-Formed Steel Sheathed Shear Walls: Special Detailing, Design, and Innovation

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Choongho Yu, Texas A&M University

B192

Program Area: NanoManufacturing

Building Selective Pathways for Electrons and Phonons in Nanocomposites

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Hang Yu, University of Delaware

B50

Program Area: Materials Processing and Manufacturing

Tailoring Thermal Conductivity for 3-D Polymer Composites

Poster Session 5: Wednesday, July 11, 1:00 p.m.–4:00 p.m.

Hongyu Yu, Arizona State University

B19

Program Area: Materials Processing and Manufacturing

IDR/Collaborative Research: Manufacturing Functional Laminated Composite Structures on Patterned Uneven Three-Dimensional Surfaces

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Miao Yu, University of Maryland, College Park

E158

Program Area: Sensors and Sensing Systems

Dexterous Fiber Optic Tweezers for Bio-Particle Manipulation and Force Sensing

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Min-Feng Yu, University of Illinois at Urbana-Champaign

C236

Program Area: Biomechanics and Mechanobiology

Intrinsically-Nonlinear Broadband Nanoresonator for Ultrahighly Sensitive Sensing of Energy Transfers

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Xiong Yu, Case Western Reserve University

D106

Program Area: Hazard Mitigation and Structural Engineering

GOALI: An Innovative Real Time Bridge Scour Sensor for Bridge Risk Management

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Xiong Yu, Case Western Reserve University

E105

Program Area: Sensors and Sensing Systems

CAREER: Fusion of Multi-scale Sensing and Simulations for Bridge Scour Risk Management: An Integrated Research and Educational Plan

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Xiong Yu, Case Western Reserve University

E106

Program Area: Sensors and Sensing Systems

GOALI: An Innovative Real Time Bridge Scour Sensor for Bridge Risk Management

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Xiong Yu, Case Western Reserve University

E107

Program Area: Sensors and Sensing Systems

A High Resolution Distributed Moisture Sensing System for Direct Measurement of Earthquake Induced Void Redistribution

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

GRANTEE POSTER SESSION SCHEDULE

Wenqiao Yuan, Kansas State University

B131

Program Area: Manufacturing Machines and Equipment

CAREER: Multi-Scale Structured Solid Carriers Enabling Algae Biofuel Manufacturing in the Ocean

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Z

Evan Zamir, Georgia Institute of Technology

Program Area: Biomechanics and Mechanobiology

Biomechanical Characterization of the Avian Epiblast during Primitive Streak Formation

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

C255

Giovanni Zangari, University of Virginia

B158

Program Area: NanoManufacturing

Fundamental Studies of Electrowetting on Tailored Surfaces with Application to High Performance Capillary Force Actuators

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Antonios Zavaliangos, Drexel University

C46

Program Area: Mechanics of Materials

GOALI: Processing and Optimization of Multilayered Pharmaceutical Tablets

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Pablo Zavattieri, Purdue University

C180

Program Area: Structural Materials and Mechanics

High Performance Cement Composites with Nanocrystalline and Nanofibrillated Cellulose

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Hussein Zbib, Washington State University

C11

Program Area: Mechanics of Materials

Mechanical Properties at the Sub-micrometer Length Scale: Multiscale Modeling and Experiments

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Assaf Zeevi, Columbia University

E193

Program Area: Service Enterprise Systems

CAREER: Design and Analysis of Differentiated Services

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Alan Zehnder, Cornell University

E283

Program Area: Dynamical Systems

Nonlinear Dynamics of Coupled MEMS Oscillators

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Dimitrios Zekkos, University of Michigan, Ann Arbor

D219

Program Area: George E. Brown, Jr. Network for Earthquake Engineering Simulation Research

NEESR-CR: Seismic Response of Landfills: In-Situ Evaluation of Dynamic Properties of Municipal Solid Waste, Comparison to Laboratory Testing, and Impact on Numerical Analyses

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Ruijie Zeng, University of Illinois at Urbana-Champaign

D129

Program Area: Infrastructure Management and Extreme Events

Planning for Drought Preparedness in the Watershed Context: A Risk-Based Decision Analysis

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Aspasia Zerva, Drexel University

D85

Program Area: Hazard Mitigation and Structural Engineering

Spatial Variability Effects on the Seismic Response of RC Highway Bridges

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Aspasia Zerva, Drexel University

D86

Program Area: Hazard Mitigation and Structural Engineering

Seismic Response of Concrete Gravity Dams Subjected to Spatially Variable Excitations

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Chun (Chuck) Zhang, Florida State University

B222

Program Area: Manufacturing Enterprise Systems

Collaborative Research: Multi-Accuracy Bayesian Models for Improving Property Prediction of Nanotube Buckypaper Composites

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Katherine Y. Zhang, Trustees of Boston University

C217

Program Area: Biomechanics and Mechanobiology

CAREER: Integrating Multi-Scale Mechanics and Biomaterials to Study the Translation of Mechanical Forces from Tissue to Cell

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Liangfang Zhang, University of California-San Diego

B168

Program Area: NanoManufacturing

Systematic Approaches to Scale-up of Biocompatible Drug Delivery Nanoparticles for High-Rate Production

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Lianyang Zhang, University of Arizona

C159

Program Area: Structural Materials and Mechanics

Geopolymerization of Mine Tailings for Sustainable Development

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

GRANTEE POSTER SESSION SCHEDULE

Mingjun Zhang, University of Tennessee, Knoxville

C69

Program Area: Materials and Surface Engineering

Nanoparticles to Increase Strength of Surface Adhesion: An Inspiration from Biological Systems

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Sulin Zhang, Pennsylvania State University, University Park

C89

Program Area: Materials and Surface Engineering

Perfecting Monolayer Graphene by Defect Removal Using Novel Thermo-Mechanical Methods

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Xiang Zhang, University of California, Berkeley

B145

Program Area: NanoScale Engineering Center

NSEC: Center for Scalable and Integrated Nanomanufacturing (SINAM)

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Xin Zhang, Trustees of Boston University

C237

Program Area: Biomechanics and Mechanobiology

Collaborative Research: Elastic and Viscoelastic Characterization and Modeling of Polymer based Structures for Biological Applications

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Xinghang Zhang, Texas A&M University

E108

Program Area: Sensors and Sensing Systems

Novel Magnetic Shape Memory Alloy Thin Films for Sensor and Actuator Applications

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

YuMing Zhang, University of Kentucky

B80

Program Area: Manufacturing Machines and Equipment

Control of Metal Transfer at Given Arc Variables

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

YuMing Zhang, University of Kentucky

B81

Program Area: Manufacturing Machines and Equipment

Machine-Human Cooperative Control of Welding Process

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Yunfeng Zhang, University of Maryland, College Park

D107

Program Area: Hazard Mitigation and Structural Engineering

Sensor-Driven Structural Health Prognosis System for Continuous Reliability Assessment of Tubular Steel Structures

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Yunfeng Zhang, University of Maryland, College Park

E147

Program Area: Sensors and Sensing Systems

Collaborative Research: Fish-Inspired Ultra-Sensitive Infrasound Sensor for Critical Infrastructure Monitoring and Geo-hazards Early Warning

Poster Session 5: Wednesday, July 11, 1:00 p.m.–4:00 p.m.

Yao Zhao, Rutgers University, Newark

B237

Program Area: Manufacturing Enterprise Systems

CAREER: Project-Driven Supply Chains (PDSCs) -- Integrating Supply Chain Planning With Project Management

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Yiping Zhao, University of Georgia

C256

Program Area: Biomechanics and Mechanobiology

Understanding and Preventing Nanocarpet Effect

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Jiang Zhe, University of Akron

E123

Program Area: Sensors and Sensing Systems

A High Throughput Microfluidic Sensor for Real Time Health Monitoring of Rotating Machinery

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Jiang Zhe, University of Akron

E124

Program Area: Sensors and Sensing Systems

IDR: A Novel Multiplexed Multichannel Biosensor Chip for High-Throughput Detection of Macromolecular Biomarkers

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Karen Zheng, University of Texas at Dallas

B238

Program Area: Manufacturing Enterprise Systems

GOALI: A Phased Approach for Investigating Trust and Trustworthiness in Forecast Information Sharing

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Weihong (Katie) Zhong, Washington State University

C114

Program Area: Materials and Surface Engineering

Interfacial Wetting and Adhesion Enhancement in Advanced Organic-Fiber/Polymer Composites through a "Nano-nectar" Methodology

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Guangwen Zhou, SUNY at Binghamton

C70

Program Area: Materials and Surface Engineering

Probing Nanoscale Oxidation Mechanism of Metals under Applied Stress

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

H. Susan Zhou, Worcester Polytechnic Institute

E134

Program Area: Sensors and Sensing Systems

Engineering Rapid and Ultrasensitive Microsystem with Hybrid Nanomaterials

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Jack Zhou, Drexel University

B132

Program Area: Manufacturing Machines and Equipment

EAGER/Collaborative Research: Solid Freeform Fabrication of a Conceptual Artificial Photosynthesis Device

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Shiyu Zhou, University of Wisconsin, Madison

B223

Program Area: Manufacturing Enterprise Systems

Statistical Analysis and Control of Ultrasonic-based Aluminum Nano-composite Fabrication Processes

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Guoming Zhu, Michigan State University

E300

Program Area: Dynamical Systems

GOALI/Collaborative Research: A Control Oriented Charge Mixing and Hybrid Combustion Model for SI-HCCI Dual Mode Engines

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Weidong Zhu, University of Maryland, Baltimore County

E301

Program Area: Dynamical Systems

GOALI: Dynamic Modeling and Analysis of Complex Systems with Application to Elevator Systems

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Yimin Zhu, Florida International University

D40

Program Area: Civil Infrastructure Systems

Stochastic Time, Cost and Environmental Impact Optimization of Construction Processes

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Yingxi (Elaine) Zhu, University of Notre Dame

C90

Program Area: Materials and Surface Engineering

Molecular Engineering of Biomimetic Hydrogel-Based Lubricious Films

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.

Yong Zhu, North Carolina State University

C115

Program Area: Materials and Surface Engineering

Temperature Effect on Advanced Mechanical Properties of Semiconductor Nanowires

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

GRANTEE POSTER SESSION SCHEDULE

Thomas Zimmie, Rensselaer Polytechnic Institute

D49

Program Area: Geotechnical Engineering

RAPID: Flood and Erosion Reconnaissance: Hurricanes Irene and Lee, Upstate New York and Western New England

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Michal Zochowski, University of Michigan, Ann Arbor

E284

Program Area: Dynamical Systems

Understanding Multimodal Interactions in Neuronal Networks

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Jun Zou, Texas A&M University

E109

Program Area: Sensors and Sensing Systems

MEMS-Switched Acoustic Delay-Lines Microsystems for Advanced Ultrasonic Imaging Applications

Poster Session 1: Monday, July 9, 8:30 a.m.–12:00 p.m.

Lei Zuo, SUNY at Stony Brook

D110

Program Area: Hazard Mitigation and Structural Engineering

Vibration Control of Tall Buildings Using Electricity Generating Tuned Mass Dampers

Poster Session 4: Tuesday, July 10, 3:15 p.m.–5:45 p.m.

Min Zou, University of Arkansas

C71

Program Area: Materials and Surface Engineering

CAREER: Nano-Engineered Surfaces: Fabrication and Mechanical and Tribological Properties

Poster Session 2: Monday, July 9, 3:00 p.m.–5:45 p.m.

Qingze Zou, Rutgers University

E84

Program Area: Control Systems

CAREER: Control Tools for Nanoscale Rapid Broadband Viscoelasticity Measurement and Mapping of Soft Materials

Poster Session 3: Tuesday, July 10, 7:30 a.m.–9:30 a.m.
